Kari Furse 12:51 PM
Hi Katie, Please complete the sales forecast numbers for Q4 in the Sales Analysis workbook.

Katie Jordan 12:47 PM
Absolutely! I'm on it.

Last message received on 4/11/2014 at 12:44 PM.

Use advanced features online

In addition to data entry, Excel Online allows for fairly advanced editing, such as drag-fill and format pasting.

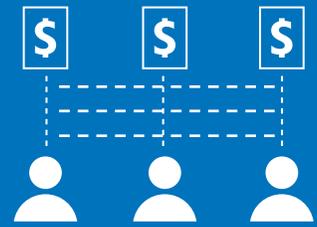

The screenshot shows the Excel Online interface with a 'Paste' menu open. The 'Paste Formatting' option is circled in red. A red arrow points from this option to a table of sales data. Another red arrow points from a highlighted row in the table to a zoomed-in view of that row below.

Suppose you have a workbook containing large amounts of data, which is stored as an embedded PowerPivot database inside an Office Open XML file.

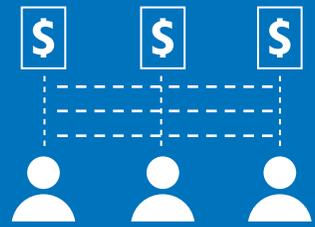

Reveal important relationships

In the Diagram View of PowerPivot for Excel, you can easily see the relationships among the different tables of data from that workbook, and you can easily add or delete relationships.

The image shows two windows from the PowerPivot for Excel application. The top window displays a data table with columns: GeographyType, Continent, City, State, Country, CountryID, AirportCode, and AirportID. The bottom window shows the Diagram View, which is a graphical representation of the data model. It features four tables: Geography, Customer, Online Sales, and Product. The Geography table is connected to the Customer table, which is connected to the Online Sales table. The Online Sales table is also connected to the Product table. The Date table is also visible, with DateKey, Year, Month, DayOfWeek, and MonthNum fields. A red circle highlights the 'Diagram View' button in the ribbon, with an arrow pointing to the diagram view window.

Dive into the details

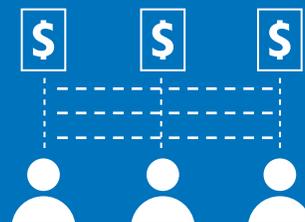

Create a PivotTable to help you summarize, visualize, and explore your data.

The screenshot illustrates the process of creating a PivotTable in Microsoft Excel. The 'Insert' ribbon is active, and the 'PivotTable' option is highlighted. A 'Create PivotTable' dialog box is open, showing 'New Worksheet' selected and the location set to 'Sales Analysis!\$AAS\$91'. The background shows a data model with tables: Geography, Customer, Online Sales, and Product. The 'Date' table is expanded to show fields like Datekey, Year, Month, DayOfWeek, and MonthNum. The 'Online Sales' table is expanded to show DateKey, ProductKey, CustomerKey, ShippingKey, and SalesQuantity. The 'Customer' table is expanded to show CustomerKey, FullName, MailingAddress, CustomerType, and DateFirstPurchase. The 'Product' table is expanded to show ProductKey, ProductName, Manufacturer, Brand, and Class.

Powerful data analysis brings self-service business intelligence to your desktop.

Pick your data

Drag fields from your workbook to the Values, Columns, and Rows areas on the PivotTable Fields List to get started building your PivotTable.

Row Labels	Sum of SalesAmount	Sum of SalesQuantity
A. Datum Corporation	\$25,473,097.81	83104
Adventure Works	\$39,032,781.40	96249
Contoso, Ltd	\$66,339,491.64	669301
Fabrikam, Inc.	\$60,944,526.14	126372
Litware, Inc.	\$31,011,232.26	83341
Northwind Traders	\$7,472,485.82	41191
Proseware, Inc.	\$25,524,933.47	105642
Southridge Video	\$14,634,453.31	90325
The Phone Company	\$14,607,257.56	104285
Wide World Importers	\$30,963,841.27	110244
Grand Total	\$316,004,100.69	1510054

