

# Microsoft FRx Professional

## Microsoft Dynamics™ SL

### Benefits

- Build custom reports**  
 Piece reports together using a “building block” approach that facilitates easy design and maintenance and helps ensure each report communicates the right information.
- Create presentation-quality reports**  
 Design presentation-quality reports by defining formatting and fonts directly in the report building blocks.
- Streamline administrative work**  
 Automated report processing and distribution capabilities help reduce the time employees spend on administrative work, freeing them to analyze information and make informed, strategic decisions.
- Simplify the report building process**  
 The spreadsheet look and feel allows anyone with appropriate access privileges to create customized reports quickly and easily—no programming degree required.
- Maintain reports seamlessly**  
 Tight integration with Microsoft Dynamics SL virtually eliminates error-prone, time-consuming processes for updating and maintaining reports.
- Enhance corporate communications**  
 Use multiple report formats and distribution techniques to help ensure the right financial information is being delivered to the right people.
- Reduce server usage**  
 Schedule reports to run at off-peak hours so generation and distribution of large reports have minimal impact on server resources.

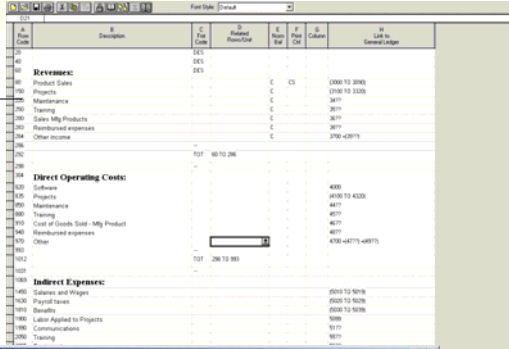

Master your financial reporting process with Microsoft Dynamics SL for Analytics– Microsoft FRx® Professional. High-performance capabilities give you comprehensive, highly customizable financial and management reports that are easy to create, distribute, and use.

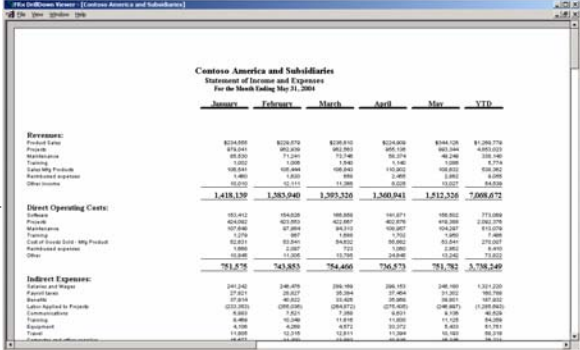

SOLOMON IV

**Create reports**  
using a “building block” approach that helps ensure each report is built to meet your specific needs.

**The Spreadsheet**  
*look and feel makes it easy for anyone with appropriate access privileges to create customized reports.*

Finished Microsoft FRx reports are presentation-quality, with drill-down capabilities that let you pinpoint detailed information.

## FEATURES

## BENEFITS

<b>Custom Report Design</b>	Use a “building block” approach to design reports, defining the rows and columns that will appear with a reporting tree that establishes the relationship between reporting units.
<b>Familiar Spreadsheet Interface</b>	Create financial statements easily by leveraging a familiar spreadsheet interface and tight integration with the Microsoft Dynamics SL account and database structure.
<b>Top-Level Report Analysis</b>	Achieve superior report analysis by consolidating information from multiple companies and data sources—including unposted transactions or base period referencing—or by creating custom report relationships.
<b>Sophisticated Calculations</b>	Implement mathematics and if/then logic to incorporate complex calculations into your reports.
<b>Report Relationship Customization</b>	Create new reporting relationships by changing the reporting structure, without affecting data entry processes or rearranging account segments in the general ledger.
<b>Bottom-Level Report Analysis</b>	Analyze information from summary all the way down to transaction details with the Microsoft FRx DrillDown Viewer™.
<b>Multiple Report Formats</b>	View reports on the screen and drill down into underlying data. Print reports for presentations, e-mail them for easy distribution, or export them to spreadsheets for additional analysis.
<b>Web-Based Reports</b>	Publish, store, and manage reports through your Intranet or Internet, yet maintain full drill-down and printing functionality.
<b>Custom Security Settings</b>	Set security by Reporting Tree level to ensure information is accessed by only those users that have the right permission settings.
<b>Automate Report Delivery and Production</b>	Use the Microsoft FRx Report Server to automate the production and distribution of reports in a scalable, high-speed reporting environment.
<b>XBRL Support</b>	Create and publish reports that are compliant with Extensible Business Reporting Language (XBRL).
