CTO

2009 Architects, DEs

2008 Development, Product Mgmt

2007 Marketing, Sales, Support

Megatrends

Enables
SW Advances

Extends SOA
to the
Edge

SOA and
Business
Processes Enable

Performance
of hardware

Wireless, portable,
Tablet PC, phone

Service-oriented
architecture

Apps that
span both
lifestyles

Just-in-Time
and Situational
Solutions

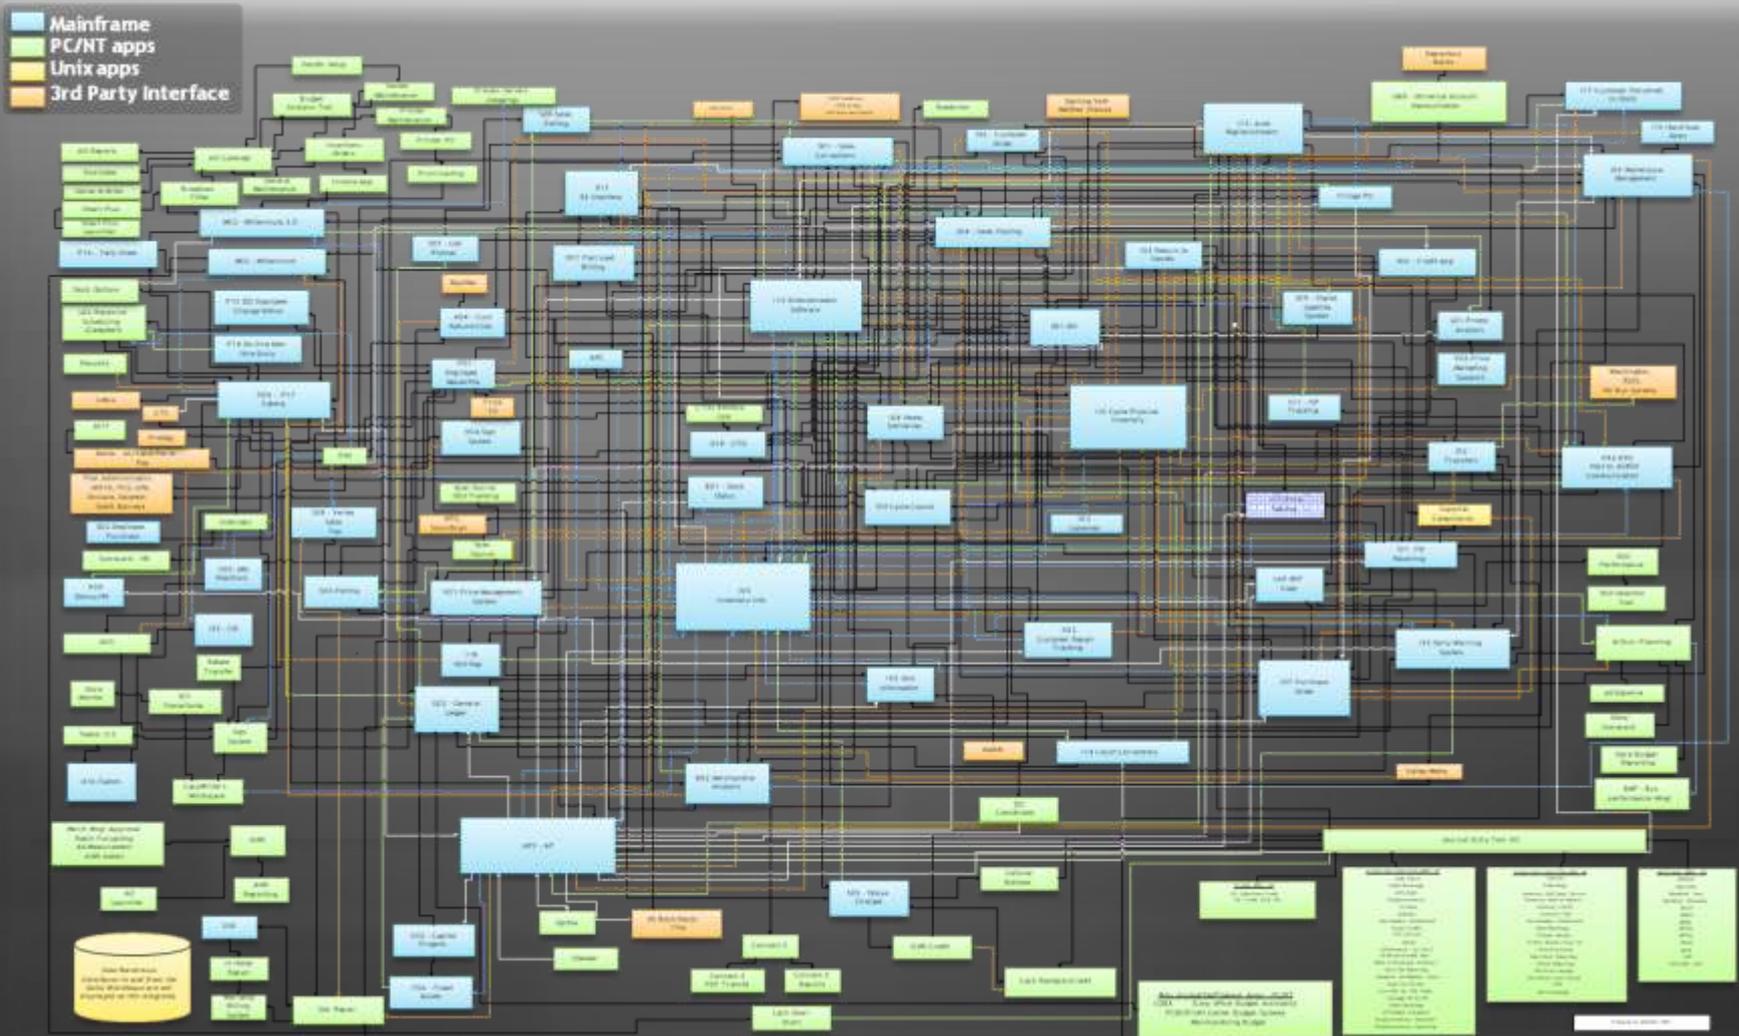

MDD, Rules
and
End User Prog.

