

Microsoft priorities for the coming year

Microsoft CEO, Satya Nadella, started the conference with a Vision Keynote about enabling digital transformation, specifically a partner centered \$4.5 trillion transformation opportunity, through four solution areas:

- Modern workplace
- Business applications
- Applications & infrastructure
- Data & Artificial Intelligence (AI)

Talking about the intelligent cloud and intelligent edge, Satya Nadella also unveiled Microsoft 365, which brings together Office 365, Windows 10, and Enterprise Mobility + Security, delivering a complete, intelligent, and secure solution to empower employees.

Earlier that day, Ron Huddleston, Microsoft Corporate Vice President, announced the new One Commercial Partner organization, along with the three primary functions of the organization: Build-with, Go-to-market, and Sell-with. Enabling digital transformation was a theme throughout the Vision Keynotes and conference sessions. On day two, Judson Althoff, Microsoft Executive Vice President, Worldwide Commercial Business, laid out the four pillars of digital transformation, along with customer stories aligned to each pillar:

- Empower employees
- Engage customers
- Optimize operations
- Transform products

Toni Townes-Whitley, Corporate Vice President, talked about our continued focus on being industry focused and partner powered, and on how that relates to business outcomes for customers.

On day three, Brad Smith, Microsoft President and Chief Legal Officer, talked about the need for integrated security at global scale that is engineered-in and fully integrated. Gavriella Schuster, Corporate Vice President, Worldwide Channels and Programs, talked about the changes being made to the Microsoft sales model to enable partners to have focused conversations about building the business with Account Managers versus developing solutions with Channel Managers.

Modern workplace

"The workplace is transforming—from changing employee expectations, to more diverse and globally distributed teams, to an increasingly complex threat landscape. From these trends, we are seeing a new culture of work emerging. Our customers are telling us they are looking to empower their people with innovative technology to embrace this modern culture of work." – Kirk Koenigsbauer, Corporate Vice President

Applications & infrastructure

"Our customers look to Microsoft's partner community to help them successfully navigate technology options and deliver cloud-based solutions that enable their digital transformation. I'm pleased to make several announcements that put Microsoft's innovation and global reach to work for our partners – and customers – in ways no other cloud vendor does." – Julia White, Corporate Vice President
