Windows 10 Enterprise Proof of Concept

Microsoft Services

It's not too soon to get started.

Gartner estimates that Nearly 25% of PC's in organizations were still running Windows XP after support ended.

Plan Now to avoid Windows XP déjà vu with Windows 7"
http://www.gartner.com/newsroom/id/2821217

Windows 10 designed for people of action.

Microsoft is working hard to make sure Windows 10 is the most productive operating system we have built to help employees get their projects done in less time.

Having a great operating system is only half the equation. With Windows 10 and Office, Microsoft enables a rich ecosystem of devices to empower employees to use the right device at the right time to make things happen in your organization.

Now is the best time for your enterprise to start evaluating the product's in a lab environment as part of the **Windows 10 Enterprise Proof of Concept (PoC)**. We have technical experts ready to help you assess Windows 10 and Office through a series of briefing, demonstrations and lab exercises conducted during the PoC. The lab will remain with you after the PoC for additional evaluation and updates as new builds become available.

Microsoft has built Windows 10 to be an easy upgrade from Windows 7, but also to enable easy upgrades to future releases as Windows becomes a service that just gets richer over time. As part of the PoC we'll review the new in-place upgrade option, and discuss traditional deployment options to help you evaluate the best approach for your organization.

Windows 10 and Office.

Do great things.

Windows 10

Designed for the way you live and work

Easy for Windows 7 users; familiar user experience. Windows 10 respects the connection users have with their devices and their desire for a familiar experience carefully tailored to the screen they're on.

Protection against modern security threats

Windows 10 provides: identity, threat and malware protection features built-in; protection that follows data wherever it resides; two-factor authentication that's easy to deploy, manage and simple to adopt.

Managed for continuous innovation

In-place upgrade and more that can reduce device wipe-and-reload. Windows as A Service keeps your devices secure and up to date with latest technology, while supporting mission critical systems.

Windows 10 Enterprise Proof of Concept scope

The Windows 10 Enterprise PoC begins with a briefing of key Windows 10 and Office capabilities, changes in deployment options and security innovations. This will be followed by a series of technical topics briefs with hands on lab activities to test capabilities.

Day 1	Day 2	Day 3	Day 4	Day 5
- Overview - Windows 10 UI - Windows + O365 - Internet Explorer - Image Creation - In-Place Upgrade lab	- Deployment - Lab set up - Windows 10 Management - Identity and Security - Hands on labs and demos	- Windows as a Service - Lab set up time - Image Creation lab - Hands on labs and demos	- Platform Delivery Labs - Office client - Hands on labs and demos	Establish a vision for Windows 10 and Office based on the outcomes of the PoC. Assessment of your current environment, and roadmap of get ready activities you can start now to prepare your infrastructure

1-week

Available for future builds
