# ASP.NET Dynamic Data –

Creating Data Driven Websites at the speed of  
your thinking

Harish Ranganathan  
Application Platform Evangelist  
Microsoft India

# Session Objectives

- Understanding Data Driven Apps today
- Current approach and possibilities - v1
- Rapid Business Layer Generation - BusinessDatasource
- Fire it up with / without Dynamic Data
- Its all about your choice

# One more approach

ASP.NET supports several very different types of web applications

**ASP.NET**  
**Web Forms**

**ASP.NET**  
**AJAX**

**ASP.NET**  
**MVC**

**ASP.NET**  
**Dynamic Data**

**ASP.NET Framework**

**.NET Framework**

# Dynamic Data – v1 (VS2008 SP1)

- Shipped with VS 2008 SP1
- Provides basic scaffolding
- Works with LINQ to SQL & Entity Framework

demo

Quick recap of Dynamic Data v1

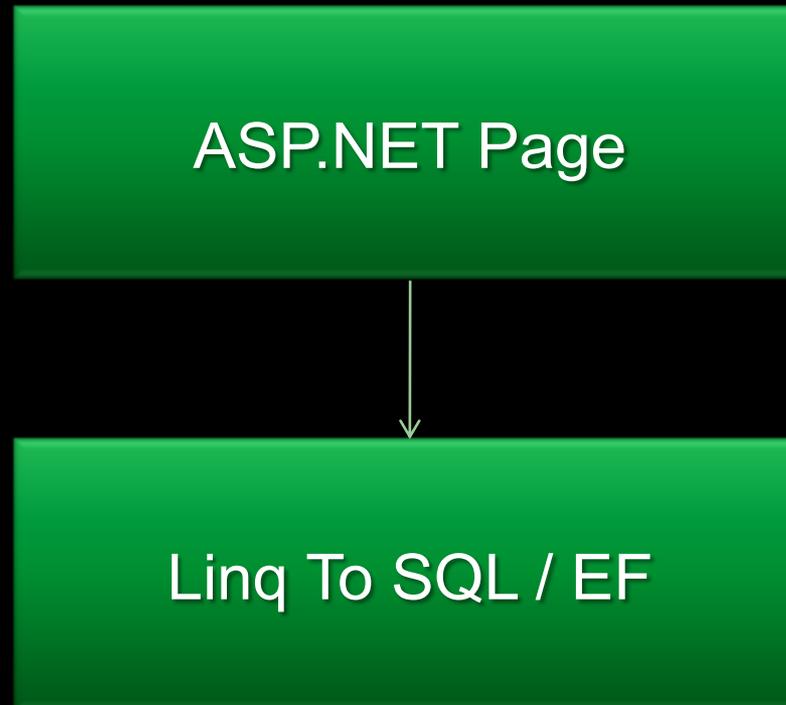

# Concerns you had

- 📉 Tighter integration between UI and Data
- 📉 Scope for business rules - limited
- 📉 Not extensible with regular Webforms

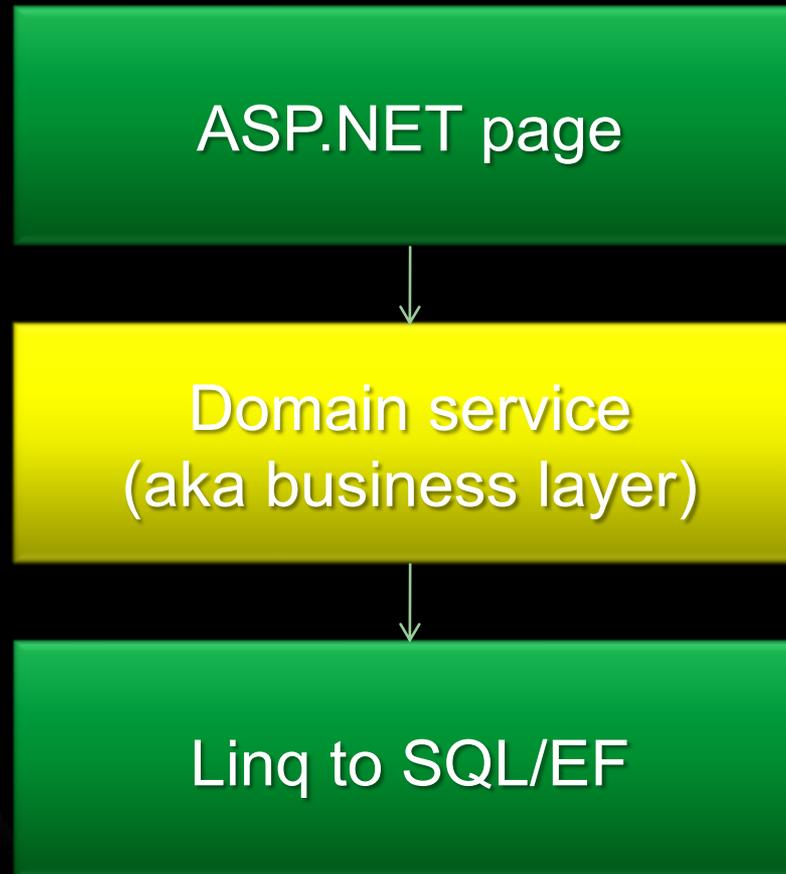

# Data Source History lesson

- 1.0: No data sources
- 2.0: ObjectDataSource
- 3.5: LinqDataSource
- 3.5 SP1: EntityDataSource
- Future: DomainDataSource

