Simplify access to on-premises resources. Stay in control.

Make your apps, email and files easier to access

Deploy VPN, Wi-Fi, and email profiles and certificates

Use single sign-on (SSO) for mobile, SaaS, and on-premises apps

Integrate with major VPN providers

salesforce

box

Cloud Apps
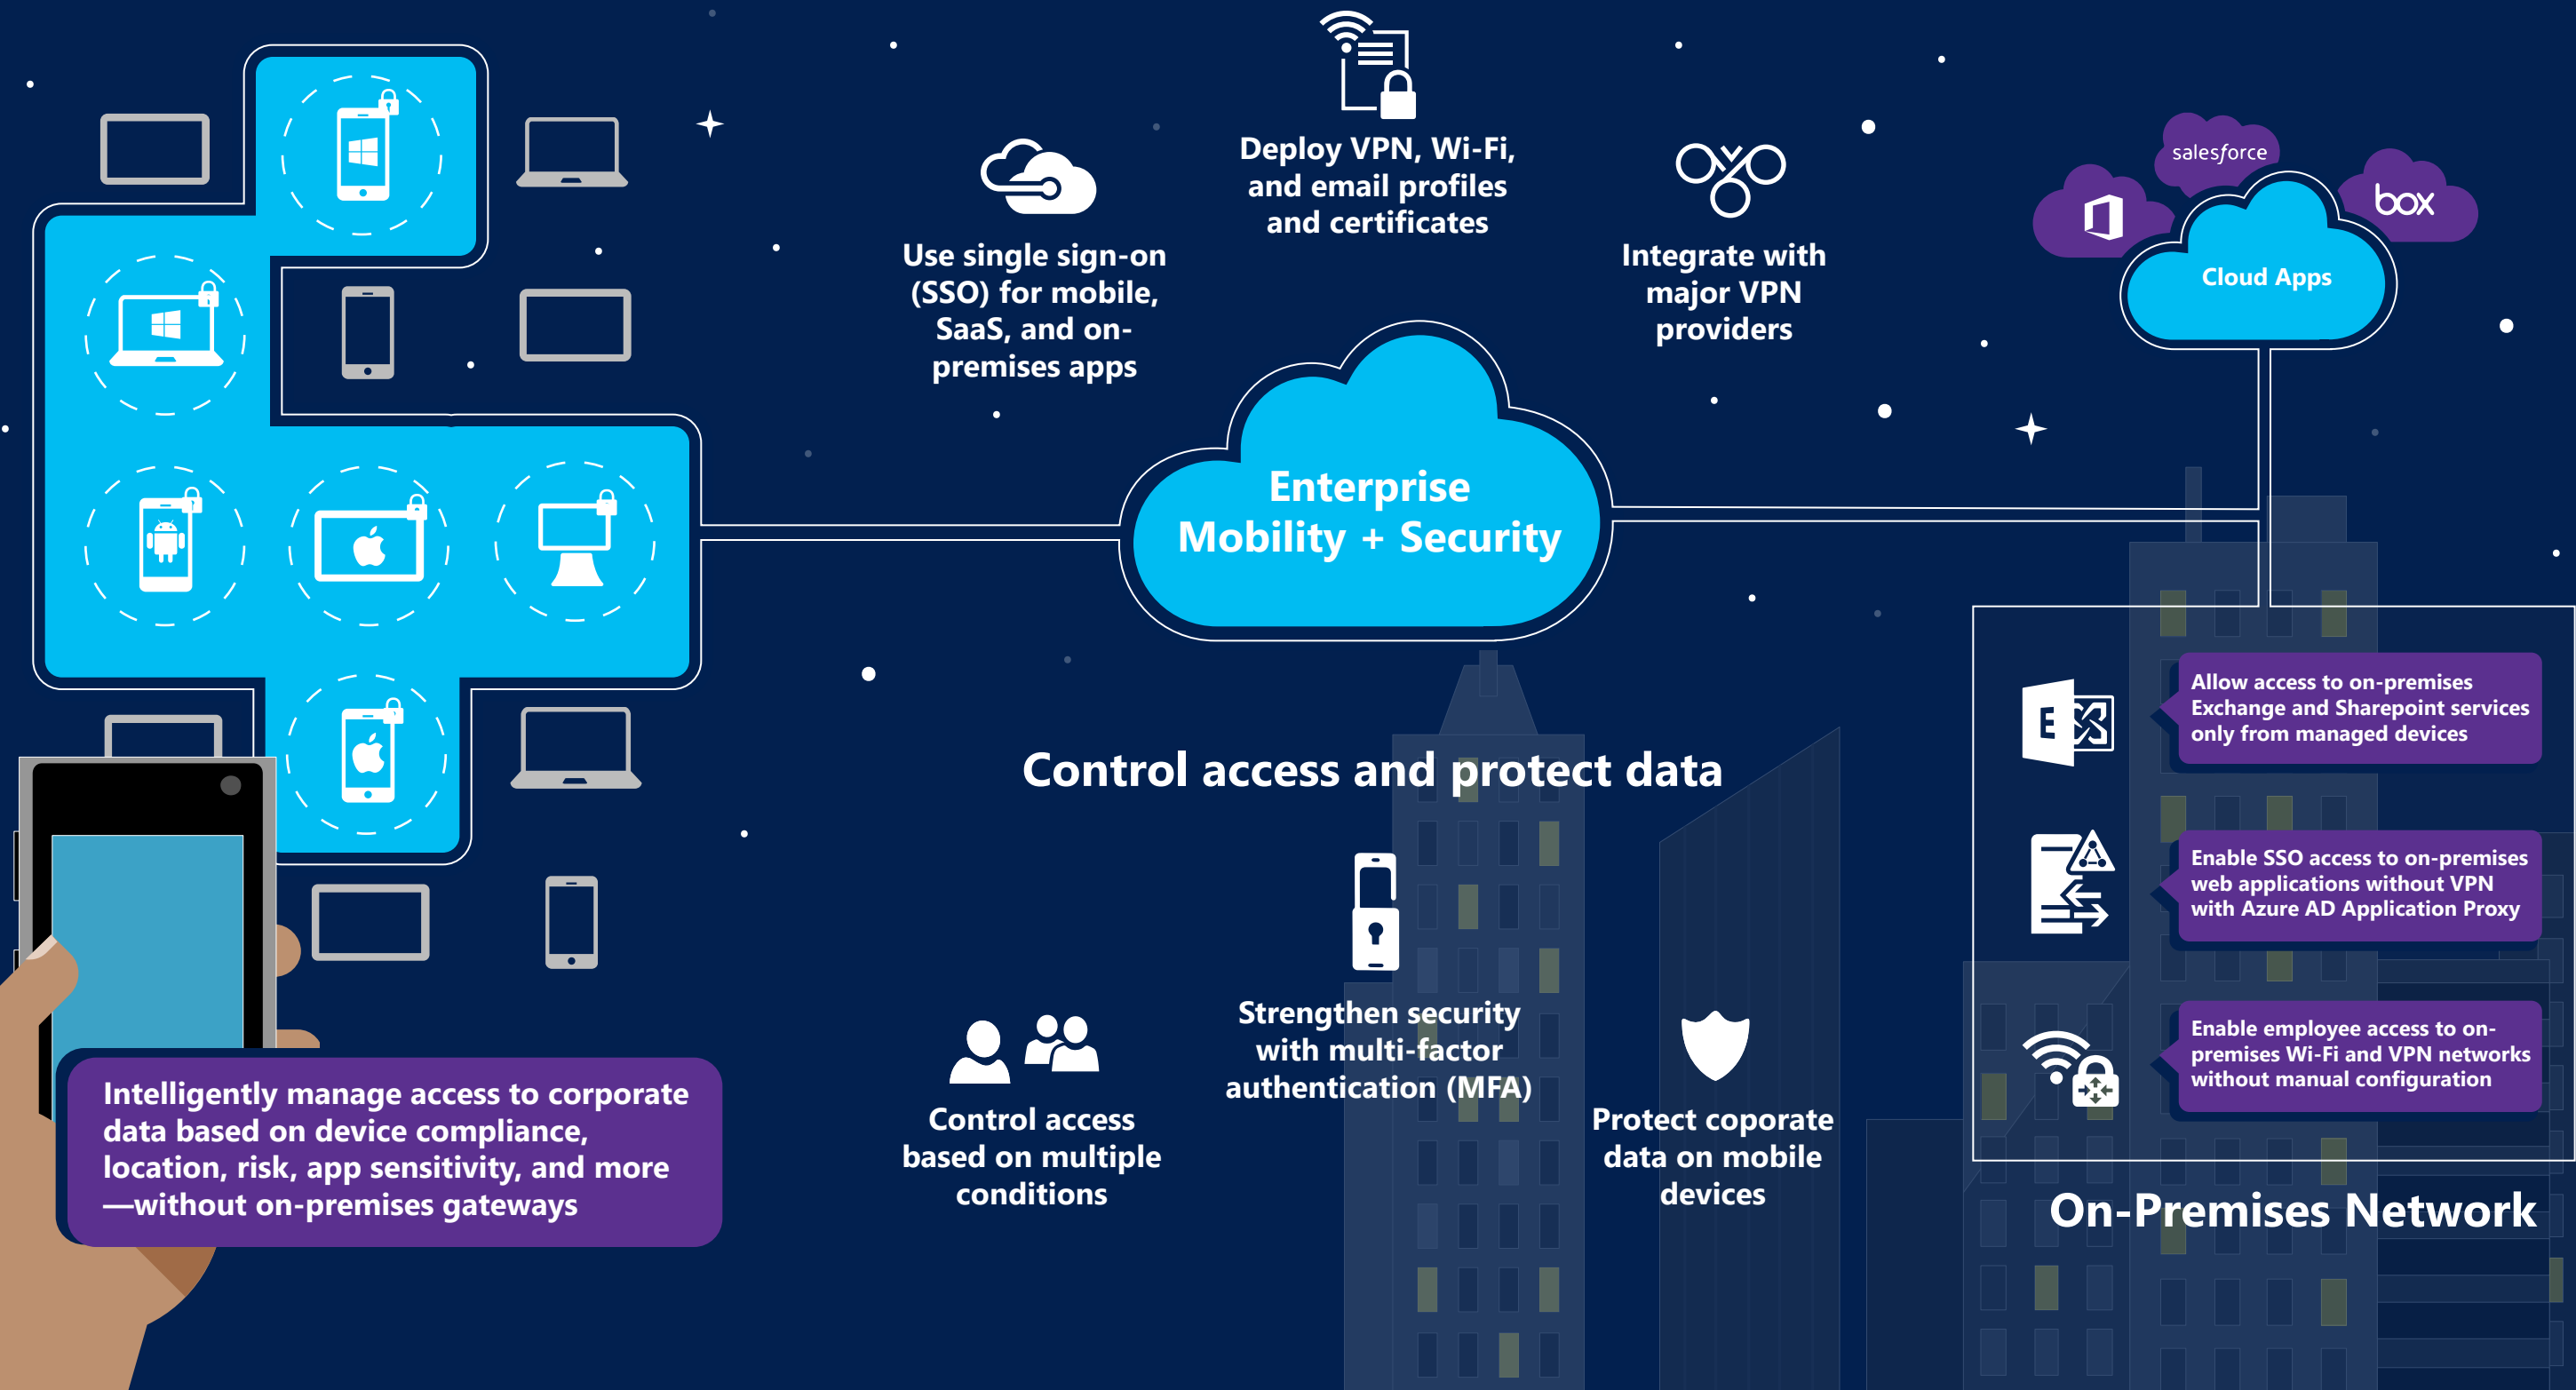

Enterprise Mobility + Security

Intelligently manage access to corporate data based on device compliance, location, risk, app sensitivity, and more —without on-premises gateways

Control access and protect data

Control access based on multiple conditions

Strengthen security with multi-factor authentication (MFA)

Protect coporate data on mobile devices

Allow access to on-premises Exchange and Sharepoint services only from managed devices

Enable SSO access to on-premises web applications without VPN with Azure AD Application Proxy

Enable employee access to on-premises Wi-Fi and VPN networks without manual configuration

On-Premises Network
