

Dr. Riosuke Nemoto, the hospital's Vice Director, was on the lookout for an BI solution to make EMR information more accessible

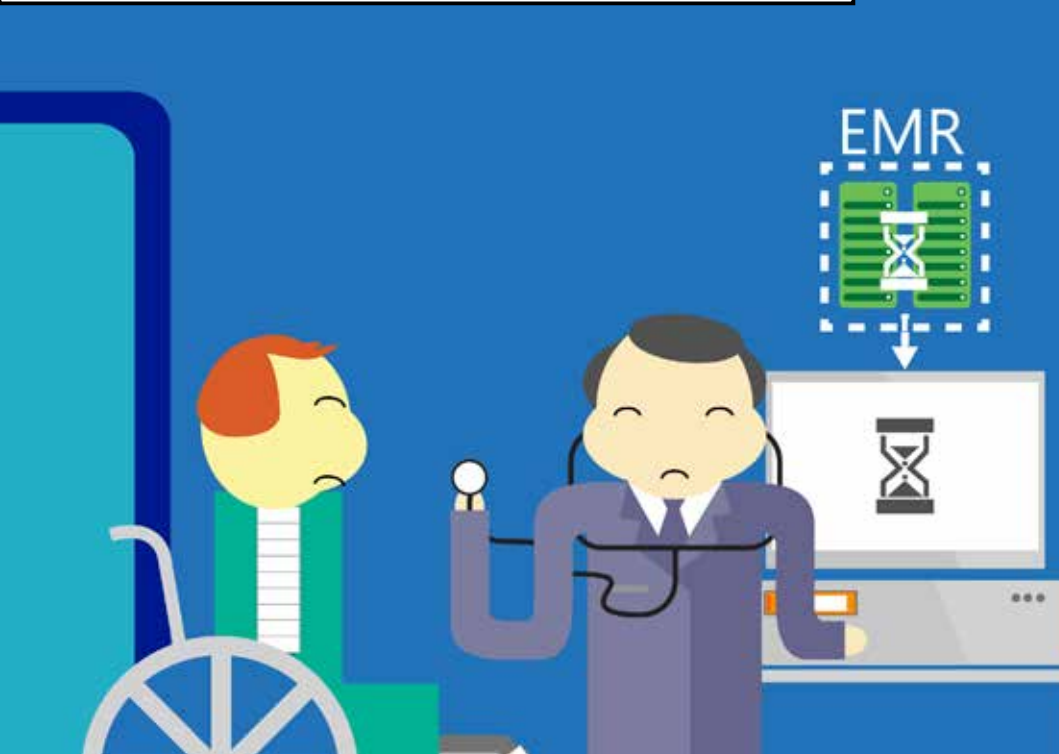

At the hospital, workstations used to update the Electronic Medical Records (EMR) had limited access

With up to 8 medical teams needing to coordinate EMR information for patient care, this caused delays for staff..

...and delayed information for patient care leading to longer treatment times

Dr. Nemoto saw that a Business Intelligence (BI) solution using Microsoft technology was the answer

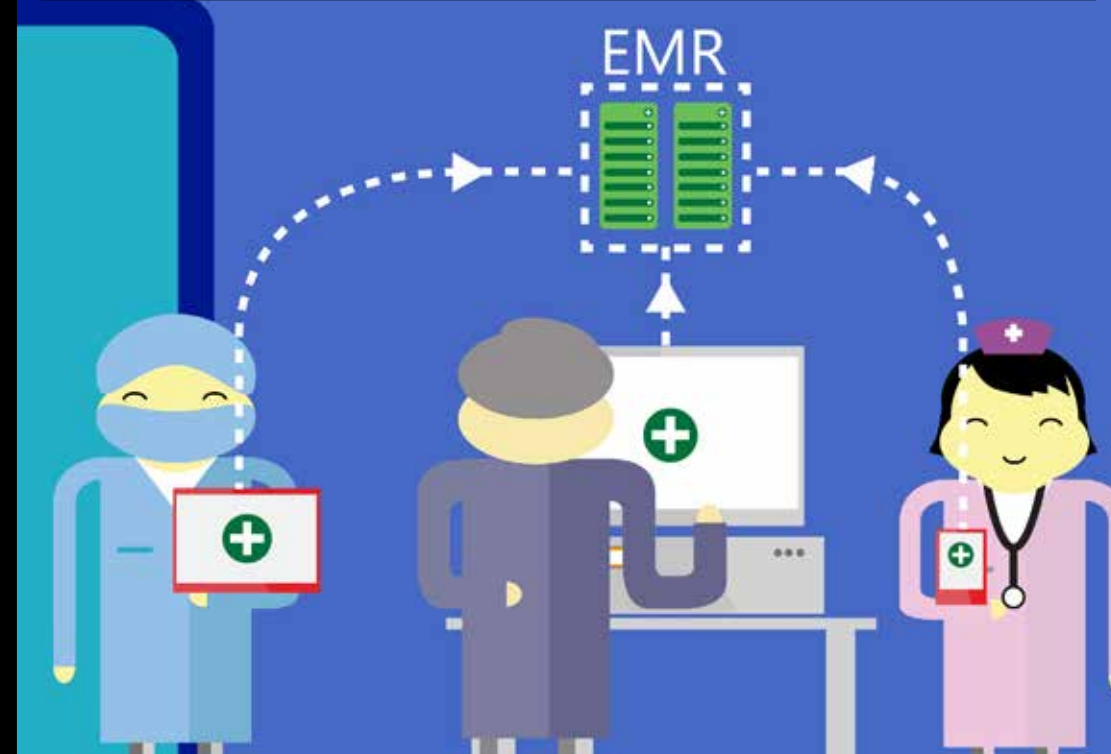

BI SOLUTION

- ✓ Real-time Access
- ✓ Multiple Users
- ✓ Multi-Device
- ✓ Flexible / Scalable
- ✓ Reduces Email

SharePoint Microsoft SQL Server

ALPHATEC SOLUTIONS アルファテック・ソリューションズ株式会社

Now over 700 clinicians have better, faster access to EMR's, boosting productivity..

...and patients are receiving their treatments more quickly

The hospital is looking forward to a bright future, and looking for more ways to harness the power of BI and analytics