PivotTable Fields

ACTIVE | ALL

Choose fields to add to report:

- Customer
- Date
- Geography
- Online Sales
 - DateKey
 - ProductKey
 - CustomerKey
 - ShippingKey
 - SalesQuantity
 - SalesAmount
 - TotalCost
 - GrossMargin
- Product

Drag fields between areas below:

FILTERS

COLUMNS
Σ Values

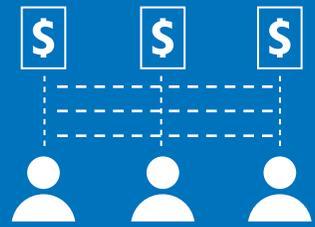

ROWS
Manufacturer

VALUES
Σ Values
Sum of SalesA...
Sum of Sales...

Defer Layout Update **UPDATE**

Excel allows you to choose what values your data will represent, such as the sum of items or a count. With minimal effort, you now have a basic PivotTable that includes fields from three different tables.

Filter data quickly

You can even perform sales analysis by filtering the data you need from a workbook.

Country

- Australia
- France
- Germany
- United Kingdom
- Canada
- United States
- (blank)
- Armenia

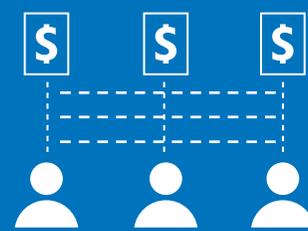

Sum of SalesAmount	Count of SalesQuantity
\$25,473,097.81	15984
\$39,032,781.40	7335
\$66,339,491.64	44476
\$60,944,526.14	11531
\$31,011,232.26	23276
\$7,472,485.82	8698
\$25,524,933.47	7210
\$14,634,453.31	7064
\$14,607,257.56	13957
\$30,963,841.27	15477
\$100,000,000.00	155008

Insert Slicers

- Geography
 - Geo Hierarchy
 - Continent
 - Country
 - State
 - City
 - More Fields
- Online Sales
 - CustomerKey
 - DateKey
 - ProductKey
 - SalesAmount
 - SalesQuantity
 - ShippingKey

Add a slicer to the report so you can analyze a sales report by Geography.

Filter data by date

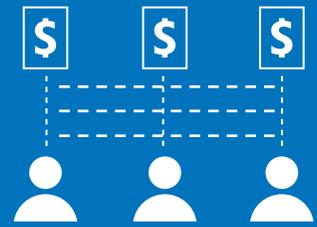

A timeline slicer allows you to filter a report by a date range.

The screenshot shows an Excel spreadsheet with a PivotTable. The PivotTable has 'Country' as the filter and 'Sum of SalesAmount' and 'Count of SalesQuantity' as values. A 'Date' slicer is overlaid on the PivotTable, showing a timeline for the year 2012 with months from March to October. The 'Insert Timelines' dialog box is open, showing a list of fields: 'Customer', 'DateFirstPurchase', 'Date', and 'Date'. The 'Date' field is selected with a checkmark. A red circle highlights the 'Date' field in the dialog box, and another red circle highlights the 'Slicer Timeline' icon in the PivotTable ribbon. Arrows point from these circles to the 'Date' field in the dialog box and the 'Date' slicer respectively.

Country	Row Labels	Sum of SalesAmount	Count of SalesQuantity
	A. Datum Corporation	\$11,195,724.89	6953
Australia	Adventure Works	\$21,860,364.58	3888
France	Contoso, Ltd	\$35,422,937.31	24088

Puyallup	\$10,686.55	20

You can cross drill from one field to another, and then drill down as far as you like.

A PivotTable allows you to drill into more granular data. As shown here, you can drill from region to country to state.

Parse your data

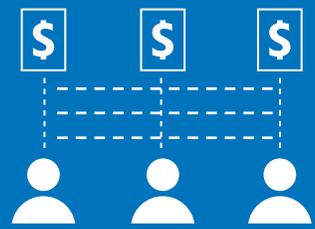

Excel can filter data in a variety of ways. Imagine you have a list of individual customer names, addresses, and the number of orders they've placed. And, you want to easily parse the address into separate columns.

