

STUDENT ACTIVITY 3.1: UNDERSTANDING ACCOUNTS AND GROUPS

MTA Course: 98-365 Windows Server® Administration Fundamentals

Topic: Understand accounts and groups

(One 50-minute class period)

File name: WinServerFund_SA_3.1

Lesson Objective

3.1: Understand accounts and groups. *This objective may include but is not limited to:* domain accounts; local accounts; user profiles; group types; group scopes; group nesting.

Resources, software, and additional files needed for this lesson

- Access to Windows Server 2008® R2

Directions to the student

Answer the following questions on a separate sheet of paper. You may use Windows® Server 2008 R2 as a resource.

Content

1. List the two default system accounts found on Windows Server 2008 R2.
2. Walter Harp is a Help Desk Technician. His tasks include administering domain printers. What local group should he be a member of?
3. What rights would a member of the guest group have?
4. What is the default group that all newly created users are a member of?
5. What is the status of the guest account?
6. Why is it important to leave a newly created account disabled?
