Systems Integrator/Training

Adeneo Training Expertise

Adeneo Embedded helps customers get the most out of their investment in embedded and real-time technologies through a wide range of basic to advanced training offerings. We collaborate with silicon vendors and distributors to provide relevant up-to-date courses. We also offer customized training for clients to meet their specific design, architecture and operating system needs.

To meet education needs, we provide regularly scheduled instructor-led classes at locations throughout North America and Europe.
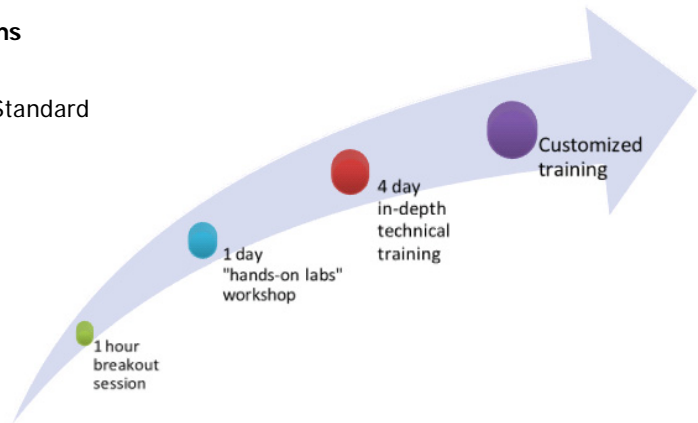

Trainings

Adeneo Embedded provides different levels of training from early consideration to kick off of design. Most of these training sessions are focused on different Microsoft Embedded platforms and different architectures.

Microsoft Embedded Platforms
- ✓ Windows Embedded CE
- ✓ Windows Embedded Standard
  (new version of XP Embedded)
- ✓ Windows Mobile
- ✓ .NET Micro Framework

Microprocessors
- ✓ ARM
- ✓ x86
- ✓ SH4

Customized training

4 day in-depth technical training

1 day "hands-on labs" workshop

1 hour breakout session

Windows Embedded Expertise

Committed to embedded systems education and building deep technical expertise, we offer training courses as a Microsoft Certified Training Partner. Adeneo Embedded has been recognized by Microsoft with Windows Embedded Partner Excellence Awards:
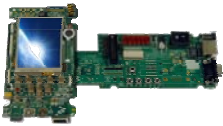

> **"Systems Integrator of the year: 2007"**

> **"Training Partner of the year: 2008"**

Our customers benefit from high quality trainings thanks to our engineering team which is Windows Embedded CE 6.0 MCTS certified. Adeneo Embedded is the only Microsoft partner with 6 Windows Embedded MVPs (Most Valuable Professionals) on its staff.

Features and Benefits

All attendees to a 4 day in-depth training receive for FREE one of the following ARM-based development kits from one of our Silicon Vendor partner
($1000 to $1500 value)

1 hour breakout session

- ✔ Done at major tradeshows
- ✔ Introduction of the Windows Embedded technology
- ✔ Driver development on Windows Embedded

Free session

1 day "hands-on labs" workshop

- ✔ Introduction to Windows CE development
- ✔ Windows Embedded CE 6.0 drivers
- ✔ Application development for CE 6.0

Discounts on development kits and 4 day training classes

4 day in-depth technical training

- ✔ Windows Embedded CE architecture, features and development tools
- ✔ Firmware development using "Platform Builder"
- ✔ Board Support Package development
- ✔ Image customization
- ✔ Applicative development with Visual Studio

2 000€ per attendee
10% discount on early registration

Customized trainings

- ✔ 5-days performed on customer site
- ✔ Focuses on specific technical points
- ✔ Lab performed on customer's dedicated target or CE emulator

Contact us for price quote
2-10 attendees maximum

ALSO INCLUDED the following Book and DVD

Upcoming 4-day training sessions

2009			2010		
September 21st to 24th	Munich, Germany		February 1st to 4th	Paris, France	
October 5th to 8th	Paris, France		March 22nd to 25th	Munich, Germany	
October 19th to 22nd	Milano, Italy		April 19th to 22nd	Paris, France	
November 16th to 19th	Munich, Germany		June 7th to 10th	Milano, Italy
