

The cloud is the beginning

Do you remember how your company looked only 5 years ago? You most likely do, if you stop and think for a second, you'd find it pretty impossible to manage your company with the technologies of that time. Cloud information virtualization is changing not only business, but also everything. We move in a digital world with an endless potential, where that source of virtualized data could become the beginning of great opportunities and new paths.

Culture of data for everyone

Satya Nadella, Microsoft CEO, highlights the opportunity arising from this digitalized world, of joining all the data from different sources and turning it into fuel for new smart environments. [Learn more.](#)

Mobile first or cloud first?

Both. It's almost impossible to think about cloud and mobility as two separate things. The Cloud was created to enable mobility; and mobile devices are not so interesting without the cloud. [Learn more.](#)

News

The privacy of Microsoft in the cloud has been certified

With this approval by data protection authorities of the European Union, Microsoft Services will be available for use to freely move data through the Microsoft cloud from Europe to the rest of the world. [Learn more.](#)
