

Microsoft licensing agreements comparison

Microsoft offers commitment-based and transactional options for organizations that want to purchase Microsoft cloud services, on-premises software, and/or Software Assurance through Microsoft-assisted, partner value-added, or self-service web options. Compare the commercial Microsoft licensing agreements below or [compare licensing options for industries](#).

Microsoft Enterprise Agreement and **Microsoft Enterprise Subscription Agreement** are commitment-based Microsoft Volume Licensing agreements for commercial organizations signing a new enrollment with 500 or more users/devices and government organizations with 250 or more users/devices that want to license Microsoft cloud services and/or on-premises software organization-wide, over a three-year period, and at the best available pricing. Enterprise enrollments include the Enterprise Enrollment, Enterprise Subscription Enrollment, and Server and Cloud Enrollment (SCE). Software Assurance is included.

The **Microsoft Products and Services Agreement (MPSA)** is a transactional Microsoft Volume Licensing agreement for commercial, government, and academic organizations with 250 or more users/devices that want to license Microsoft cloud services and/or on-premises software as needed—with no organization-wide commitment and multi-year subscription options under a single, non-expiring agreement. Software Assurance is optional.

Microsoft Open License, **Microsoft Open Value**, and **Microsoft Open Value Subscription** are Microsoft Volume Licensing agreements for organizations with 5–499 users/devices that want to license Microsoft cloud services and/or on-premises software. Open License is a transactional agreement for commercial, government, academic, and charitable organizations; Software Assurance is optional. Open Value non-company-wide is a transactional agreement for commercial and government organizations; Software Assurance is included. Open Value company-wide and Open Value Subscription are commitment-based agreements for commercial and government organizations that want to license organization-wide over a one- or two-year period; Software Assurance is included.

The **Microsoft Cloud Agreement (MCA)** is a transactional licensing agreement for commercial and government organizations with one or more users/devices seeking to fully outsource management of their cloud services through a Cloud Solution Provider (CSP). CSPs offer an easy way to license the cloud services you need through the MCA in combination with the value-added services offered by your systems integrator, hosting partner, or born-in-the-cloud reseller partner. On-premises software and Software Assurance are not available through the MCA.

The **Microsoft Online Subscription Agreement (MOSA)** is a transactional licensing agreement for commercial, government, and academic organizations with one or more users/devices that want to subscribe to, activate, provision, and maintain cloud services seamlessly and directly via the web, through the Microsoft Online Subscription Program (MOSP). On-premises software and Software Assurance are not available through the MOSA.

Microsoft licensing agreements comparison

	Microsoft-assisted			Partner value-added	Self-service web
	Microsoft Enterprise agreements	Microsoft Products and Services Agreement	Microsoft Open agreements	Microsoft Cloud Agreement (through CSPs)	Microsoft Online Subscription Agreement
Offerings	Commitment-based cloud services and on-premises software	Transactional cloud services and on-premises software	Transactional (Open License and Open Value non-company-wide) or commitment-based (Open Value agreements) cloud services and on-premises software	Transactional cloud services only	Transactional cloud services only
