

## Windows Mobile® 5.0 features at a glance.

### Communication

- Access to personal and corporate email accounts using Microsoft® Office Outlook® Mobile.
- Mail reconciliation with Microsoft® Small Business Server or Exchange Server.
- Direct Push e-mail for delivery of e-mail to a device as items arrive on server.\*
- Microsoft Internet Explorer Mobile for browsing the Web.

### Personal Information Manager (PIM)

- Synchronization of contacts, calendar, tasks and notes between Outlook Mobile on the device and Microsoft Outlook on the desktop.
- Wireless synchronization of Outlook data between device and Exchange Server. (No cradling required.)
- Over-the-air updates of Outlook information on device through Direct Push technology.\*

### Document access\*\*

- Ability to view and edit spreadsheets and charts with Microsoft Office Excel Mobile
- Ability to view and edit Word files with Microsoft Office Word Mobile, including preservation of rich formatting, such as fonts, spacing and images.
- Ability to view presentation files with Microsoft Office PowerPoint® Mobile.

### Security

- Secure Sockets Layer (SSL) communication when transmitting data over the air.
- Password policy management to help enforce security policies.\*
- Remote device wipe for lost or stolen devices\* when device is connected to network.

### Phone

- Full voice phone capability.
- Text messaging using Short Message Service (SMS).
- Easy-to-use contact management, including support for photo caller ID and individualised ring tones for specific callers.

### Mobile applications from Microsoft and third parties

- Wide range of horizontal applications, from GPS navigation to CRM software.
- Numerous vertical applications, including real estate, legal and healthcare.

### Multimedia capabilities

- Windows Media® Player 10 Mobile for playing music and videos.
- Built-in camera for taking photos and videos.
- Voice recording for taking notes.

Now when, where and how you work is entirely up to you.

\* Requires Windows Mobile 5.0 with the Messaging and Security Feature Pack (MSFP) and Exchange Server 2003 with Exchange Server Service Pack 2.

\*\* Not all Smartphones support Office document access. Pocket PC Phone Edition devices enable users to view Excel, Word, and PowerPoint documents and edit Excel and Word documents. Connectivity and synchronization solutions may require separately purchased equipment and/or other wireless products (e.g., WiFi card, network software, server hardware, or redirector software). Service plans are required for Internet, WiFi, and phone access. Features and performance may vary by service provider and are subject to network limitations. See device manufacturer, service provider, and/or corporate IT department for details. Available programs, features and functionality vary by device and Windows Mobile operating system version. ©2006 Microsoft Corporation. All rights reserved.
