See what's **APP**ening in higher education

What's **APP**ening

Let's face it. Apps are now an integral part of our everyday lives, enabling us to do more, everywhere. For students and faculty in higher ed, that includes eReaders that make light work of heavy reading, cloud storage for anytime access to assignments, rich media and content, and even campus management tools that enable students and faculty to stay connected and collaborating.

There are many innovative and useful higher education apps in the Windows Store right now, with more being published every day. To get you started, we've curated a short list of higher ed apps that we hope you'll find helpful.
