## Why Microsoft® Hardware? Your connection to a great PC Experience.

### Get the most out of your Windows® PC investment.

Microsoft Hardware is designed to work seamlessly with Windows, Office and Lync™ software, it will help you get the most from your Microsoft investment. Our full range of products - from webcams and headsets, to keyboards and mice, is designed especially for business.

# Software + Hardware for Business

**History of innovation** - For more than 27 years, Microsoft® Hardware has been a technology leader that continues to raise the bar with award-winning innovations. Extensive lab testing and development ensure continued advancement in your connection to a great PC experience. From ergonomic designs, to HD video, to seamless integration with Microsoft software, your experience with Microsoft Hardware for Business will deliver value, productivity and comfort to your workplace.

**Quality you can count on** - Each and every Microsoft Hardware peripheral is rigorously tested to ensure a quality experience.

## Choose from a Full Line of “For Business” Products

From mice and keyboards to webcams and headsets, Microsoft Hardware delivers:

### Value “For Business”

Makes deploying quality technology simple and easy.

- Save money by buying in volume.
- Easily purchase and deploy high quality products.
- Reduce waste with less packaging.
- Enjoy support included with each product.

### Productivity

Improve employee productivity and efficiency with peripherals optimised for Microsoft software.

- All mice, keyboards, webcams and headsets are designed to work seamlessly with Microsoft software.
- Webcams and headsets optimised for Microsoft Lync™ ensure great audio and video, with only one click to make a video call.

### Ergonomics and Workplace Health

Microsoft contributes to comfort and welfare at work by providing a range of mice and keyboards designed to encourage a natural and ergonomic posture.

- Help improve employee comfort and health with ergonomic designs.
- Product designs work efficiently and effortlessly, and feel as good as they look.

# Unified Communications

Users seek communications tools that make their work easier and are available anywhere, anytime – including working together within the context of other applications. They want a single interface that unites voice communications, Instant Messaging, audio, video, and Web conferencing into a richer offering that helps them get things done.

OPTIMIZED FOR

Microsoft® Lync™

## Microsoft® Lync™ Server 2010

Microsoft Lync Server 2010 transforms every communication into an interaction that is more collaborative, engaging and accessible from anywhere. A single interface unites voice, Instant Messaging, audio, video, and web-conferencing into a richer experience. A single identity makes it easier and more efficient for users to find contacts, check their availability and connect with them. Microsoft Lync 2010 and Microsoft Lync Server 2010 work consistently with Microsoft Office, enriching the experience of familiar applications like Microsoft Outlook, Microsoft Word, Microsoft SharePoint, and more.

## Save time and money, with a webcam.

Little wonder then that the CIO of one of the global accounting firms said to us, “Even if we only use the webcam once, to replace a meeting just across town, it’s paid for itself several times over”.<sup>1</sup>

A *high quality webcam* can lower travel costs, but the advantages don’t stop there. Employee productivity also takes a hit when in transit. Then there’s the improved productivity, from easier workflow and better connections between people, that webcams make possible.

## Get the most out of your Microsoft Lync investment.

Using a webcam optimised for Microsoft Lync delivers all the benefits you would expect from a webcam, and more. You will get increased team collaboration and faster decision making plus there are also the time and travel savings, improved productivity and environmental benefits. Microsoft’s new LifeCam for Business range is part of a Unified Communications approach, meaning seamless integration and ease of use. With Microsoft Lync, for example, it’s one click to make a call and just click again to launch a video connection via your LifeCam. In every way, a LifeCam enhances your Microsoft Lync experience and increases your ROI.

## Do your best by the planet.

Trading travel for video conferencing not only saves your company money, it also reduces your impact on the environment. A recent American Consumer Institute study estimated that, if video conferencing substituted just 10% of business air travel, it would reduce US carbon emissions by 35 million tons per annum alone. In every way, conferencing over the web is far better for the planet.

<sup>1</sup> Forrester Report: 24th February 2009, The ROI of Telepresence.

# Purchasing Microsoft® Hardware

Volume pricing, reduced packaging

**Microsoft Hardware For Business** provides opportunity for greater savings by offering an easier way to purchase and deploy Microsoft Hardware products. These products are for sale only to Microsoft distributors and resellers for business deployment, not for retail sales.

**Microsoft Hardware For Business** products are generally available in single units, 5 packs and 50 packs. The for Business line offers better pricing for businesses. The new packaging makes it easier to deploy and is environmentally friendly.

- **Savings** - Volume Pricing
- **Easy to Order and Deploy** - Everything the Customer Needs in One Easy to Open Package
- **Support** - Included with Each Product
- **Packaging** – Reduced Waste, Environmentally Friendly

# Communications - Webcams

## Why an external webcam?

**Higher Quality Video, Better Optics, Larger Aperture, Flexible Camera Angle and Direction, Increased Field of View and the ability to easily manage security.**

"We're already seeing significant travel cost savings and reduced logistics complexity with LifeCam Cinema and its HD capabilities, which also helps us meet our corporate sustainability and green IT goals." Rick Echevarria, Intel VP, GM, Business Client Platforms.

Microsoft®

## LifeCam VX-2000 for Business

### Easy to Use | Clear Audio and Video

An HD webcam can mean the difference between a good business communication experience and a great one.

With 16:9 widescreen, HD video, crystal-clear images with auto focus and natural looking video, you won't find another High Definition video experience like LifeCam Cinema, LifeCam Studio, or HD-6000 for Notebooks.

Microsoft LifeCams come in different forms, video resolutions and price ranges to suit different business scenarios and different business deployment budgets. Above is an overview of the current Microsoft LifeCams for Business available from Microsoft Hardware today.

# Ergonomics and Workplace Health

**370,000 people suffer from Repetitive Strain Injury in the UK alone – causing fatigue and discomfort and costing businesses billions annually<sup>1</sup>** – To combat this growing problem, Microsoft® has developed an ergonomic range of mice and keyboards to promote better positioning and posture while you're at your desk. The simple, fundamental changes to their shape and usability make them the natural choice.

## Improve employee comfort and health with ergonomic designs

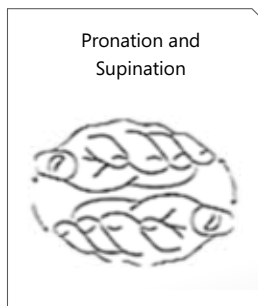

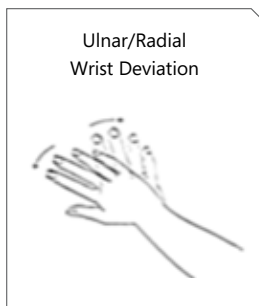

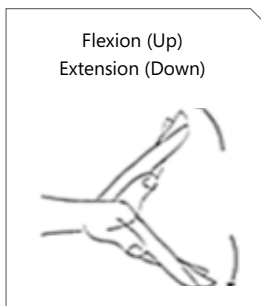

Microsoft has on-staff Ergonomist and usability experts continually looking forward, searching for new designs and technologies and striving to make the computing experience more comfortable, more intuitive, and more productive.

- Notebook mouse users experience a lower incidence of pain compared with users who don't use an external pointing device.
- Microsoft is the #1 best-selling brand of ergonomic keyboards worldwide.
- 94% of Comfort Curve users would recommend it to others.<sup>2</sup>

## Design factors intended to maximise productivity by minimising operator fatigue and discomfort

Help avoid conditions associated with prolonged computer usage, such as Repetitive Strain Injury (RSI) and carpal tunnel syndrome by practicing these techniques below
