

# You are a model of efficiency.

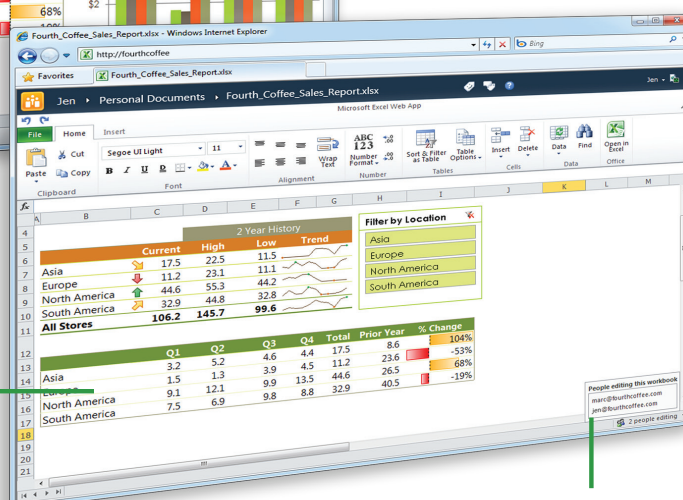

And you speak for yourself. Your spreadsheet should too. Microsoft® Excel® 2010 helps you bring data to life with new and improved data analysis and visualization tools that let you communicate with greater clarity, efficiency, and style.

**Sparklines** let you create small charts in a single cell to quickly discover patterns in your data. It's a quick and easy way to highlight important data trends such as seasonal increases or decreases, saving you time.

**The Slicer** feature provides you with a rich visualization of your PivotTable® and PivotChart® views so you can dynamically segment and filter the data to display precisely what you need.

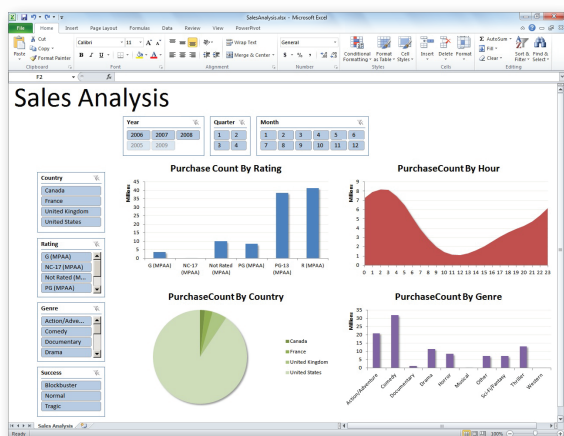

**Anywhere access** means you can post your workbooks online and then access, view, and edit them from just about any computer with an Internet connection using Excel Web App.<sup>1</sup>

**New co-authoring tools** through the Microsoft® Excel® Web App let you edit the same spreadsheet with others simultaneously from different locations.

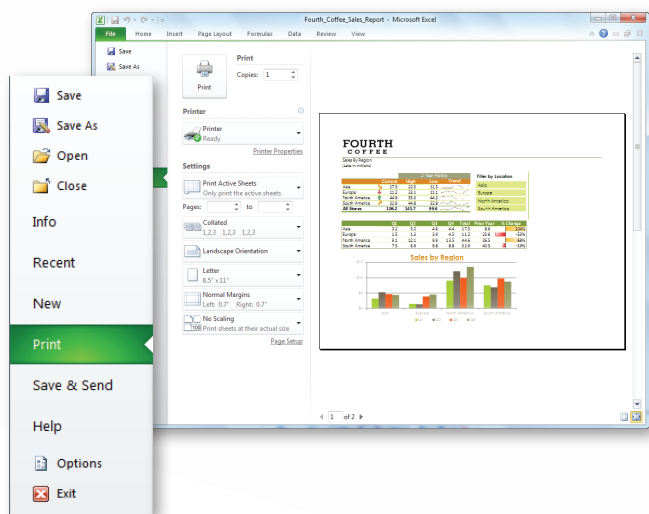

## Better data modeling and analysis

PowerPivot for Excel® 2010—a free add-in—gives you streamlined integration of data from multiple sources and lightning-fast manipulation of large data sets with up to millions of rows.<sup>2</sup>

## New Ribbon and Backstage view

Save, share, print, and publish your spreadsheets with just a few clicks with Microsoft® Office Backstage™. Access your favorite commands even faster by customizing tabs or creating your own with the enhanced Ribbon.

## More power for bigger spreadsheets

With the new 64-bit version<sup>3</sup> of Excel 2010, massive amounts of information are easier to analyze than ever before. Now you can analyze large, complex datasets beyond 2 gigabytes.

## Share your results

Microsoft® SharePoint® Server 2010 and Excel Services integration lets you share analysis and results across your organization by publishing spreadsheets to the Web. Share sensitive business information in a security-enhanced environment.

## Faster insights

Now filter directly on a PivotChart view to analyze and capture the most compelling picture of your numbers.

## Improved conditional formatting

Now you have more control over styles and icons and improved data bars. With enhanced data bars, negative values are more clearly displayed and zero values are now suppressed.

► Discover everything you can do with Microsoft® Office 2010 at [www.microsoft.com/office2010](http://www.microsoft.com/office2010)

<sup>1</sup> Web and Smartphone access require an appropriate device and some functionality requires an Internet connection. Web functionality uses Office Web Apps, which require a supported Internet Explorer, Firefox, or Safari browser and either SharePoint Foundation 2010 or a Windows Live ID. Some mobile functionality requires Office Mobile 2010 which is not included in Office 2010 applications, suites, or Office Web Apps. There are some differences between the features of the Office Web Apps, Office Mobile 2010 and the Office 2010 applications.

<sup>2</sup> Requires a free, separate download. For more information see [www.powerpivot.com](http://www.powerpivot.com). PowerPivot for Excel requires Microsoft SQL Server 2008 R2 Enterprise Edition or higher and SharePoint 2010.

<sup>3</sup> More information on the 64-bit version of Excel 2010 including system requirements is available at [www.office.com](http://www.office.com)
