Microsoft R Server

Microsoft

ANALYZE DATA WHERE IT LIVES

INNOVATE USING AI

BUILD MISSION-CRITICAL APPS FASTER

Customers continually demand more personalized experiences

$1.2T
By 2020, businesses using AI, big data, and IoT for insight will take $1.2T annually from their peers[1]

Microsoft R Server is a multi-platform analytics offering that combines the best of open source and Microsoft innovation for more effective predictions and faster time to insight
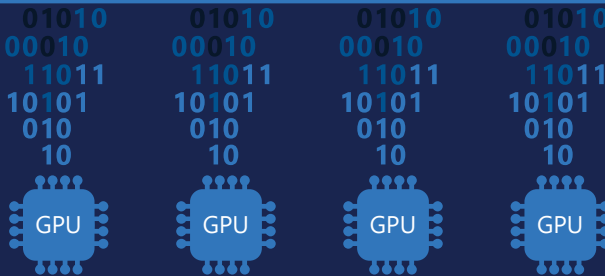

Open source innovation   **+**   Microsoft innovation

Go beyond traditional statistical analysis with advanced machine learning and GPU-powered deep neural networks for better insights
