

## Microsoft Visual Studio 2008 Professional Edition with MSDN Embedded

MSDN® subscriptions are the foremost service for professional developers and software development teams, providing priority access to the latest Microsoft® technologies, extensive technical information, managed support, and exclusive benefits.

For device developers, **Visual Studio® 2008 Professional Edition with MSDN® Embedded** will provide access to the Windows Embedded family of products, the Visual Studio development environment, and a variety of benefits enabling device makers to easily build smart, connected, service-oriented devices. Visual Studio 2008 Professional with MSDN Embedded will include:

- Windows Embedded CE
- Windows Embedded Standard
- Windows Embedded NavReady™
- Windows Embedded POSReady

### Developer tools and software

MSDN subscriptions are sold alongside Visual Studio 2008. MSDN subscriptions also include the rights to future editions, and give priority access to pre-release versions. MSDN Embedded offers a complete, integrated development environment for the embedded developer.

MSDN subscriptions provide access to Microsoft software for use in the design, development, testing or demonstration of your embedded device. In order

to take a device developed under this subscription to market, the appropriate licenses are required—contact a Microsoft Authorized Windows Embedded Distributor for more information.

### The MSDN Developer Center

The MSDN Developer Center is a comprehensive resource comprising articles relating to software development. The MSDN Developer Center includes the following:

- Product documentation, whitepapers and reference guides.
- Sample code and many downloads.
- MSDN Community content, MSDN Magazine articles and guidance from MSDN.com.

### World-class support

MSDN Professional Subscriptions include:

- Two no-charge Professional Support incidents\* per subscription term, for use specifically targeted at development scenarios.
- MSDN Subscribers can post questions to 100+ Newsgroups and receive a response from Microsoft.
- Access to live MSDN Online Concierge chat. Online Concierge offers subscribers a personal guide to the world of resources on MSDN.com.

- MSDN Customer Services offers subscribers personal support with their MSDN Subscriptions.

### Community resources

MSDN offers a range of free learning resources for Developers:

- **Webcasts**—MSDN Webcasts offer deep, how-to technical information presented by knowledgeable Microsoft subject matter experts in an interactive environment
- **Virtual Labs**—MSDN Virtual Labs allow you to quickly learn how to build great applications, through guided hands-on labs.
- **Courses**—MSDN can help you find instructor-led, self-paced, and online training options.

Windows Embedded Official Training Partners offer a variety of specific courses to reduce ramp-up time and increase expertise, both e-learning and lecture/lab.
