

# SQL Server 2012 Licensing

Vicky Lea

# Agenda

- ▶ SQL Server 2012
  - ▶ Licensing basics
  - ▶ Virtual environments
  - ▶ License Mobility
  - ▶ Other licensing principles
- ▶ Enrolment for Application Platform

# SQL Server 2012

# SQL Server 2012

The licensing basics

# SQL Server 2008 R2 SKUs

## Principal

- Departmental
- Small / medium scale

- Business critical
- Large scale

- Business critical
- Highest scale

## Specialised

- Websites
- Web applications

- Supported for installation in a small business domain

## Breadth

- Developing and testing
- Free with MSDN subscription

- Client embedded
- Free

- Entry level and learning
- Free

- Branch
- Small scale

# SQL Server 2012 SKUs

Principal

- Departmental
- Limited deployment
- Small projects

- Enterprise BI
- Self-service analytics

- High-end datacenter
- Premium BI

Specialised

- Websites
- Web applications

Breadth

- Developing and testing
- Free with MSDN subscription

- Client embedded
- Free

- Entry level and learning

# SQL Server 2012

Licensing the Physical Infrastructure

# Server/CAL Licensing

## ▶ Editions

- Standard
- Business Intelligence

## ▶ Rules

- SQL Server 2012 CALs can be used against any SQL Server, regardless of platform or edition
- Available as User or Device CALs
- Required even for indirect access to SQL Server

# True or False?

“A SQL 2012 CAL can access a SQL 2008 R2 Workgroup Server or a Small Business Edition Server”

True

False

# True or False?

“Devices not operated by humans do not need CALs”

True

False

# Core Licensing

## ▶ Editions

- Standard
- Enterprise

## ▶ Rules

- Count the number of cores in the server
- Multiply by the Core Factor

## SQL Server Core Factor Table

Effective Date: April 1, 2012\*

SQL Server Core Factor Table is only applicable to SQL Server 2012 or later versions

Processor Type	Core Factor
All processors not mentioned below	1
AMD 31XX, 32XX, 41XX, 42XX, 61XX, 62XX Series Processors with 6 or more cores	0.75
Single Core Processors	
Dual Core Processors	

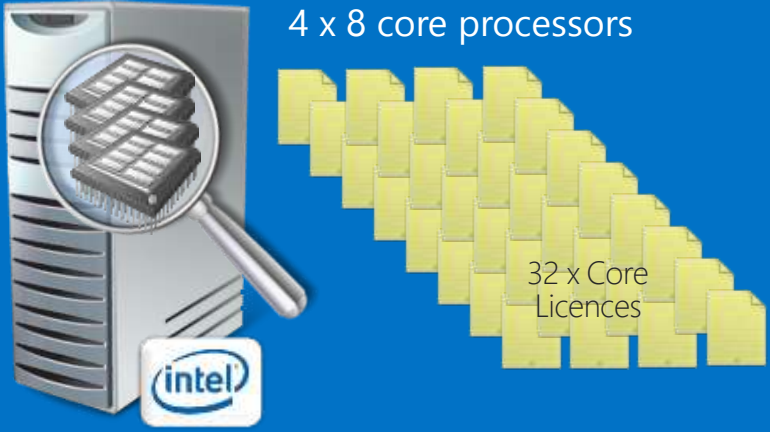

Processor Type	Core Factor
AMD 31XX, 32XX, 41XX, 42XX, 61XX, 62XX Series Processors with 6 or more cores	0.75
Single Core Processors	1
Dual Core Processors	2

SQLSvrStdCore ALNG LicSAPk MVL 2Lic CoreLic  
SQLSvrEntCore ALNG LicSAPk MVL 2Lic CoreLic

# Examples

Processor Type	Core Factor
All processors not mentioned below	1
AMD 31XX, 32XX, 41XX, 42XX, 61XX, 62XX Series Processors with 6 or more cores	0.75
Single Core Processors	4
Dual Core Processors	2

**A**

4 x 8 core processors

32 x Core Licences

Diagram A shows a server rack with an Intel logo. A magnifying glass highlights two 8-core processors. To the right, 32 yellow document icons represent core licenses, arranged in a grid that is 4 rows high and 8 columns wide.

**B**

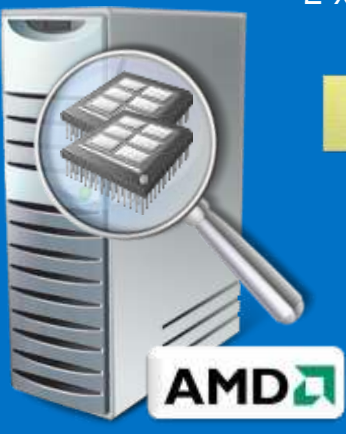

2 x 2 core processors

8 x Core Licences

Diagram B shows a server rack with an Intel logo. A magnifying glass highlights two 2-core processors. To the right, 8 yellow document icons represent core licenses, arranged in a grid that is 2 rows high and 4 columns wide.

