

Microsoft Edge

The future of Internet Explorer is in Microsoft Edge

Move from Internet Explorer to Edge and get access to the same sites, plus more:

One browser, not two

Access web, work-critical, and personal websites in Microsoft Edge

Fast performance

More speed, compatibility, security, and privacy in a single browser

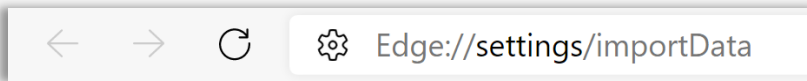

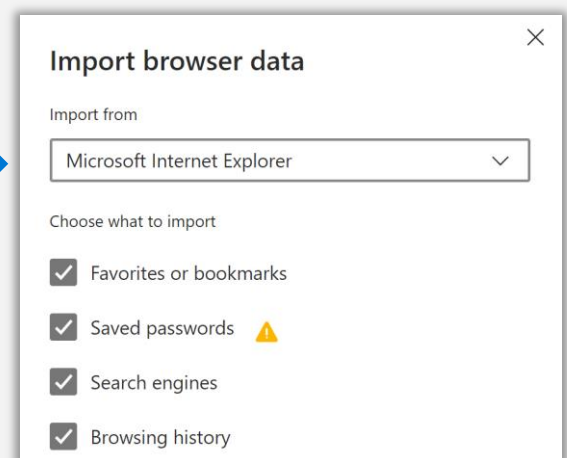

Unique innovations

New tools to work online like quick access to Microsoft apps and vertical tabs

3 steps to get started:

Microsoft Edge is already installed on your device. All you need to do is...

1. Open  Microsoft Edge
2. Enter this address into your address bar 

3. Select Internet Explorer from the dropdown, and choose which data you want to import—favorites, passwords, history, and more.

Watch this [video tutorial](#) to learn how to import your browser data. For more information on using Microsoft Edge at work, check out the [Features at Work site](#).
