

Windows® Phone and Microsoft Office 365

Ready for business right out of the box!

Now more than ever businesses need to improve productivity, be more efficient with their time, and respond quickly to customers' needs to stay competitive. Connecting Windows Phone Mango to Microsoft Office 365 can help your company affordably improve communication and sharing of information or content, whether in the office or on the go.

Office 365 is an online service accessed through the PC, the mobile phone, or the browser that combines the familiar Microsoft Office desktop applications with communication and document sharing services from Microsoft: Exchange Online, Lync Online, and SharePoint Online. Office 365 is easy to use and administer, backed by the robust security and high reliability you expect from a world-class service provider.

Windows Phone is uniquely designed to bring together what you care about most. It is the only phone with Outlook Mobile and Office Mobile built in that works seamlessly with Office 365 email, instant messaging, and team sites. Experience Office 365 through these user-friendly mobile clients:

- Microsoft Outlook Mobile for email, calendar, contacts, and tasks
- Microsoft Office Mobile for viewing, editing, and commenting on Office documents
- Microsoft SharePoint Workspace Mobile for sharing documents on team sites

Windows Phone is the only phone with Outlook Mobile and Office Mobile that works seamlessly with Office 365 email, instant messaging, and team sites.

Stay organized and connected

Organize work, connect with people, and get things done faster with seamless email, instant messaging, and document sharing on Office 365.

- Experience the fastest setup to Office 365 on the Windows Phone
- Get things done faster with email, calendar, contacts, and tasks through Outlook Mobile
- Reach coworkers in real time with voice, instant messaging, SMS, or email