Customers	Member Years	Full Address	City	State
Aaron Alexander	4	4461 Centennial Way, Newton, British Columbia, Canada	Newton

A PivotChart, based on a PivotTable, is ideal for visualizing large amounts of data, for example.

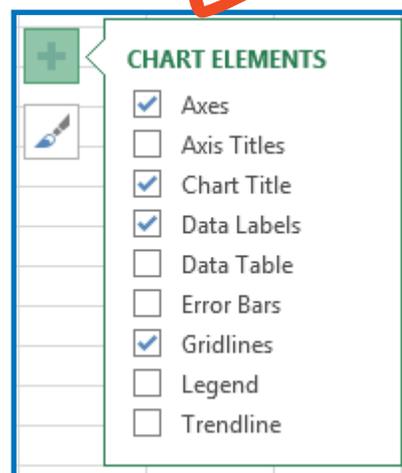

Format your chart

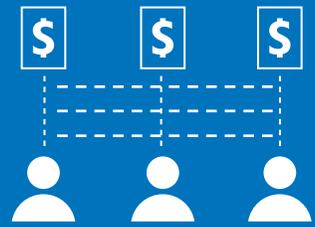

You can modify the format of the recommended chart with a set of predefined styles. You can even custom-define your own style.

The Chart Elements and Style buttons to the right of the chart give you different options for modifying your chart.

Customize your chart

You can customize your PivotChart with labels, a new chart style, and a green monochromatic color scheme.

CHART ELEMENTS

- Axes
- Axis Titles
- Chart Title
- Data Labels
- Data Table
- Error Bars
- Gridlines
- Legend
- Trendline

