## Exchange Server Protocols Introduction

[http://msdn2.microsoft.com/en-us/library/cc307725\(EXCHG.80\).aspx](http://msdn2.microsoft.com/en-us/library/cc307725(EXCHG.80).aspx)

Microsoft makes available technical documents and other information about protocols, file formats, standards, and languages for a number of its most popular products, including various versions of Windows and Windows Server, Microsoft SQL Server, Microsoft Office, Microsoft Exchange Server, and Microsoft Office SharePoint Server. These technical documents enable and encourage a vibrant development community, resulting in smarter, interoperable products.

## Important notes about the documentation

- **"Copy Code" button does not currently work in Firefox.**

It is a known issue that the "Copy Code" button that appears on code samples in an Open Specifications document does not copy code to the clipboard when the technical document is viewed by using the Firefox Web browser. Instead of using the button, select the code and copy it.

- **Download all Open Specifications documents to the same directory to retain links.**

If you use the PDF versions of the Open Specifications documents, be sure to download all of the documents to the same directory. Hyperlinks between technical documents require the documents to be in the same directory to work. Note that if you download additional Open Specifications documents from Microsoft, they should also be stored in the same directory to enable linking.

- **Adobe Reader 10.0 provides best readability for the technical documents.**

For optimal readability, we recommend opening and viewing the Open Specifications documents by using Adobe Reader 10.0. Earlier versions of Adobe Reader might not provide the same reading quality.

- **Technical documentation links don't resolve in Adobe Reader 9.**

This is a change introduced by Adobe, which has altered the default setting for view mode in Adobe Reader 9. To use links in the technical documents, change your View Mode setting by doing the following:

1. In Adobe Reader 9, click **Preferences** on the **Edit** menu.
2. In the **Categories** list, click **Documents**.

3. Under **PDF/A View Mode**, change the selection from **Only for PDF/A documents** to **Never**, and then click **OK**.

- Additional details on changing the setting can be located on the Adobe help site:
