

**Certified Security Solutions Helps Organizations Architect and Deploy Information Rights Management
Services with a Solution Pack for Microsoft Windows RMS**

Kirkland, WA – April 9, 2008 - Certified Security Solutions, Inc. (CSS), a leading provider of information security consulting services, released another solution pack – a fixed-price rights management application-integration solution for Windows Rights Management Services (RMS). RMS helps safeguard sensitive information from unauthorized use.

The CSS RMS Solution Pack is a consulting service engagement for corporate clients that want to prevent information leakage and improve compliance with Microsoft infrastructure. The RMS Solution Pack extends corporate capability to secure MS Office documents and emails. Deployment services include security program integration, technology lifecycle management, and compliance support. The package methodology corresponds information rights policy with internal and IT audit groups helping to improve adoption rates.

“CSS offers a broad spectrum of infrastructure services for the marketplace”, said John “JG” Chirapurath, director of Identity and Access marketing at Microsoft. “Many of our customers can take advantage of their integration and compliance expertise to optimize infrastructure and reduce overhead.”

CSS targets organizations with information workers like engineers in manufacturing, service providers in healthcare, banking and financial services personnel. CSS is a Gold Certified, National Systems Integrator Partner that joins Microsoft in their Partner Pavilion at RSA Conference 2008 in San Francisco, CA, April 7th-11th.