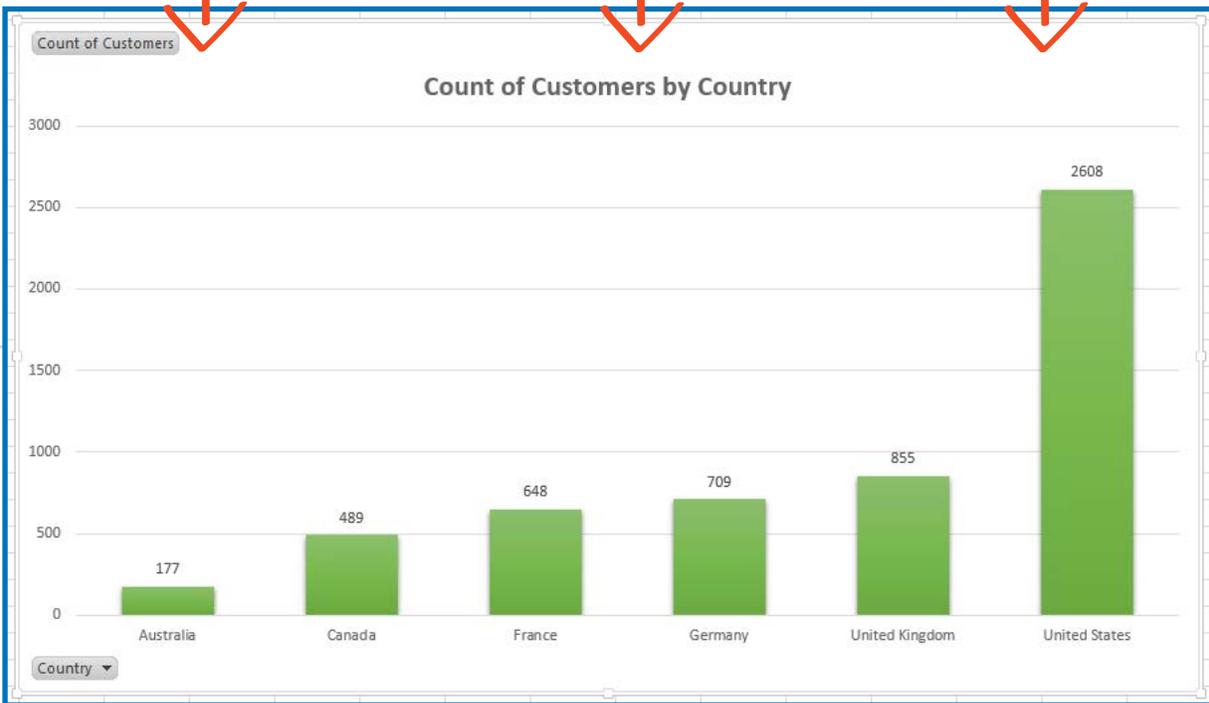

STYLE | COLOR

Monochromatic

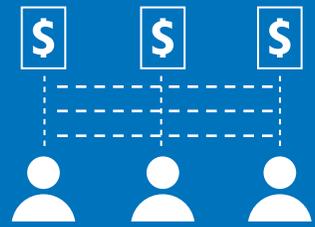

How do I change these colors?

STYLE | COLOR

How do I change these colors?

Export to other Office apps

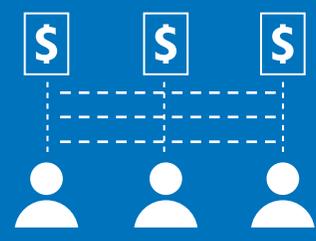

Exporting PivotTables and PivotCharts from Excel to another Office application, like PowerPoint, is as easy as copy and paste.

Count of Customers by Country

Country	Count
Australia	177
Canada	489
France	648
Germany	709
United Kingdom	855
United States	2608

In this example, we've opted for the copied PivotChart to maintain a link to the source. Any time the data in the source workbook changes, it will be reflected in the PowerPoint presentation.

Build a 3-D map

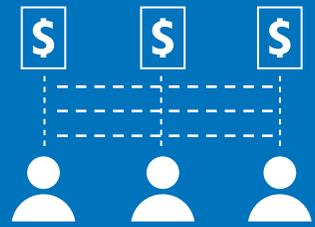

Power Map is a 3-D visualization add-in for Excel that lets you map, explore, and interact with geographical and temporal data.

Sales Forecast vs Budget Analysis

Country	Product Category	Q1 2014	Q2 2014	Q3 2014	Q4 2014	2014 Forecast	2014 Budget	Variance %	2013 Actual

Power Map enables you to discover and share new insights.

Choose your map data

Select geographical data from your spreadsheet that you want to visualize on a map.

The screenshot shows the Microsoft Power Map interface. The main window displays a 3D globe of North America with numerous blue data points scattered across the continent. A 'CHOOSE GEOGRAPHY' dialog box is open on the right side, allowing the user to select which geographical attributes to display. The dialog is circled in red. Below the dialog, there are dropdown menus for 'GEOGRAPHY AND MAP LEVEL' and a 'Next' button.

