

Rolls-Royce®

# Rolls Royce heads to the cloud to keep costs on the ground

## Challenge

With 13,000+ engines in operation across the globe, Rolls Royce needs to analyze terabytes of data produced by 1000s of sensors to maintain them at peak performance.

## Solution

With Azure IoT and Cortana Intelligence Suite, Rolls Royce can provide airlines with real-time actionable insights to optimize fuel economy and anticipate maintenance needs.

## Results

With early notice, airlines can proactively have parts at the right place and time, reducing inventory costs and maximizing availability.