# Using LinqDataSource/EF

# Using DomainDataSource

Creating a Middle Tier – Domain DataService

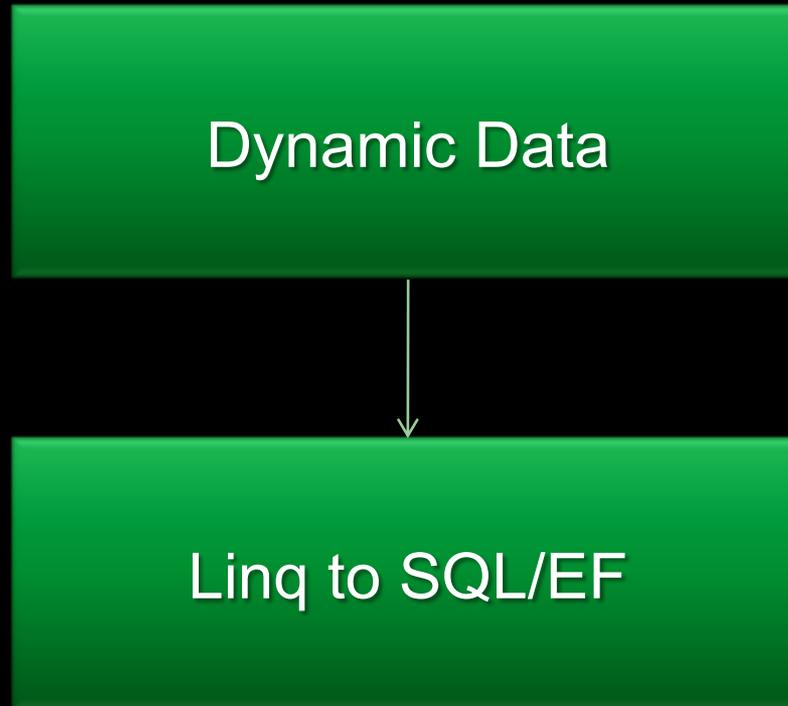

# What is Dynamic Data – v2

- Powerful way to build data-driven sites
- Get started quickly using scaffolding
- Much more than scaffolding!
- Fully customizable
- Validation and business rules on model
- Powerful filtering
- Flexible URL routing

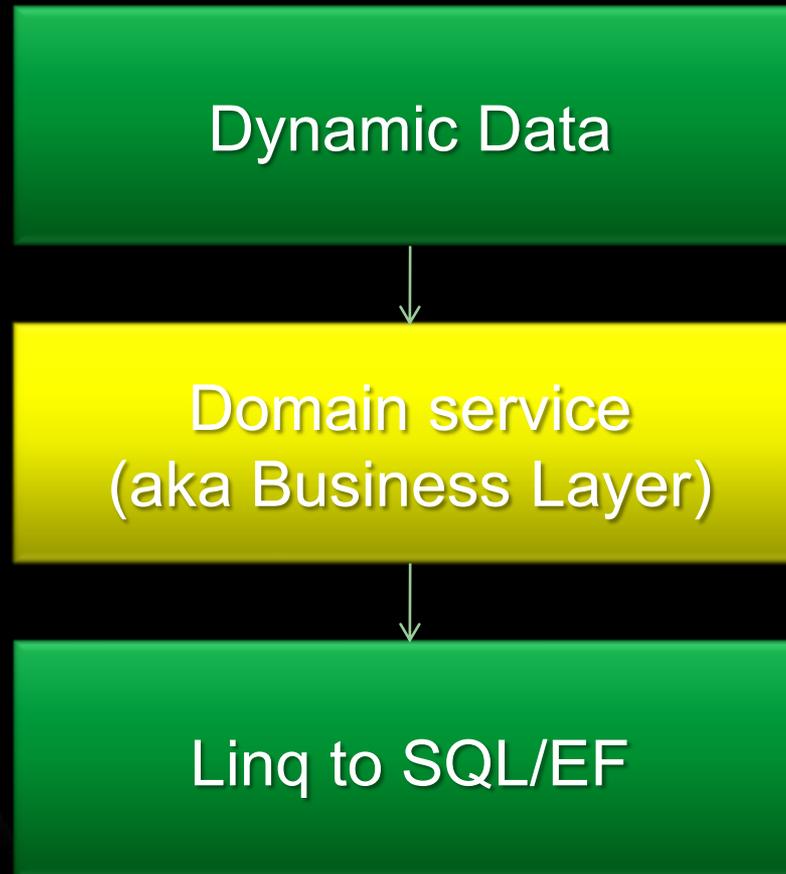

# Better with DomainDataSource

- Use Dynamic Data with DomainDataSource
- Best of both world
  - All the power of Dynamic Data
  - All the control of DomainService

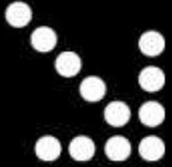

# DD with LinqDataSource/EF

# DD with DomainDataSource

demo

Dynamic Data with DomainDataSource

# Improve 'regular' aspx Pages

- Scenario: Reduce code in regular pages
- Validation
  - Validation in data model instead of individual pages. Change in one place affects entire site
- Field templates
  - Add custom controls in one place instead of in each of your pages
  - Enable custom controls on model

Use in Regular Pages

# Key Takeaways

- Dynamic Data moving away from just scaffolding
- Use in regular web forms
- Combined with RIA Services create functional web apps, very quickly
- Data Driven design approach is here !
