

You look great.

Make a big impact. Microsoft® PowerPoint® 2010 gives you new and better tools for building high-quality presentations, including picture effects for compelling images, editing tools for embedded video and audio, and co-authoring capabilities for whole team collaboration.

New and improved image editing

features like color saturation and temperature, remove background, an advanced cropping tool, and professional-quality artistic effects make it easy to make your presentation shine.

Co-authoring capabilities enable you to work on the same PowerPoint presentation simultaneously with people in other locations. You can also see who's available and easily start a conversation with them without leaving PowerPoint.
