

THE OOPS I JUST HIT "REPLY ALL" ERA IS OVER.

Microsoft® Office has evolved. Have you?

The way we work has changed and information is simply everywhere. Once it leaves your hands, anything can happen. Today's Microsoft Office includes Information Rights Management technologies, so you can limit the printing, copying or forwarding of sensitive email and documents.

It's time to evolve the way you work.

Discover how at microsoft.com.au/office

We're using Office 2000. Should we upgrade?

Duh.

Microsoft®
Office

Microsoft Office System, released in October 2003, is an evolution to a more comprehensive and integrated system of programs, servers, services and solutions compared to prior versions of Microsoft Office.
