Instant Viewer

Available for third party licensing

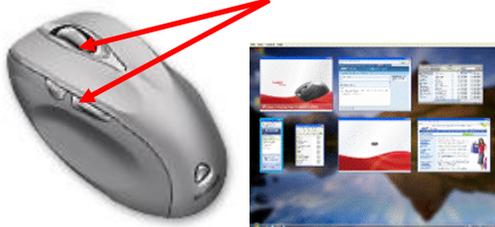

Find what you are looking for with just one click away.

Too many open items on your desktop? Click the scroll wheel or programmable button to instantly display your open windows, then point and click to select. When you've got a stack of open windows, hunting for specific pages through the taskbar slows you down. Instant Viewer lets you find what you're looking for with a single click of your mouse. One tap instantaneously displays your desktop screen underneath small versions of all your open windows. Click directly on the item you want to open it to full size. It's that simple—and you're right back to work.

Instantly and easily change screens on your monitor

With Instant Viewer, it's always easy to change screens. You'll never lose your place again, whether you're fact-checking complex documents or comparing hotel reviews for your upcoming vacation. Need to close down your Internet radio and tune in to a conference call or dig up the spread sheet you were working on just before lunch? You can make it happen immediately. If it's on your taskbar, it's instantly available

Press down on the scroll wheel or program any button to activate the Instant Viewer

Combining functions sends your efficiency soaring.

Used alongside other tools like four-way scrolling (Tilt Wheel) and personally assigned keys, you'll find your customized mouse contains all the features you need to maintain efficiency. Combining Instant Viewer with one-touch functions like print or save can add up to valuable minutes as you're preparing the final touches on a presentation or rushing to meet a deadline. Searching through the family photo archives for the one you want to print and frame happens with just a few clicks—Instant Viewer adds up to an instant gift.

For an interactive demo of the Instant Viewer feature CTRL + click the url link below:
