

DATA SHEET

Enterprise Portal and Collaboration Technology Planning

Designed for successful implementation with expert planning and design

Expert technology planning and architecture design helps you extend the value of your information technology investments.

You Can Transform the Way People and Organizations Work Together

Microsoft® portal and collaboration solutions help transform the way people and organizations work together through familiar and pervasive workspaces, portals, and emerging social computing capabilities. By empowering people with a familiar set of tools, built on an enterprise-ready, scalable, and a manageable integrated infrastructure, portal and collaboration solutions from Microsoft can extend the value of your current IT investments while enabling business process innovation.

Portal and collaboration solutions from Microsoft can help speed market responsiveness and foster innovation by:

- Empowering teams through collaborative workspaces.
- Connecting organizations through portals.
- Enabling communities with social computing tools.
- Helping to reduce costs and complexity by using an integrated infrastructure, existing investments, and an extensible architectural platform.

If you are preparing to implement a portal and collaboration solution, Microsoft Services can help you with technology planning and architecture design for either On Premise or Business Productivity Online Services to help ensure a correct and effective implementation.

Enterprise Portal and Collaboration Technology Planning from Microsoft Services helps you:

- Design a robust, scalable, and highly secure solution for either On Premise or Business Productivity Online Services.
- Mitigate implementation risks.
- Ensure maximum value and effectiveness.

Enterprise Portal and Collaboration Technology Planning from Microsoft Services

Microsoft Services' Enterprise Portal and Collaboration Technology Planning is an offering that will help you prepare for a successful and effective enterprise portal and collaboration solution implementation for either On Premise or Business Productivity Online Services.

Our expert consultants have extensive experience in designing portal and collaboration solutions. We will combine our knowledge, technical resources, and best practices for technology planning and architecture design to help you develop a thorough plan. This comprehensive plan helps mitigate implementation risks and is designed to provide maximum value and effectiveness for your enterprise portal and collaboration solution for either On Premise or Business Productivity Online Services.

Enterprise Portal Collaboration Technology Planning provides you a detailed architecture, design, and plan to help ensure successful implementation for either On Premise or Business Productivity Online Services.
