Campus Days
14.-16. januar 2010
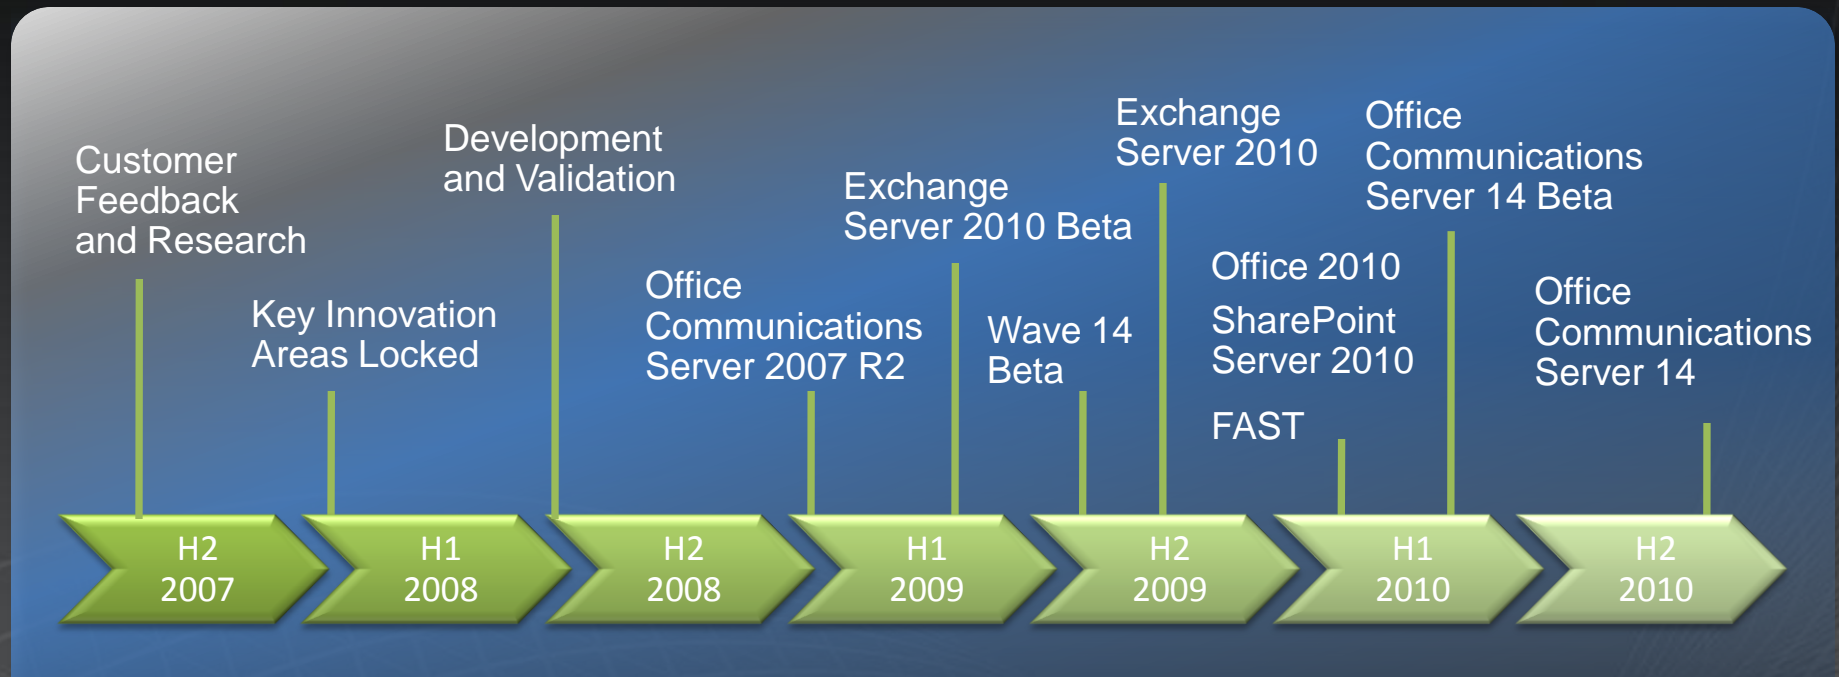

O-01 IW General Session

visionen bag Office, Exchange, SharePoint og Unified Communication

Jesper Priskorn, jpris@microsoft.com

Mikkel Bach Nielsen, mikkelbn@microsoft.com

Morten Grundtvig, mortengr@microsoft.com

Microsoft TechNet

Wave 14 Timeline

- Wave 14 as the code name for next wave of innovation
- Wave 14 includes Office 2010, SharePoint Server 2010, Visio 2010, which ship together, and OCS and Exchange who ship separately
- ~$1B in annual R&D investment across Wave 14

Note: All dates are Calendar Years

Investing in Integrated Innovation

## Making Work Environments More Intelligent

- Collaboration in fluid communities
- Information finds you
- Integrated experiences across phone, e-mail, conferencing, collaboration

Making Technology More "Invisible"

- Work through surfaces, gestures, and voice
- Better organization and insight to visualize data
- Toolbars are smarter

Lowering the Cost of Technology While Making it Lighter on the Environment

- Access through "cloud" and hosted services
- Greener IT with reduced footprint
- Distributed and mobile

Apple	Google	Oracle	HP	Motorola	Cisco	Sony	Intel	IBM	Microsoft
$782M	$1.6B	$2.2B	$3.6B	$4.4B	$4.5B	$4.7B	$5.8B	$6.1B	$7.1B

The Best Productivity Experience Across   PC, Phone, and Browser

Microsoft Online Services

- Enterprise class software
- Delivered via subscription services
- Hosted by Microsoft and sold with partners

Starting with…

Business Productivity Online Suite

Microsoft® Exchange Online

Microsoft® SharePoint® Online

Microsoft® Office Live Meeting

Microsoft® Office Communications Online

Microsoft Dynamics® CRM Online

OFFICE 2010

End User Investments

Work Better Together

- Work better together with co-authoring & OneNote
- Gain control over e-mail with conversation management
- Share instantly with Broadcast Slide Show
- Combine business and social networking

Bring Ideas to Life

- Find more with Backstage view and ribbon UI
- Tell a story with photo & video editing
- Make sense of data with PowerPivot & Sparklines

Use Office Anywhere

- Work from virtually any place, device with Web Apps
- Keep up on the go with SharePoint Workspace
- Do more on your Windows or Nokia phone

IT Pro investments

Simplify

- Improve Deployment Agility
- Lower Management Costs
- Maximize new and existing hardware investments
- Tight integration with System Center
- Multiple layers of security
- Stay compliant
- Higher availability with better patch management
- Reduce training cost

Developer investments

Developer Productivity

- Rapidly develop solutions with Visual Studio 2010
- VBA still going strong!
- Open XML SDK
- Deploy more than one add-in

SharePoint integration

- Word Automation Services
- Visio Services
- Excel Services
- InfoPath 2010 rocks:-)

UI Customization

- Backstage View
- Resizing of Ribbon
- Tab Activation
- Outlook Solutions Module

OFFICE 2010 DEMO

SHAREPOINT 2010

End User Investments

Rich User Experience
- Easy site editing, including theming & branding
- Office Ribbon UI for faster training & adoption
- Rich offline experience with SharePoint Workspace

Anywhere Access
- Mobile-based interaction with people and content
- Read-write web access using Office Web Application
- Cross-browser support for maximized participation

Single platform
- Collaboration across Intranet, Extranet & Internet
- Improved interoperability with standards support
- Out-of-box accessibility compliance for WCAG 2.0

IT Pro investments

Scale with Governance
- Terabytes of data and multi-million item lists
- Improved Platform resiliency and redundancy
- Advanced back-up, restore and disaster recovery

Deployment Flexibility
- Collaboration across Intranet, Extranet and Internet
- On-premise and/or hosted options
- Data storage inside and outside the SharePoint DB

IT Productivity
- Enterprise-wide management capabilities
- Robust installation and predictable upgrade process
- Higher availability with better patch management

Developer investments

Developer Productivity
- Rapidly develop solutions with Visual Studio 2010
- Application Lifecycle Management & Team Dev
- Solution quality improved with debugging tools

Development Platform
- Rich solution UI with Silverlight, XSLT View, Clean HTML
- Data Foundation – Relationships, Lookup
- Better programmability with LINQ, Client API

Solution Hosting
- Standardized WSP Package Deployment
- SharePoint Online shared solution hosting
- Install on Vista SP1 or Windows 7 for Developers only

SHAREPOINT 2010 DEMO

EXCHANGE 2010

Exchange 2010 End-User

- Organize and Navigate with Ease Using Enhanced Conversation View and Filtering
- Help Reduce Unnecessary and Undeliverable E-Mail Through New Sender MailTips
- Quickly Triage and Take Action on Messages with Voice Mail Preview

Desktop

Microsoft®
Outlook® 2010

Microsoft®
Office Outlook® 2007

Exchange 2010 Administration

Exchange 2010 Developer

.NET Developer Experience
- EWS Managed API 1.0
- Built-in Autodiscover client for "anywhere access"
- Enables easy migration from legacy Exchange APIs

New Exchange Data Services
- Enhanced contacts (contact groups, pictures)
- Outlook Web App form links
- Mailbox-wide search and notifications services
- Room lists service

Application Management and Configuration
- Role-based Impersonation management
- User and application configuration service
- SOAP Autodiscover with batch request support
- Enhanced time zone support

Built for the Cloud
- Enabled on Live@EDU and Microsoft Online
- Same functionality on-premises and in the cloud