CHOOSE GEOGRAPHY

 - GrossMargin

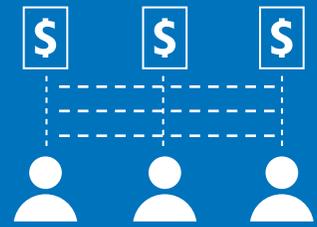

GEOGRAPHY AND MAP LEVEL

- Country Country/Region
- City City
- State State/Province

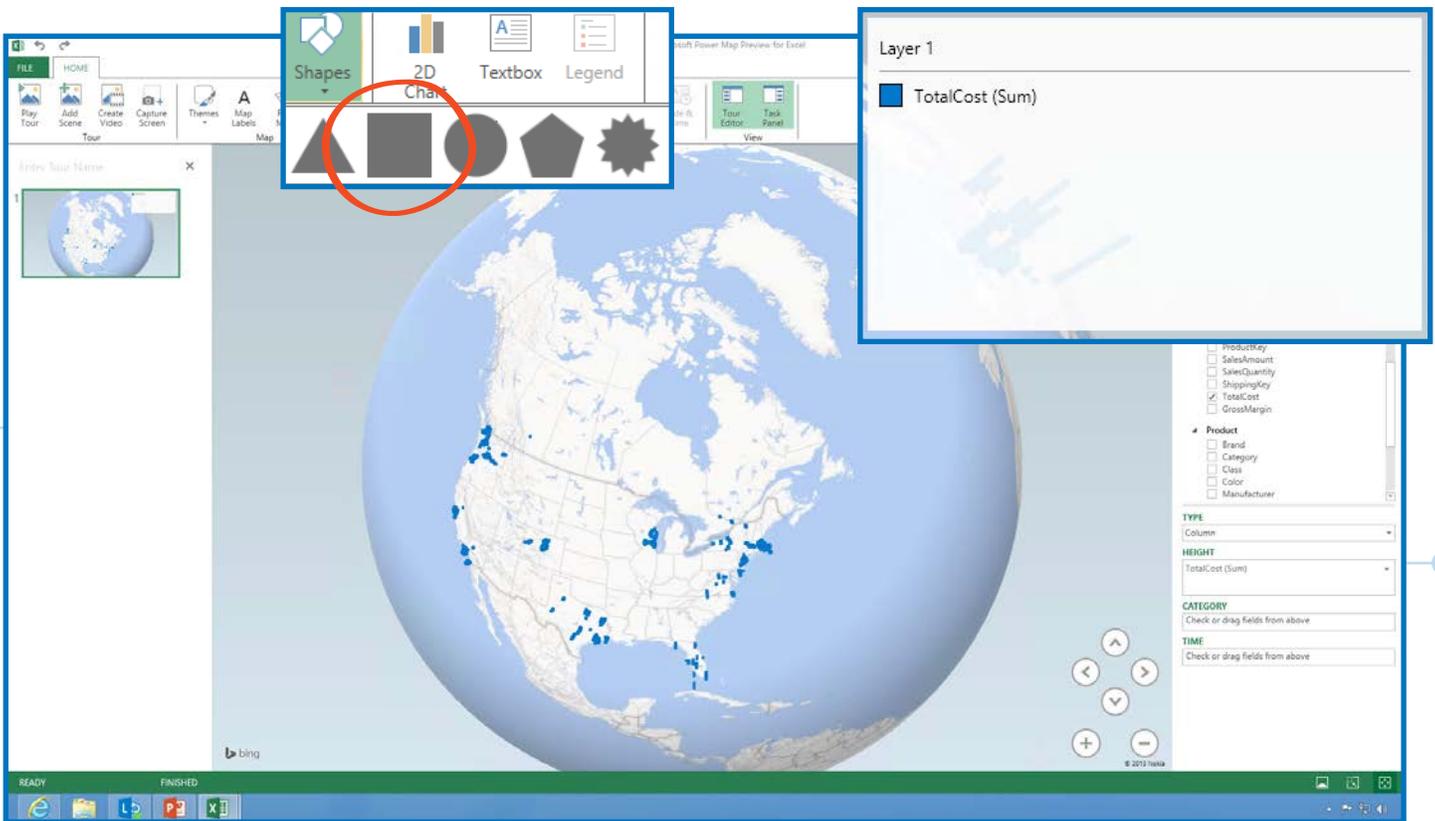

Next

Power Map automatically updates and displays the data from the spreadsheet in a visual form.

Shape up your data

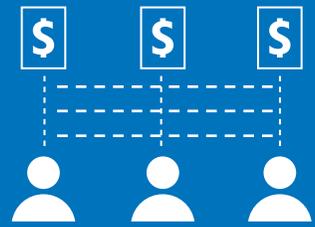

Power Map can graphically show correlations between columns of data using a variety of features.

Choose a shape, such as a square, to modify the appearance of your column data.

Create easy-to-consume data

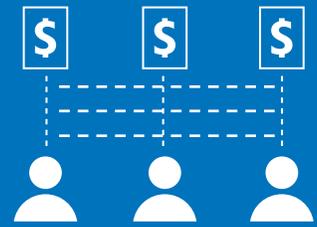

Use a heat map to make it easy for people to consume your data at a glance.

The screenshot displays the Microsoft Power Map interface. The main map shows a heat map of North America with data points. A legend titled "Gross Margin by City" is visible, showing a color scale for "GrossMargin (Sum)" ranging from blue (low) to red (high), with values ≤ 0.396912446791765 and ≥ 0.609409906625883 . A configuration panel on the right shows the "TYPE" set to "HeatMap" (circled in red), the "VALUE" field set to "GrossMargin", and the "TIME" field set to "Check or drag fields from above".