Digital workstyle,
lifestyle

Digitization
of the economy

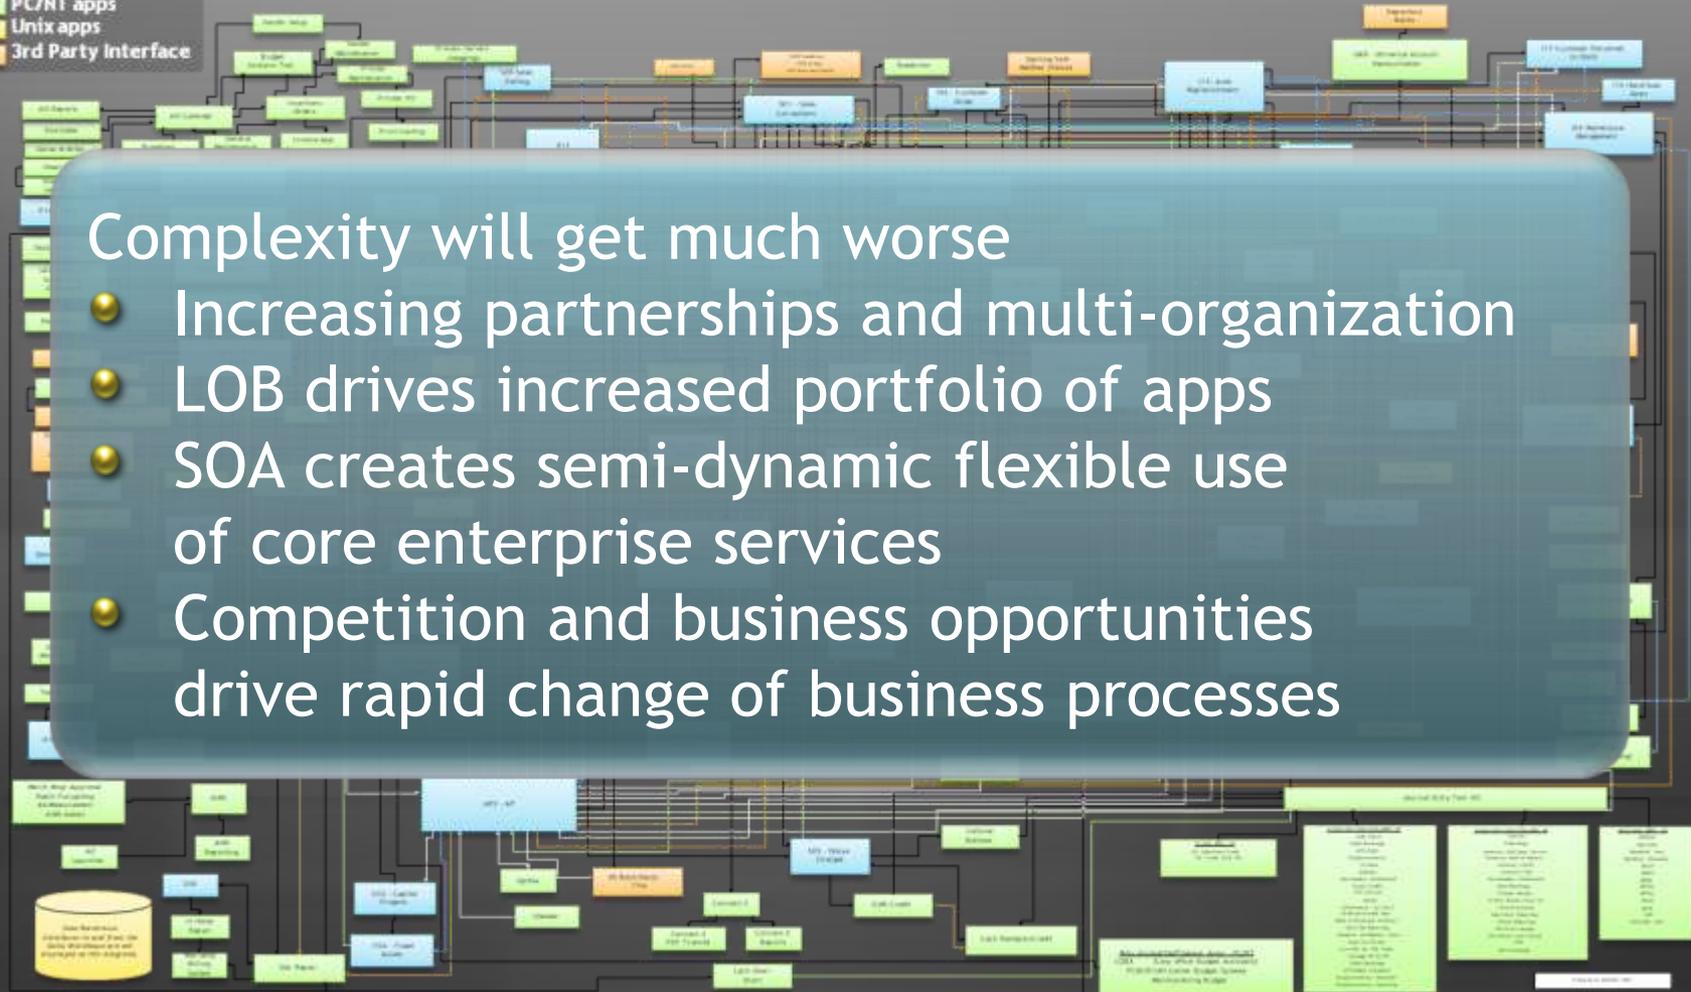

Software
breakthroughs

Complexity – An Example

Complexity — An Example

Legend:
Mainframe
PC/NT apps
Unix apps
3rd Party Interface

Complexity will get much worse

- Increasing partnerships and multi-organization
- LOB drives increased portfolio of apps
- SOA creates semi-dynamic flexible use of core enterprise services
- Competition and business opportunities drive rapid change of business processes