**C**

2 x 6 core processors

9 x Core Licences

Diagram C shows a server rack with an AMD logo. A magnifying glass highlights two 6-core processors. To the right, 9 yellow document icons represent core licenses, arranged in a grid that is 3 rows high and 3 columns wide.

**D**

1 x 6 core processor

5 x Core Licences

Diagram D shows a server rack with an AMD logo. A magnifying glass highlights one 6-core processor. To the right, 5 yellow document icons represent core licenses, arranged in a grid that is 2 rows high and 3 columns wide.

# SQL Server 2012

## Licensing in virtual environments

# Server/CAL Editions

License individual virtual machines

# Core Editions

When licensing individual VMs, Core Factors do not apply

License the virtual processors used by the virtual machines, with a minimum of 4 Core licences per virtual machine

# SQL 2012 Enterprise Core Virtualisation Rights

Licensing all the physical cores gives the rights to one virtual machine per Core licence

# Unlimited Virtualisation

License all the physical cores with Enterprise Edition Core licences with SA

# SQL Server 2012

Licence Mobility

# Licence Mobility Within Server Farms

# Licence Mobility: 2008 R2

## SQL Server 2008 R2 Standard

The license terms that apply to your use of this product are the Universal License Terms, the General License Terms for this Licensing Model, and the following:

License Mobility Rights: No	Self-Hosting of Applications Allowed: Yes (See <a href="#">Appendix 2</a> )
	Additional Software: Yes (See <a href="#">Appendix 3</a> )

## SQL Server 2008 R2 Enterprise

The license terms that apply to your use of this product are the Universal License Terms, the General License Terms for this Licensing Model, and the following:

License Mobility Rights: Yes	Self-Hosting of Applications Allowed: Yes (See <a href="#">Appendix 2</a> )
	Additional Software: Yes (See <a href="#">Appendix 3</a> )

## SQL Server 2008 R2 Datacenter

The license terms that apply to your use of this product are the Universal License Terms, the General License Terms for this Licensing Model, and the following:

License Mobility Rights: Yes (See General Terms)	Self-Hosting of Applications Allowed: Yes (See <a href="#">Appendix 2</a> )
	Additional Software: Yes (See <a href="#">Appendix 3</a> )

# Licence Mobility: 2012

# SQL Server 2012

Further licensing principles

# High Availability

Licensing active and passive secondary SQL Server 2012 databases with a core factor of 1

Active

Passive

No additional licences required

Active

Active

# True or False?

“A passive server may not have more cores than the active server”

True

False

# Licensing SQL Components

**When a SQL Server runs with all of its components in one server, license that server in the usual way.**

**If the database is running in one server, Analysis Services in a second one, and Reporting Services in a third one, then all three servers must be licensed.**

