

Student Ambassador

Recognizing Student Achievement

At Microsoft, we believe that technology alone cannot prepare students to be college and career ready. Technology is an accelerator, but alone it does not enable change. We believe in the power of student voice, and inspiring them to steer their own educational journey to set themselves up for success.

The Microsoft high school Student Ambassador initiative recognizes the achievements of student leaders from Showcase Schools. We want to offer them additional leadership opportunities and skills, and work with them to drive innovation and support integration of technology in their classrooms and throughout their schools (their student peers, educators and staff). We see these students as the shining example of what a partnership between Microsoft and a school can achieve and offer students: a place to develop and a bright future.

Student Ambassadors are nominated by their school to serve as student leaders. This initiative recognizes and celebrates students that have taken a leadership role among their peers and are passionate to drive student-led projects (be they technology related or other). These students will take part in a global community of student leaders from across Showcase Schools, collaborating and sharing best practices. This group will receive access to exclusive Microsoft products, professionals, and opportunities such as attending global conferences. These students will work closely with the MIE Experts from their school and with Microsoft to lead innovation in education and student voice and engagement among their peers.

Opportunities

When students become Student Ambassadors, they receive:

- Mentors
- Recognition
- Leadership opportunities
- Global student collaboration & cross cultural community
- Local, regional, and global event conference opportunities
- Complimentary certifications and chances for other prizes
- Monthly community calls and exclusive Yammer group
- Product and program feedback through focus groups and other opportunities
- Receive publicity and promotion via social media and other Microsoft channels
- Share their experience with local and world-renowned educators, specialists and Microsoft executives to increase their impact

Apply now

Students must be nominated by their school for the program. For more information contact your local Microsoft representative.

Accepting nominations between June 26 and August 15, 2015.

Who is a Student Ambassador?

We are looking for motivated self-driven student leaders who are fluent in English and currently in secondary school (usually ages 13-19 and in grades 9-12 depending on the country). These students are passionate about technology, enjoy Microsoft devices and services, and want to engage their peers in projects they care about. They have a true collaborative spirit, are resourceful and entrepreneurial, they relish the role of change agent, and work to make an impact.