Just choose the Heat Map type.

Compare locations

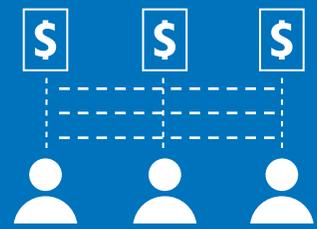

You can compare locations around the globe easily on a Power Map.

The screenshot displays the Microsoft Power Map interface. The main window shows a 3D globe with several data points plotted in Europe. A red circle highlights the 'Find Location' button in the top toolbar. A red arrow points from this button to a 'Find Location' dialog box that is open in the foreground. The dialog box contains a text input field with the word 'Europe' typed in, and a 'Find' button. Below the input field, there is an example: 'ex. 98110, Brooklyn, 3214 Maple St.' The background interface also shows a 'Gross Margin by City' legend and a right-hand pane with various data fields like 'Online Sales' and 'Product'.

Simply type in your desired location and click Find.

Make a scene

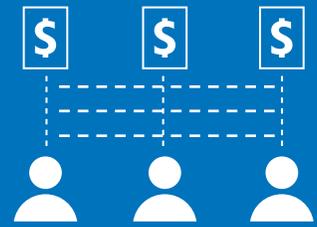

Create a guided interactive tour of your data by assembling screen captures of your data into scenes.

