

Nokia 7610 Bluetooth Connections

You can use the Microsoft® Wireless Transceiver for Bluetooth® to transfer files, contacts, and other information between your Nokia 7610 mobile phone and your computer. For this to work correctly, you must first configure the computer and mobile phone to communicate with each other.

This document will help you configure your computer and your mobile phone to communicate over a Bluetooth connection, and step you through synchronizing your data.

These instructions assume that:

- You have already set up and configured your Microsoft Wireless Transceiver for Bluetooth on your computer.
- You have the PC Suite 6.1 CD-ROM, or you have downloaded the latest version of PC Suite from the Support area at <http://www.nokia.com>.
- You are running Microsoft Windows® XP with Service Pack 2 installed.

To configure your phone for Bluetooth connections

- 1 Press **Menu**, press **Connectivity**, and then press **Bluetooth**.
- 2 (Optional:) Enter a custom name for your phone, and then press **OK**.
- 3 Set **Bluetooth** to **On**.
- 4 Set **My phone's visibility** to **Shown to all**.
- 5 Press **Exit** to return to the previous screen.

To install PC Suite 6.1 and add your phone as a Bluetooth device

- 1 On your computer, start the PC Suite installation from the CD-ROM or by double-clicking the .exe file downloaded from the Web.
- 2 Follow the setup instructions to install PC Suite 6.1 on your computer.
- 3 On your computer, click **Start**, click **Control Panel**, click **Printers and other Hardware**, and then click **Bluetooth Devices**.
- 4 On the **Devices** tab, click **Add**.
- 5 Follow the instructions in the Add Bluetooth Device Wizard to install your mobile phone. When prompted, you will need to enter a passkey on your mobile phone to accept the connection from your computer.
- 6 Click **Start**, point to **All Programs**, point to **Nokia PC Suite**, and then click **Nokia PC Suite**.
- 7 Click **Synchronize** to open the **PC Sync** page.
- 8 Click **Properties** to modify your synchronization settings.
- 9 Click **Synchronize Now** to begin synchronization with your mobile phone.

To configure your Nokia 7610 as an authorized device

When your mobile phone is authorized as a paired device with your computer, you do not have to accept a Bluetooth connection request on your phone each time you use PC Suite. Take the following steps:

- 1 Press **Menu**, press **Connectivity**, and then press **Bluetooth**.
- 2 Navigate to the **Paired Devices** tab.
- 3 Select the name of your computer, press **Options**, and then press **Set as authorized**.
- 4 Press **Yes** to confirm settings.

Troubleshooting Tips
