

Migrate to SQL Server – the most trusted database

Follow the leader and migrate from Oracle to SQL Server with free training and subsidized deployment services

Migrate your application databases to SQL Server, the leading data solution.

There is no equal – SQL Server delivers built in mission critical OLTP, high performance in-memory data warehousing, end-to-end mobile BI, and in-database advanced analytics with security features to protect your data at rest and in motion.

Low total cost of ownership¹

#1 TPC-E OLTP price/performance²

Least vulnerable 7 years in a row³

Migration offer: It's easier than ever to switch

Simplified migration tools, free training for Oracle DBAs, and starter deployment services help you break free of your current platform. Enjoy flexible deployment options for your applications on-premises or optimize costs and adopt the cloud with Azure, the most trusted cloud in the industry.

Migrate your competitive database to SQL Server to receive:

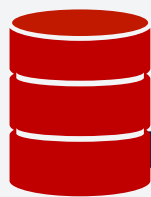

Free training – SQL Server Essentials for the Oracle Database Administrator¹

Subsidized deployment services to kick-start migration

¹ Available through June 30, 2017

Oracle

SQL Server

Act now – deployment services are only included through June 30, 2017

1 Engage with Microsoft account executive to claim your offer

2 Identify application workloads to migrate

3 Receive a services package to kick-start your migration