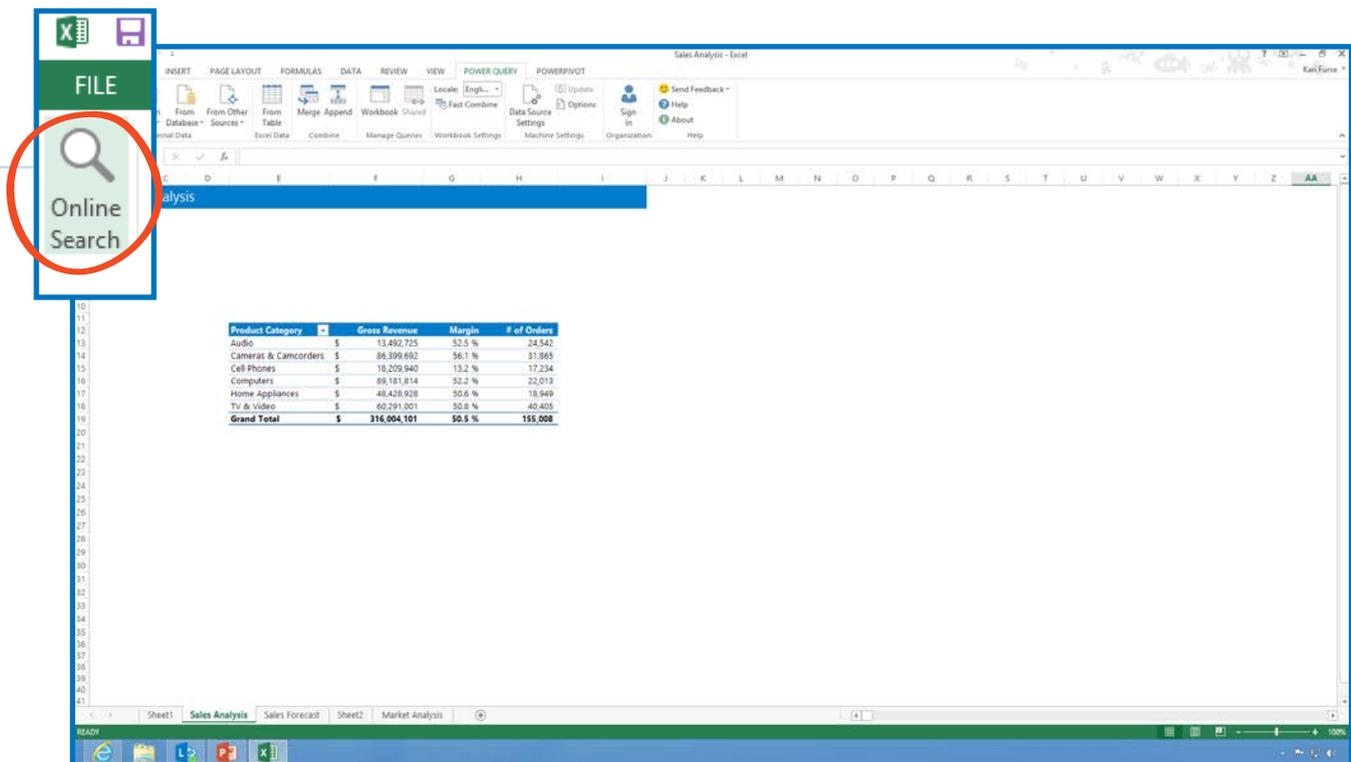

The image illustrates the workflow for creating a scene in Power BI. It shows the 'Add Scene' button in the ribbon, the 'SCENE OPTIONS' panel with settings for duration (6.00), name, transition (3.00), and effect (Fly Over), and a final scene view of a 3D globe with data points.

Add scenes to highlight meaningful insights from your data.

Build a Power Query

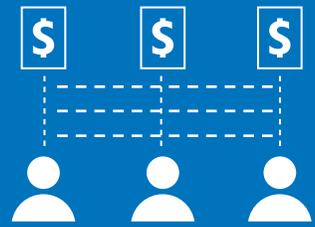

Power Query for Excel is an add-in that enhances the self-service business intelligence experience in Excel by simplifying data discovery and access.

Power Query lets you discover relevant data online and incorporate that data into an existing data model.

Conduct online research

Normally, this process takes a lot of time and effort, but Power Query makes it possible to execute a simple search and get relevant information in minutes.

Country/Territory	US\$/l (95 RON)	US\$/US gallon (95 RON)	Local units

Edit online research

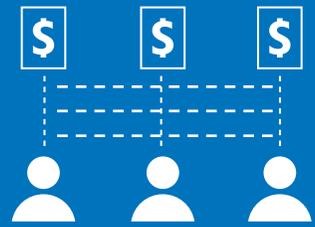

To edit data returned from your online search, right-click the query, and then click Edit from the drop-down menu.

The screenshot displays an Excel spreadsheet with a table of gasoline prices across various countries. The table has columns for Country/Territory, price in USD/L (95 RON), price in USD/15 gallon (95 RON), and Local units. A context menu is open over the table, with the 'Edit' option highlighted. Below the spreadsheet, the Query Editor window is open, showing the same data and the 'Query Settings' pane on the right.

Country/Territory	USD/L (95 RON)	USD/15 gallon (95 RON)	Local units
Albania	1.44	5.45	ALL165/L (€1.18) (RON 95) ALL160/L (€1.14) (Diesel)
Algeria	0.41	1.55	300dL/95 octane (rare down south) regular 230dL/ diesel DA14L/ or US50.2
Anguilla	1.45	5.49	EC517.79/imperial gallon (regular)
Antigua and Barbuda	0.84	3.18	EC59.95/imperial gallon (regular) EC510.95/imperial gallon (diesel)
Andorra	1.64	6.23	€1.142/L (95) €1.192/L (98) €1.032/L (diesel)
Angola		€0.37 per gallon	
Argentina	0.92	3.48	ARS 53.25/L (95) ARS 53.55/L (98) ARS 53.05/L (diesel)
Aruba	1.10	4.16	Fl. 1.93/L
Australia	1.36	5.15	AS1.31/L (RON 91)
Austria (Vienna)	1.95	7.35	€1.491/L (95) €1.493/L (98) €1.466/L (diesel) €0.991/kg (CNG-Methane)
Azerbaijan	1.00	3.79	AZN 0.70/L (A1-80, A1-92) AZN 0.80/L (A1-95) AZN 1.50/L (A1-98) AZN 0.60/L (L-82 Diesel)
Bahamas	1.24	4.69	US\$4.70/US gallon (reg)
Bahrain	0.27	1.02	BHD 0.100/L (95 RON) BHD 0.080/L (91 RON) BHD 0.120/L (Diesel)
Barbados	1.59	6.02	Bd\$51.17/L (reg) Bd\$2.79/L (diesel)