# True or False?

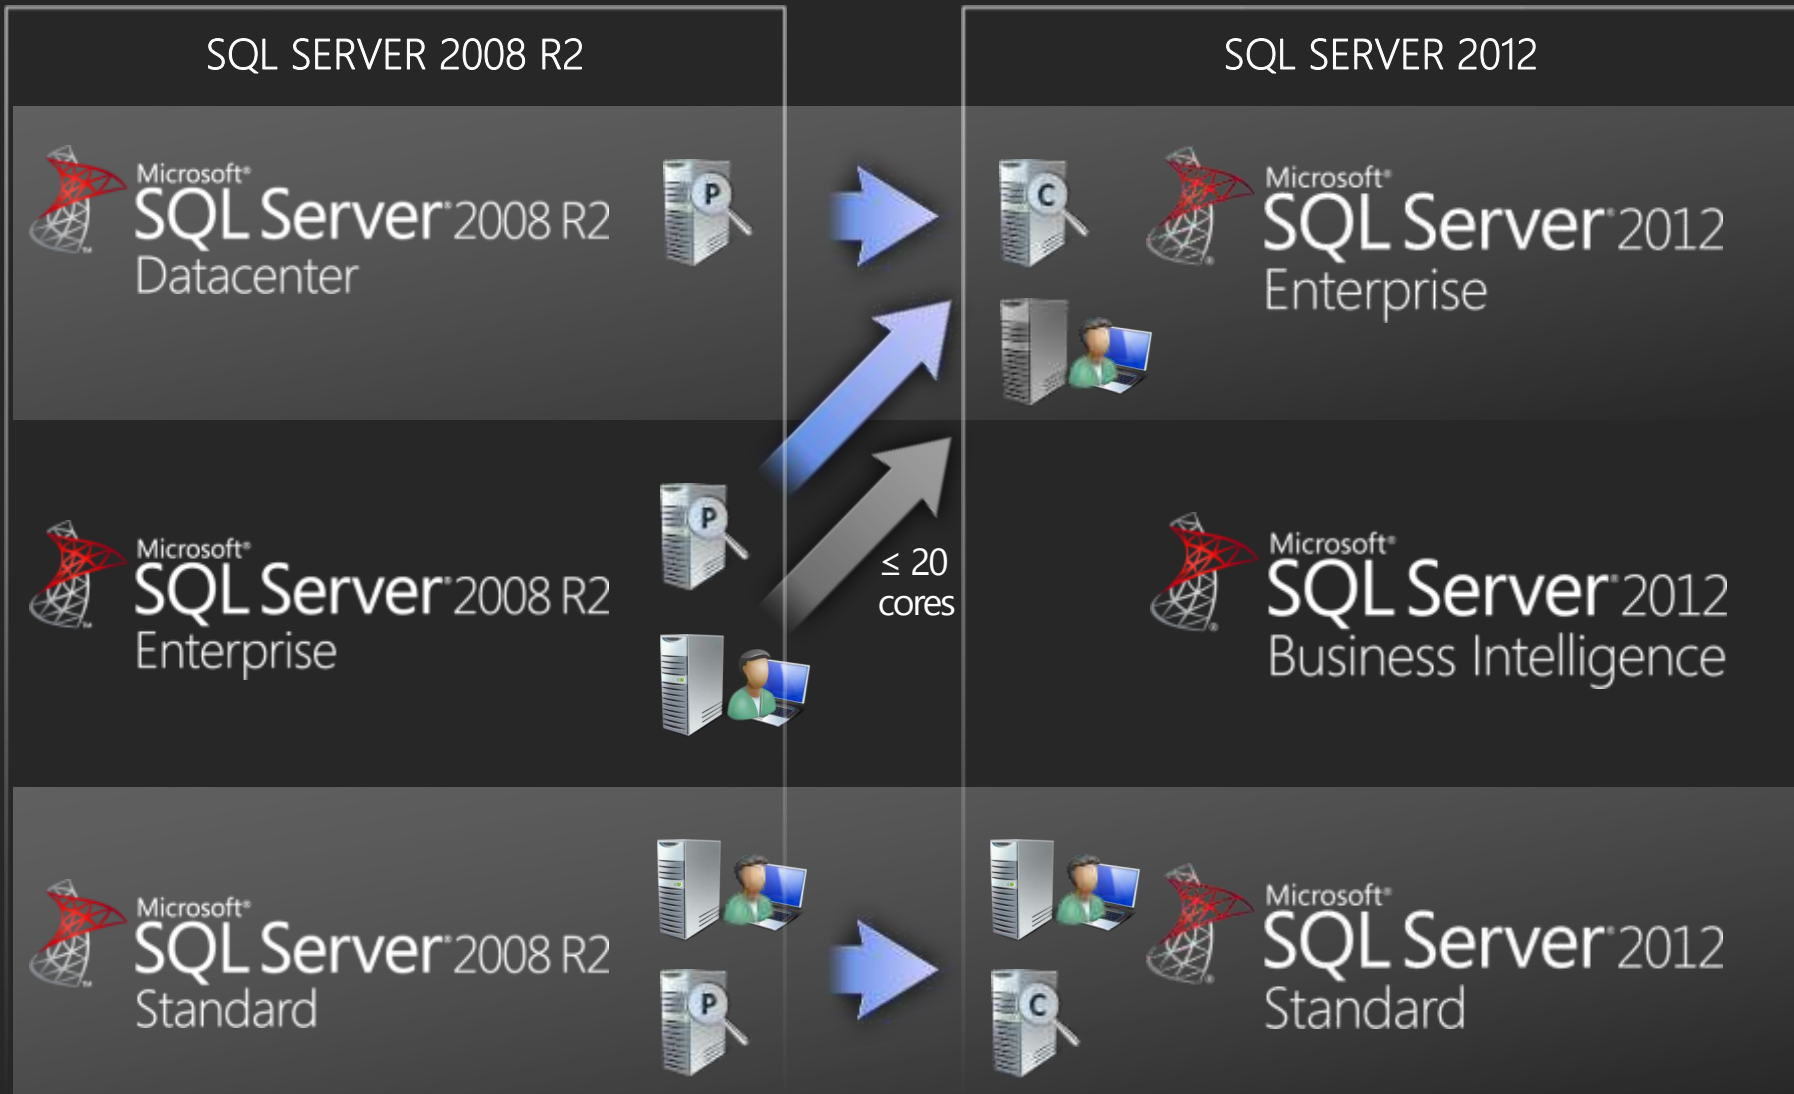

“Under the new Per Core licensing model, additional licences are not required if components such as Reporting Services or Integration Services are running on additional servers”

