

You are a model of efficiency.

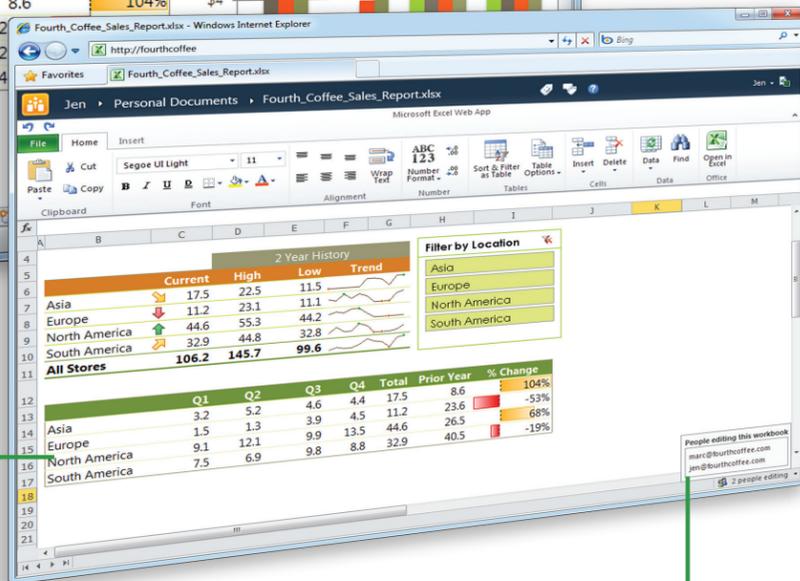

You do more in less time. Microsoft® Excel® 2010 is full of new tools that enable you to analyze, manage, access, and share information. Take advantage of new and improved flexibility and efficiency. Create data charts in a single cell. Produce great looking spreadsheets in no time.

Sparklines let you create small charts in a single cell to quickly discover patterns in your data. It's a quick and easy way to highlight important data trends such as seasonal increases or decreases, saving you time.

The Slicer feature provides you with a rich visualization of your PivotTable® and PivotChart® views so you can dynamically segment and filter the data to display precisely what you need.

Anywhere access means you can post your workbooks online and then access, view, and edit them from just about any computer with an Internet connection using Excel Web App.

New co-authoring tools through the Microsoft® Excel® Web App let you edit the same spreadsheet with others simultaneously from different locations.