Belgium	2.23	8.44	€1.720/L (Eurosuper 95) €1.729/L (Super Plus 90) €1.538/L (Diesel) €0.713/L (LPG)
Belize	1.40	5.30	BZ\$10.18/US gallon (regular) BZ\$10.59/US gallon (premium) BZ\$10.24/US gallon (diesel)
Bermuda	1.80	6.83	BMD1.80/L (super) BMD1.60/L (Diesel)
Bolivia	0.54	2.04	B3.74/L (super) B3.72/L (diesel)
Bonane	1.34	5.07	USD 1.34/L (super) USD 0.914/L (diesel)
Bosnia and Herzegovina	1.66	6.28	KM2.25/L (95) KM2.30/L (diesel)
Brazil	1.35	5.11	R\$5.90/L
British Virgin Islands	1.32	5.00	US\$4.99/US gallon (reg)
Brunei	0.39	1.48	Br\$0.51/L
Bulgaria	1.72	6.51	BGN 2.57/L (95) BGN 2.73/L (98) BGN 2.62/L (diesel)
Burma	1.06	4.01	K3100/imperial gallon (regular) K3000/imperial gallon (diesel)
Cambodia	0.63	2.38	KHR2800/L
Canada	1.18	4.47	CS1.16/L
Cape Verde	1.40	5.30	Esc208.73/L (gasoline) Esc13.14/L (diesel)
Cayman Islands	1.03	3.90	KYD3.79/imperial gallon (regular) KYD3.5/imperial gallon (diesel)
Chile	1.36	5.15	CLP 592/L
China	1.06	4.01	RMB 6.46/L

The Query Editor window will open, displaying the returned data.

Narrow your search

It's easy to delete data you don't actually need. Simply select the columns you want to keep, right-click, and then choose Remove Other Columns.

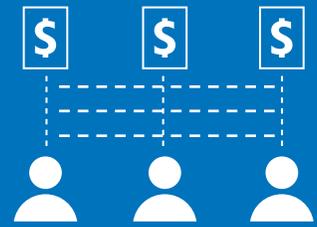

The first screenshot shows an Excel spreadsheet with a context menu open over a selected range of cells. The menu options are: Remove Columns, Remove Other Columns, Remove Duplicates, Remove Errors, Replace Values..., Fill Down, Change Type, Transform, Merge Columns, Group By..., Unpivot, and Move. The 'Remove Other Columns' option is circled in red, and a red arrow points from it to the second screenshot.

The second screenshot shows the same Excel spreadsheet after the 'Remove Other Columns' action. The table now only displays the 'Country/Territory' and 'US\$/US gallon (95 RON)' columns. The 'Query Settings' pane on the right shows the 'APPLIED STEPS' list, which includes 'RemovedOtherColumns' and 'ChangedType'.

Country/Territory	US\$/US gallon (95 RON)
1 Albania	5.45
2 Algeria	2.55
3 Anguilla	5.49
4 Antigua and Barbuda	3.19
5 Andorra	6.21
6 Angola	Error
7 Argentina	3.48
8 Aruba	4.16
9 Australia	5.15
10 Austria (Vienna)	7.38
11 Azerbaijan	3.79
12 Bahamas	4.69
13 Bahrain	1.02
14 Barbados	6.02
15 Belarus	4.1
16 Belgium	6.44
17 Belize	5.3
18 Bermuda	6.81
19 Bolivia	2.04
20 Bonaire	5.07
21 Bosnia and Herzegovina	6.28
22 Brazil	5.11
23 British Virgin Islands	5
24 Brunei	1.48
25 Bulgaria	6.51
26 Burma	4.01
27 Cambodia	2.38
28 Canada	4.47
29 Cape Verde	5.3
30 Cayman Islands	3.9
31 Chile	5.15

The resulting table displays only the information you want.