A Simple Scenario – Travel Problems

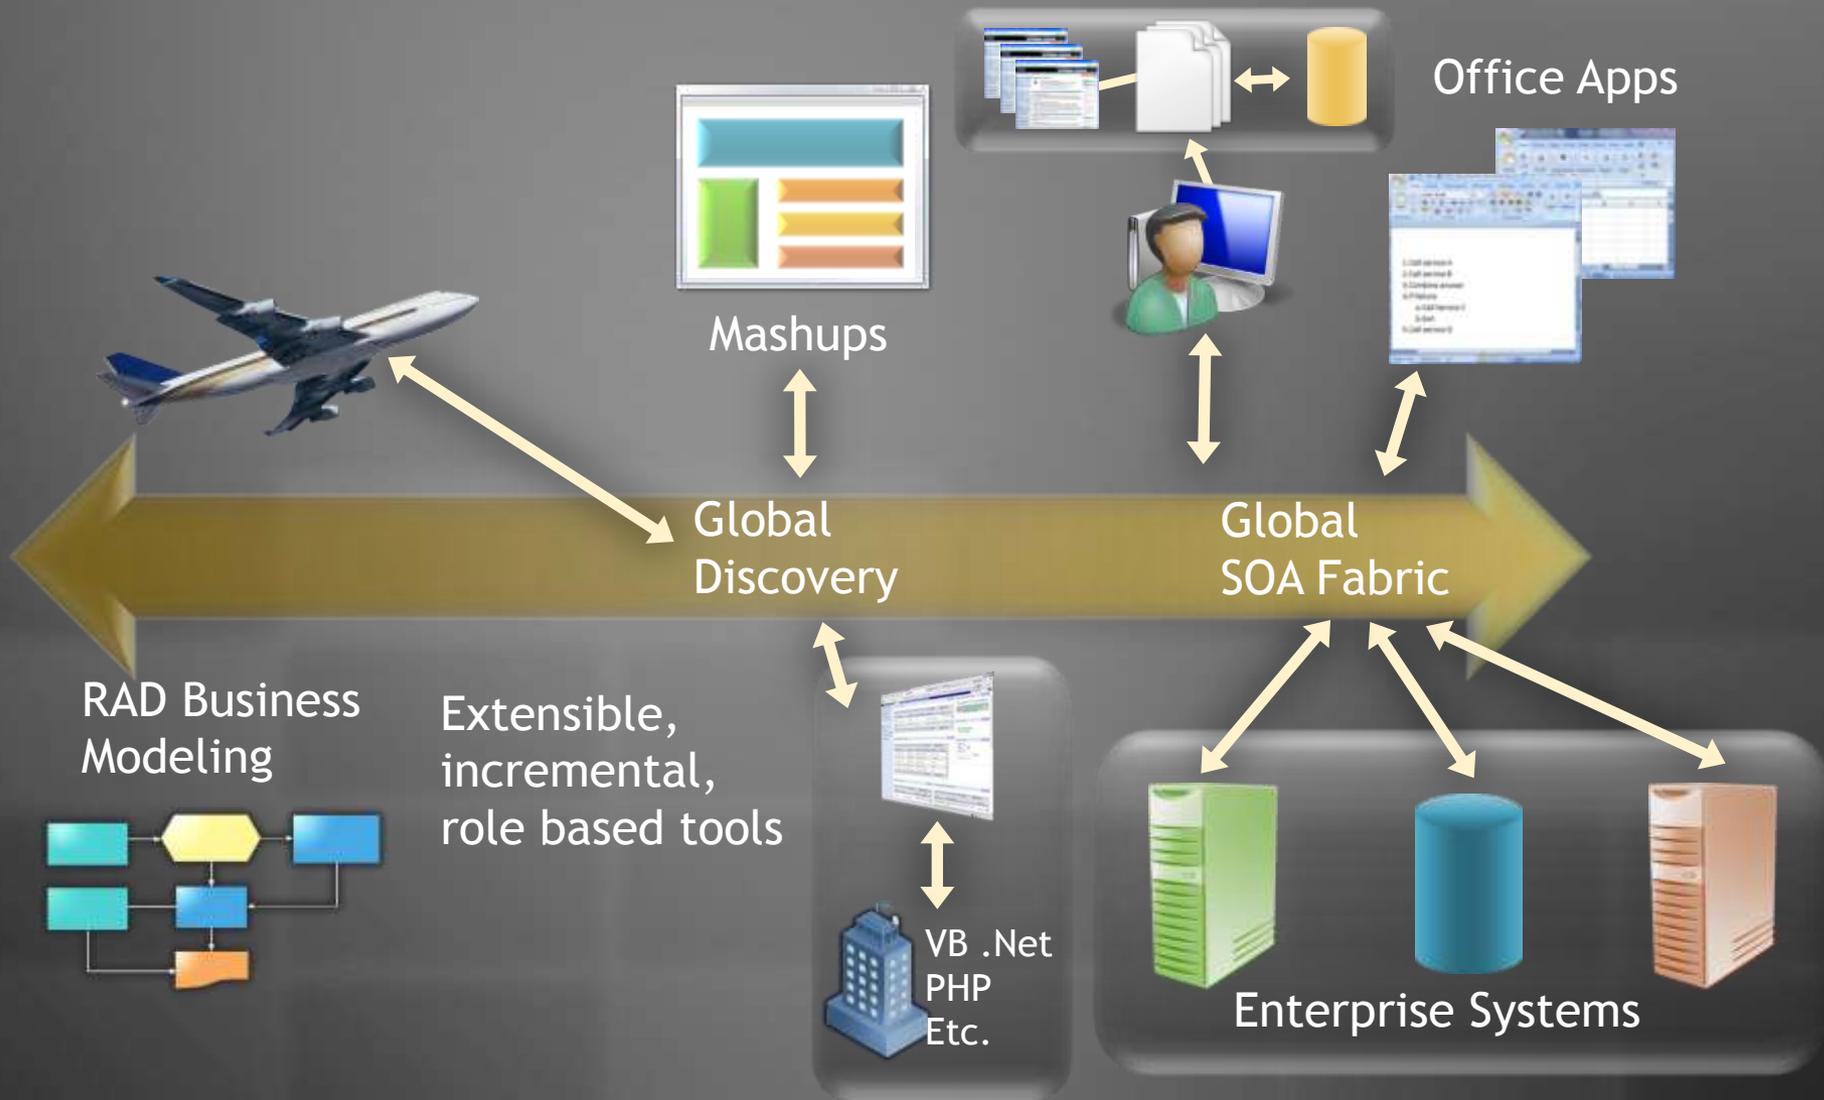

Meet Dave, a frequent traveler

- Dave interacts with
 - Corporate travel support in travel agency
 - Premium customer programs in airlines and hotels
 - Local town car services
 - Restaurants through their Web sites
 - Friends and colleagues
- Only Dave sees all elements of the itinerary
- Dave will miss a connection because of delay due to weather, and it is late at night
 - Dave must manually repair the itinerary on landing
 - Change customer contact plans
 - This is complex and tedious
 - Simple cases could be automatically repaired while Dave is in the air