True

False

# Step-ups

## ▶ SA Benefit

- Lower edition licence must be covered with SA

## ▶ Available Step-ups

- Standard Server to BI Server
- Standard Cores to Enterprise Cores

## ▶ Cannot step-up between licensing models

# The Application Platform Components

# The Application Platform

▶ Microsoft SQL Server

▶ Microsoft SharePoint Server

▶ Microsoft BizTalk Server

▶ Microsoft Visual Studio

▶ Microsoft Expression Studio

# Licensing the Application Platform

# Enrolment for Application Platform

- ✓ Term: 36 months
- ✓ Licence type: Perpetual only
- ✓ Initial order: Based on certain minimums per product
- ✓ Price level: Relevant product pool price level from existing agreement or **Level A**
- ✓ Price benefits: Discounts on new Licences  
Deferment of payment for Licence for old products
- ✓ Additional Products: Any additional product as specified on the Product List  
No EAP products may be additional products  
Price level based on existing agreements

# SQL EAP: Key Facts

## ▶ Overview:

- An independent enrolment under the Enterprise Agreement that allows a customer to purchase SA for all SQL Licences

## ▶ Benefits:

- No need to purchase L&SA SKUs to get current
- Discounts of 15% for Standard and 40% for Business Intelligence and Enterprise edition new Licences

# How the EAP Works

## 1

### Determine the current footprint

- ▶ Consider all agreements:
  - Select and Select Plus
  - Enterprise Enrolment for Desktop Platform
- ▶ Consider all licences:
  - Existing licences with SA
  - Existing licences without SA
  - Any new licences required

# How the EAP Works

**1**

Determine the current footprint

**2**

Cover 100% of the footprint with SA

# Covering Licences with SA

## Current Licences

## SA?

## Purchase Requirements

SQL Server 2012

Renew SA as required

Buy SA

SQL Server 2005

Buy SA

## New Requirements

## Purchase Requirements

SQL Server 2012

Buy Licence and SA

# How the EAP Works

**1**

Determine the current footprint

**2**

Cover 100% of the footprint with SA

**3**

Meet the minimum requirements

# Example Minimums

▶ Microsoft SQL Server

50 Cores *or*  
250 CALs and 5 Servers

▶ Microsoft SharePoint Server

5 Servers

▶ Microsoft BizTalk Server

5 Processors

▶ Microsoft Visual Studio

▶ Microsoft Expression Studio

20 licences of any  
combination of Visual  
Studio Ultimate with  
MSDN and Visual Studio  
Premium with MSDN

# How the EAP Works

**1**

Determine the current footprint

**2**

Cover 100% of the footprint with SA

**3**

Meet the minimum requirements

**4**

Select the 1 year or 3 year true-up

# True-up Options

	1-Year True Up	3-Year True Up
<b>Price Savings</b>	Price savings on new licences	Price savings on new licences
<b>Growth Commitment</b>	None	30% year on year - SharePoint Server 20% year on year - BizTalk Server and Visual Studio
<b>True Up</b>	Annually	End of three year term
<b>Payments</b>	Based on True Up	Fixed annual payments

# End of Enrolment Options

- ▶ Renew
- ▶ Buy-out baseline licences not covered with SA
- ▶ Revert to the original versions of baseline licences not covered with SA

# Current EAP: Processor Licences

## ▶ True-ups

- Continue to true-up on Processors as per the CPS, until the end of term

## ▶ End of Term Renewal

- Renew SA on the number of cores deployed at the end of term

## ▶ End of Term Deferred L Buyouts

- Buy-out with Processor buyout prices listed in the CPS

# Current EAP: Enterprise Server/CAL Licences

## ▶ True-ups

- Continue to true-up on Enterprise Server licences as per CPS until the end of term
- SQL 2012 Enterprise Server performance throttled at 20 cores per server

## ▶ End of Term Renewal

- Renew SA on existing Enterprise Server/CAL deployments at end of term; or,
- Convert Enterprise Server/CAL estate into Enterprise cores
- Note: True-ups for new term will be in Enterprise cores

## ▶ End of Term Deferred L Buyouts

- Buy-out deployed Enterprise Server/CAL licences with buyout prices listed in the CPS
