If you are a school or an instructor using Runtime Images as part of teaching a class in an academic or vocational-technical setting, the payment of tuition to the school or receipt of a salary by the instructor does not constitute financial consideration. All of the license rights in this section are only for non-commercial purposes and are subject to the Non-Commercial Demonstration and Distribution Requirements and Restrictions below.

- d. High Risk Activities.** The software is not fault-tolerant and is not designed, manufactured or intended for any use requiring fail-safe performance in which the failure of the software could lead to death, serious personal injury or severe physical and environmental damage (High Risk Activities), such as the operation of aircraft or nuclear facilities. You agree not to use, or license the use of, the software in connection with any High Risk Activities, and shall inform its end users in writing of the foregoing restriction.
 - e. Additional Functionality.** Microsoft may provide additional functionality for the software. Other license terms and fees may apply.
- 4. RUNTIME ASSESSMENT TOOL.** The Runtime Assessment Tool is provided for informational purposes only. For official license information pertaining to the Runtime, please consult your royalty bearing license agreement with Microsoft or the Microsoft affiliate serving your country.
- 5. SPEECH/HANDWRITING RECOGNITION.** If you include speech or handwriting recognition components in your Product, you should understand that speech and handwriting recognition are inherently statistical processes; that recognition errors are inherent in the processes; that it is your responsibility to provide for the handling of such errors and to monitor the recognition processes and correct any errors. Neither Microsoft nor its suppliers shall be liable for any damages arising out of errors in the speech and handwriting recognition processes.
- 6. INTERNET-BASED SERVICES.** Microsoft provides Internet-based services with the software. It may change or cancel them at any time.
- a. Consent for Internet-Based Services.** The software features described below connect to Microsoft or service provider computer systems over the Internet. In some cases, you will not receive a separate notice when they connect. You may switch off these features or not use them. For more information about these features, see the software documentation. By using these features, you consent to the transmission of this information. Microsoft does not use the information to identify or contact you.

Computer Information. The following features use Internet protocols, which send to the appropriate systems computer information, such as your Internet protocol address, the type of operating system, browser and name and version of the software you are using, and the language code of the device where you installed the software. Microsoft uses this information to make the Internet-based services available to you.

- Web Content Features. Features in the software can retrieve related content from Microsoft and provide it to you. To provide the content, these features send to Microsoft the type of operating system, name and version of the software you are using, type of browser and language code of the device where you installed the software. Examples of these features are start pages and online assistance. You may choose not to use these web content features.

- Digital Certificates. If you include the security features and digital certificates from the software in your Product, these digital certificates confirm the identity of users, including Internet users, sending X.509 standard encrypted information. The Product would retrieve certificates and update certificate revocation lists.
- Windows Media Digital Rights Management. Content owners use Windows Media digital rights management technology (WMDRM) to protect their intellectual property, including copyrights. If you include the DRM components in your Products and if you agree to the DRM Agreement, your Product would use WMDRM software to access WMDRM-protected content. If the WMDRM software fails to protect the content, content owners may ask Microsoft to revoke the software's ability to use WMDRM to play or copy protected content. Revocation does not affect unprotected content. When you download licenses for protected content, you agree that Microsoft may include a revocation list with the licenses. Content owners may require you to upgrade WMDRM to access their content. If you decline an upgrade, you will not be able to access content that requires the upgrade.
- Windows Media Player. If you include the Windows Media Player from the software in your Product, it checks with Microsoft for compatible online music services in your region
- Error Reports. If you include the error reporting feature from the software in your Product, this feature may send error reports to Microsoft that describes which software components had errors. No files or memory dumps will be sent unless you choose to send them. For more information about error reports, see the software documentation.

b. Misuse of Internet-based Services. You may not use these services in any way that could harm them or impair anyone else's use of them. You may not use the services to try to gain unauthorized access to any service, data, account or network by any means.

- 7. MICROSOFT .NET COMPACT FRAMEWORK BENCHMARK TESTING.** The software includes the .NET Compact Framework (.NET Component). You may conduct internal benchmark testing of the .NET Component. You may disclose the results of any benchmark test of the .NET Component, provided that you comply with the following terms: (1) you must disclose all the information necessary for replication of the tests, including complete and accurate details of your benchmark testing methodology, the test scripts/cases, tuning parameters applied, hardware and software platforms tested, the name and version number of any third party testing tool used to conduct the testing, and complete source code for the benchmark suite/harness that is developed by or for you and used to test both the .NET Component and the competing implementation(s); (2) you must disclose the date (s) that you conducted the benchmark tests, along with specific version information for all Microsoft software products tested, including the .NET Component; (3) your benchmark testing was performed using all performance tuning and best practice guidance set forth in the product documentation and/or on Microsoft's support web sites, and uses the latest updates, patches and fixes available for the .NET Component and the relevant Microsoft operating system; (4) it shall be sufficient if you make the disclosures provided for above at a publicly available location such as a website, so long as every public disclosure of the results of your benchmark test expressly identifies the public site containing all required disclosures; and (5) nothing in this provision shall be deemed to waive any other right that you may have to conduct benchmark testing. The foregoing obligations shall not apply to your disclosure of the results of any customized benchmark test of the .NET Component, whereby such disclosure is made under confidentiality in conjunction with a bid request by a prospective customer, such customer's application(s) are specifically tested and the results are only disclosed to such specific customer. Notwithstanding any other agreement you may have with Microsoft, if you disclose such benchmark test results, Microsoft shall have the right to disclose the results of benchmark tests it conducts of your products that compete with the .NET Component, provided it complies with the same conditions above.
- 8. FEEDBACK.** If you give feedback about the software to Microsoft, you give to Microsoft, without charge, the right to use, share and commercialize your feedback in any way and for any purpose. You also give to third parties, without charge, any patent rights needed for their products, technologies and services to use or interface with any specific parts of a Microsoft software or service that includes the feedback. You will not give feedback that is subject to a license that requires Microsoft to license its software or documentation to third parties because we include your feedback in them. These rights survive this

agreement.

9. SCOPE OF LICENSE. The software is licensed, not sold. This agreement only gives you some rights to use the software. Microsoft reserves all other rights. Unless applicable law gives you more rights despite this limitation, you may use the software only as expressly permitted in this agreement. 13. PROOF OF LICENSE. If you acquired the software on a disc or other media, a genuine Microsoft Proof of License label with a genuine copy of the software identifies licensed software. To be valid, this label must appear on Microsoft packaging. If you receive the label separately, it is invalid. You should keep the packaging that has the label on it to prove that you are licensed to use the software. To identify genuine Microsoft software, see <http://www.howtotell.com>.

14. EXPORT RESTRICTIONS. The software is subject to United States export laws and regulations. You must comply with all domestic and international export laws and regulations that apply to the software. These laws include restrictions on destinations, end users and end use. 17. APPLICABLE LAW.

- a. This limitation applies to

- anything related to the software, services, content (including code) on third party Internet sites, or third party programs; and
- claims for breach of contract, breach of warranty, guarantee or condition, strict liability, negligence, or other tort to the extent permitted by applicable law.

It also applies even if Microsoft knew or should have known about the possibility of the damages. The above limitation or exclusion may not apply to you because your country may not allow the exclusion or limitation of incidental, consequential or other damages.
