

Hardware requirements for System Center Virtual Machine Manager 2008

This is a minimum, single machine configuration. Actual requirements and product functionality will vary based on your system configuration and the features you choose to install. For more details and the most up-to-date information, please refer to the documentation at www.microsoft.com/systemcenter/scvmm

- x64 architecture-based server with 2.8 GHz or faster processor clock speed and with hardware-assisted virtualization support enabled in the BIOS
- 2GB of RAM recommended
- 200GB of available hard-disk space
- DVD-ROM drive

Other Prerequisites and Dependencies:

- Microsoft Windows Server 2008® or later (must include Hyper-V)
- Microsoft .NET Framework 2.0 (included in installation)
- Microsoft .NET Framework 3.0 (included in installation)
- Microsoft SQL Server® 2005 Express Edition with Service Pack 2 (included in installation) or Microsoft SQL Server 2005 Standard or Enterprise Editions with Service Pack 2 (separate installation)
- Microsoft Windows PowerShell™ 1.0
- Microsoft Windows Remote Management (WinRM)
- Microsoft Internet Information Server 7.0 (needed for Self-Service Portal only)
