Azure Success Stories

Digitalize Manufacturing Management With Profifox!

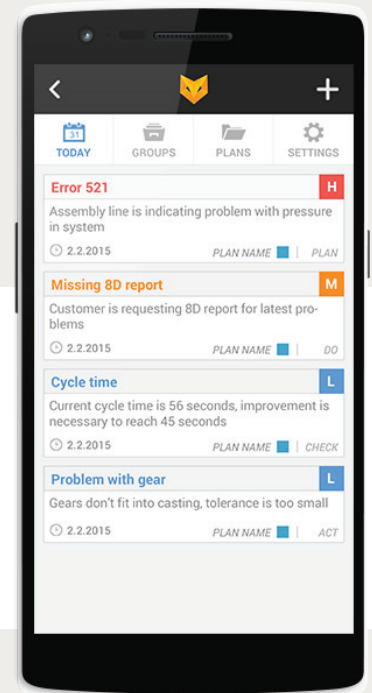

Partner: PROFIFOX a.s.

Country: Slovakia

Established: 2015

Employees: 6

Website: www.profifox.com

The Idea

Main goal of Profifox was to streamline management of complex problems and tasks in LEAN manufacturing companies. Abolish waste of time on administration of problems and provide fast and vital analytics to management. All of that while keeping compliance with ISO, VDA, LEAN, Six Sigma and other regulations. All packaged in easy to use and easy to learn interface.

The Solution

Complete solution to manufacturing problems consist of several unique approaches combined: User centric multi-project management, LEAN principles used and structure used, Off-line capabilities for production halls, Hi-End encryption, fast and reliable analytics and visualization of data on large screens directly in offices and on the shop-floor.

The Results

As a result, employees can save 1 working day every month, to do actual work instead of administration and they won't forget anything anymore. Companies and managers have great insights on progress, team effort and overall control over projects and non-comformities. Integration with auditing tools and use of ShopFloor TV efficiently turn whole company from paper straight to digital.

The Azure Benefit

Profifox works on the cloud, allowing affordable and easily scalable solution for companies of all sizes. At the same time, it provides high availability of data, integration with existing Azure active directories and high level of data security. Azure also supports multi-point and multi-country operations, allowing Profifox to grow internationally and change the future of manufacturing.
