

Coasters

Step 1: Select File > Print. Load cardstock into the printer, following your printer's directions. Print the coasters.

Step 2: Cut out the coasters.

Step 3: Glue each coaster to a piece of cork backing using craft glue.

Step 4: Let the coasters dry, then spray each coaster with a paper protectant (such as Krylon's Preserve It! product).

TIP

Laminate your coasters to protect them from spills. Instead of gluing the paper to the cork, laminate your coasters at a nearby office supply store. Or do it yourself by purchasing self-laminating sheets or adhesive vinyl. Cover both sides of the coaster, then trim the vinyl a few millimetres from the edge of the coaster.
