

# In a complex device landscape, you need choices.

Microsoft Intune gives you the flexibility and control to secure your data on any device—even those you don't manage.

Secure your data on **any** device with Intune

## Mobile Device Management (MDM)

- Enroll devices for management
- Provision settings, certs, profiles
- Report & measure device compliance
- Remove corporate data from devices

## Mobile Application Management (MAM)

- Publish mobile apps to users
- Configure and update apps
- Report app inventory & usage
- Secure & remove corporate data within mobile apps

 Conditional Access: Restrict access to managed & compliant devices

 Conditional Access: Restrict which apps can be used to access email or files
