

FUJIFILM offers Universal Print ready printers

Users can now print from anywhere with Universal Print, the Microsoft cloud-based print solution, eliminating print servers and the need to install printer drivers.

Customers with Windows Enterprise or Microsoft 365 subscriptions can now easily print to FUJIFILM printers using Universal Print, whether they are in the office, at home or on the go. People only need an internet connection and authenticate to Azure AD, to be able to print. The network traffic will be protected, using secure HTTPS protocol. There is no need to install the corresponding printer driver for the FUJIFILM printers on the user's device for people to print to the nearest accessible printer right away.

The printers from FUJIFILM Business Innovation support user authentication with Azure AD so people can use Universal Print to print safely without exposing your documents to other users. Documents are stored on the printer's storage and are released by the user thanks to the 'Private Print' feature of FUJIFILM Universal Print ready printers.

Cloud-based and mobile solutions and services from FUJIFILM Business Innovation helps customers to overcome document and communication challenges.

Safety print

Documents are stored on the printer's storage and are released by the user thanks to the 'Private Print' feature of FUJIFILM Universal Print ready printers.

Anywhere print

This enables people to print easily in any place outside of the usual workplace or print to a printer at the destination after submitting a print job from their office in advance.

Easy management

Printer administrators can centrally manage their organization's printers from the Universal Print portal, significantly reducing the effort involved in managing printers.

About Universal Print by Microsoft

Universal Print is a modern print solution that organizations can use to manage their print infrastructure through cloud services from Microsoft. Universal Print runs entirely on Microsoft 365. When it's deployed with Universal Print-compatible printers, it doesn't require any on-premises infrastructure. Universal Print is a Microsoft 365 subscription-based service that organizations use to centralize print management through the Universal Print portal.
