

# Microsoft® education products for our school

As an educator, I appreciate products that would help our students interact, collaborate, and better visualize difficult concepts. These Microsoft education products do just that and would be an excellent addition to our school:

- **Microsoft Student with Encarta® Premium 2009**—offers students assistance with math, science, social studies, foreign language learning, research, and more.
- **Microsoft Math**—provides students with tools to better visualize and tackle difficult math and science problems.
- **Microsoft Encarta® Premium 2009**—multimedia encyclopedia includes thousands of up-to-date articles and rich multimedia content to make research fun and interactive.

With special volume licensing options, we can add these products to our school easily and at discounted pricing.

## How to add Microsoft education products to our school

- Step one:** Microsoft offers a variety of volume licensing options for educational institutions.  
[Determine which license best fits our school >](#)
- Step two:** Acquire the license by contacting an authorized education reseller (AER).  
[Find an AER now >](#)
- Step three:** After acquiring the appropriate license, deploy it. Detailed information and resources are available to assist the school's IT staff. [Learn more >](#)

Adding Microsoft Student with Encarta® Premium 2009, Microsoft Math, and Microsoft Encarta® Premium 2009 to my classroom would greatly benefit my students. I urge you to please consider purchasing a license for these products.