A Simple Scenario – Travel Problems

- Dave needs a simple, SOA/BPM Solution
 - Receive events from airlines
 - Determine impact of delays and cancellations
 - Update reservations
 - Update CRM system to assign other contacts
 - Retrieve new account and product information
 - Update travel: Hotels, restaurants, town car service
- This may *seem* like it requires complex programming skills, but it does not
 - The business process is a “nested list”
 - Each step is like filling out a Web form
 - Computations are no more complex than Excel
 - Profile is Access data or a structured file

Developing A Solution

Your Business. Connected

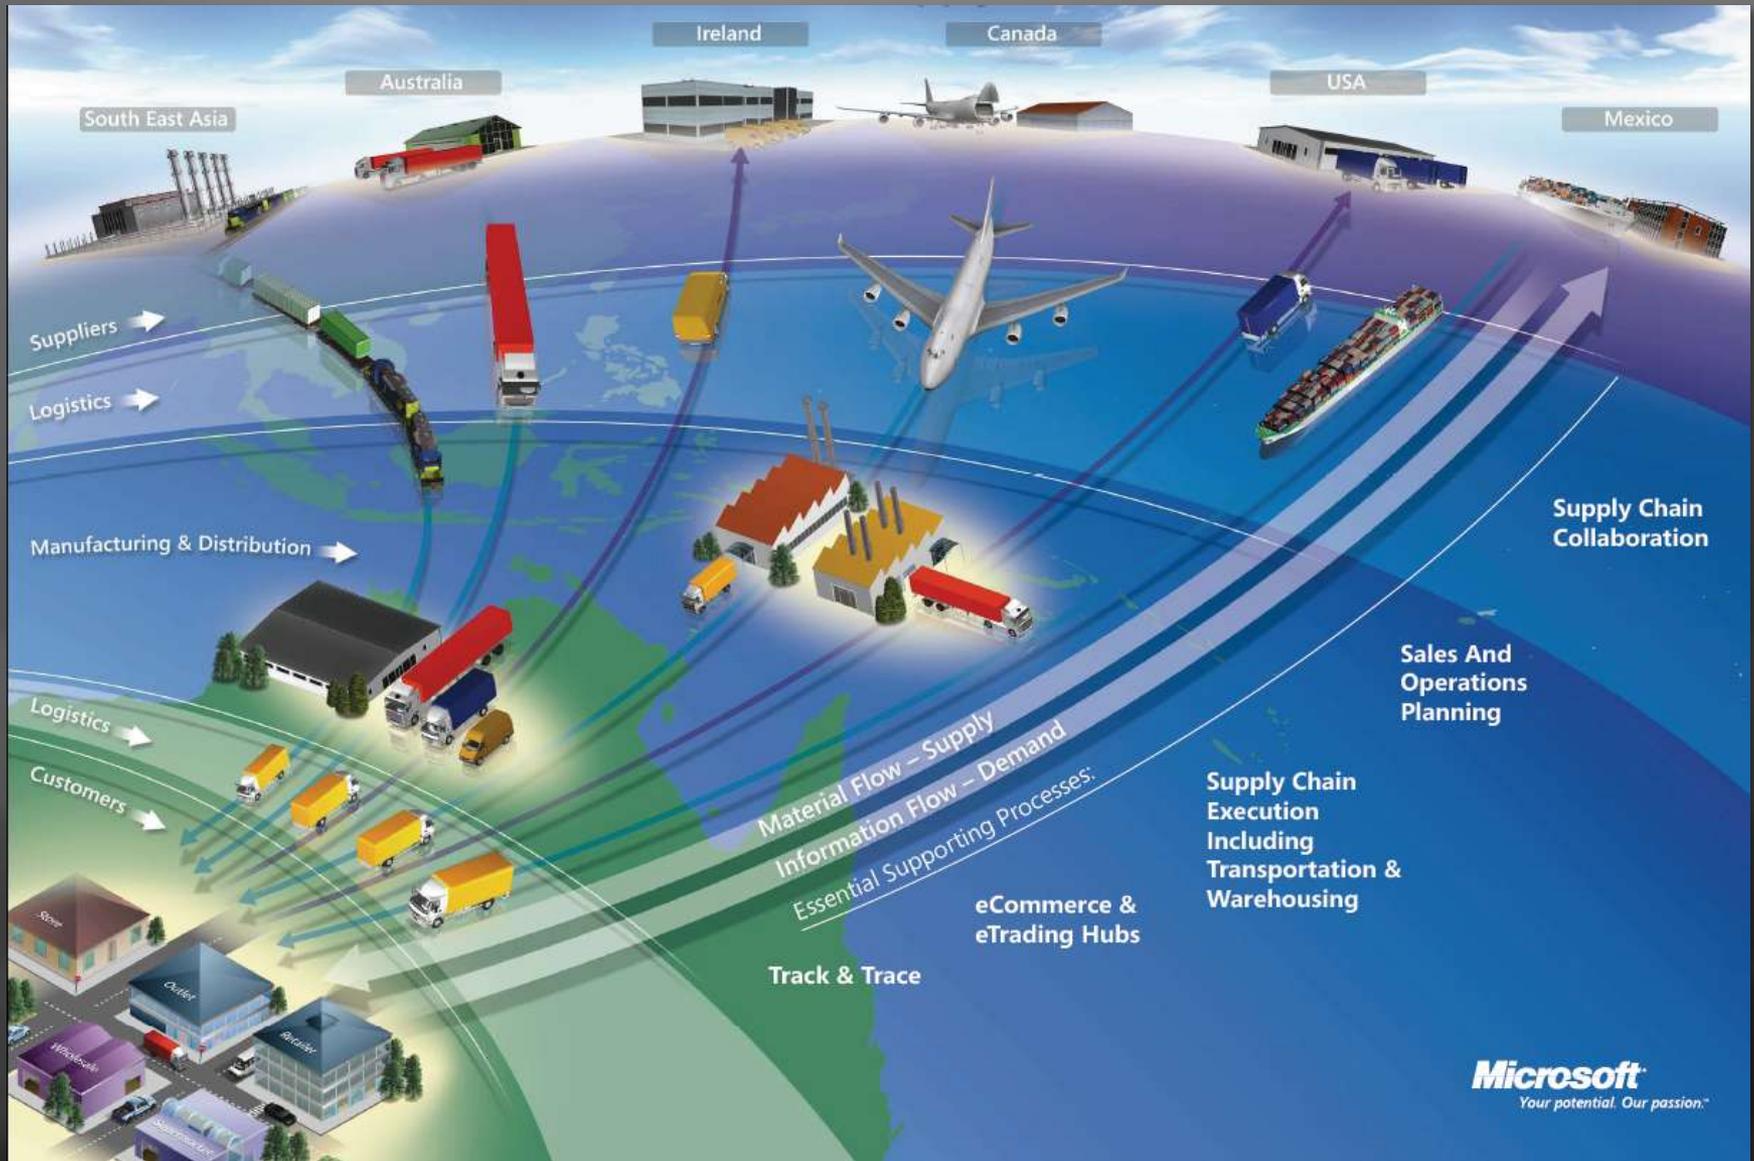

One Element: Service Bus

The Service Bus: BizTalk

The Connected Enterprise

What Matters In A Platform, And Why Microsoft

Digitization of
the economy

- 
- Developer productivity, that is an extension of existing skills
 - .NET, Visual Studio
 - BizTalk Tools
 - Office Application
 - The platform isn't Java or C# – It's the model
 - Global presence – Common Model
 - BizTalk Server, BizTalk Services
 - Office Live!
 - WCF provides “on device” ISB
 - World wide, dynamic data center of 1,000,000s of VM
 - DSI
 - VHDs
 - Enablement of multiple, flexible devices
- SOA,
Software Breakthroughs
- HW Performance
(CPU, Memory, Comms)
- Digital workstyle,
Lifestyle
PC/Phone/Tablet
