Protect Yourself

► Protecting yourself on the Internet means managing or eliminating the nuisances, and then guarding against more serious concerns such as identity theft. Here's how:

- Practice Internet behavior that lowers your risk
- Manage your personal information carefully
- Use technology to reduce nuisances, and raise the alarm when appropriate

Protect Your Family

► Protecting your family on the Internet means understanding the risks, having clear guidance for healthy online behavior, talking openly, and using technology where it can help. Here's how:

- Talk with your kids about what they do online
- Keep personal information private
- Set clear rules for Internet use
- Use family safety software
