ENVISION

Carter get Envision

Leading menswear fashion label Carter, already uses Envision...

“With eight people on the road and a monthly fuel bill of £4000 our main objective was to reduce this bill. After an introduction to Envision by one of their partners, our July fuel bill fell by over 22% to just £390 per person per month. With savings of this level, Envision has more than paid for itself for the next 12 months.”

“Additionally, Envision has brought unexpected but welcome benefits in the shape improved productivity from 3 calls to 3.25 calls per day and an increase in private mileage claims. We also believe that our people are now taking an even more responsible approach to driving.”

“Needless to say, with such positive effects and big benefits to our business, we recommend Envision.”

Graham Orrell – MD, Carter Menswear
