NIIT

NIIT leverages Azure to power the insurance industry

Challenge

NIIT needed a cloud solution that offers the flexibility to test and take to market new products and services quickly, while also enabling its customers to fully leverage their services to make informed decisions in pursuit of new business.

Solution

It built its exposure, underwriting and claims management solution, +AdvantageSuite, on Azure to enable customers to cope with changes in the industry.

Results

Azure gave NIIT the flexibility to manage different product lifecycles, speed to launch new products, and easy integration – all resulting in a seamless and painless experience for their customers.
