

You look great.

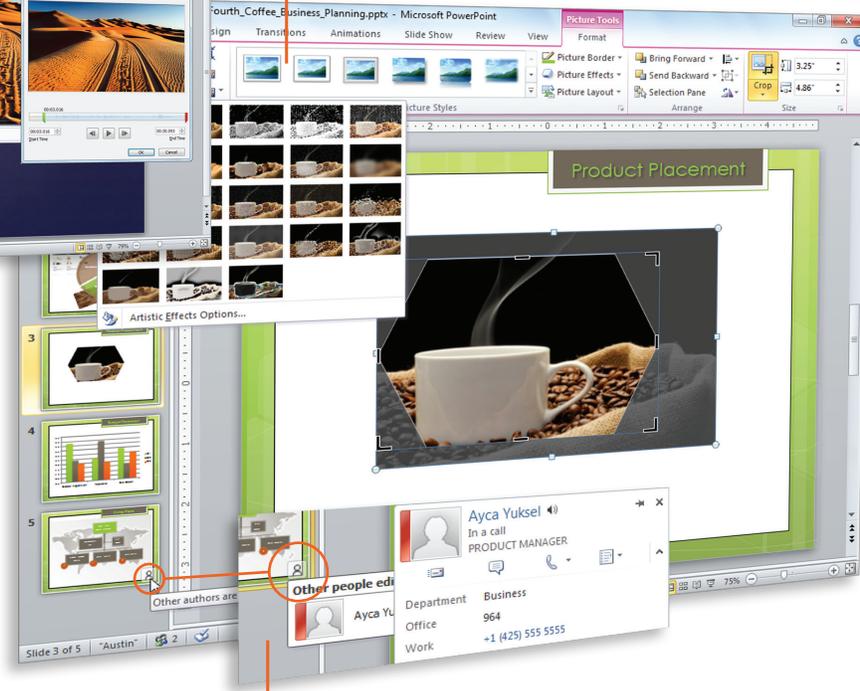

Microsoft® PowerPoint® 2010 gives you more ways to create and share dynamic presentations than ever before. New multimedia tools help make your presentations easy to share and powerful to watch. Co-authoring capabilities enable you to edit a presentation simultaneously with people in different locations. And you can work on your own terms when you post your presentations online and then access and edit them from virtually anywhere using the Web or your Windows® phone.¹ When you add together all of the new and improved features and benefits of PowerPoint 2010, you'll find one powerful, intuitive tool to help you get your important ideas noticed.

New and improved image editing

features like color saturation and temperature, remove background, an advanced cropping tool, and professional-quality artistic effects make it easy to make your presentation shine.

New media tools enable you to embed and edit video files directly in your presentation. Trim your video, add fades and effects, trigger animations to begin when specific points in your video are reached, and more.

Co-authoring capabilities enable you to work on the same PowerPoint presentation simultaneously with people in other locations.² You can also see who's available and easily start a conversation with them without leaving PowerPoint.³

Get your message out

Broadcast your presentation live to a remote audience, whether or not they have PowerPoint installed.⁴ You can also create a high-fidelity video of your presentation to easily share it with virtually anyone.

Work when and where you want

Post your presentations online and then view, edit, and share them from virtually any computer with an Internet connection by using Microsoft® PowerPoint® Web App. Or take action on the go using Microsoft® PowerPoint® Mobile 2010 and your Windows phone.¹

Get animated

More realistic animation effects and intuitive tools make it easier to apply, modify, and replace animations. Quickly copy your favorite custom animation sequences to multiple objects using the new Animation Painter.

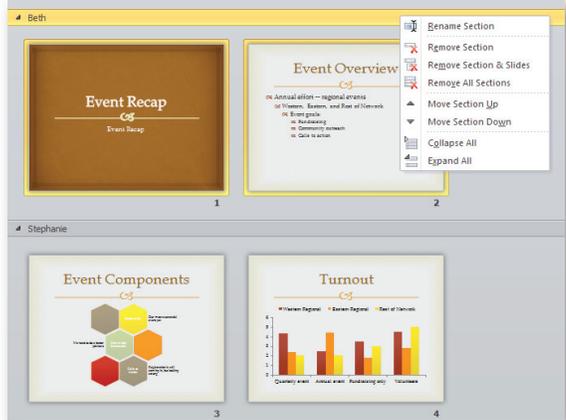

Make a great transition

Keep your presentation flowing smoothly with new and improved, dynamic slide transitions, including high-quality 3-D effects.

Manage your slides more easily

Divide a complicated presentation into logical sections for easy organization. Rename sections to assign slides to a particular member of your team or quickly print just the section of slides you want.

Work on multiple presentations

View and edit multiple presentations independently, side-by-side, or even on separate monitors. PowerPoint 2010 gives you a completely separate window for each presentation.

Get a Backstage pass

Microsoft® Office Backstage™ view replaces the traditional File menu with one centralized space for all of your presentation management tasks. And with the improved Ribbon, you can customize tabs or create your own to personalize your PowerPoint 2010 experience.

¹ Web and Smartphone access require an appropriate device and some functionality requires an Internet connection. Web functionality uses Office Web Apps, which require a supported Internet Explorer, Firefox, or Safari browser and either SharePoint Foundation 2010 or a Windows Live ID. Some mobile functionality requires Office Mobile 2010 which is not included in Office 2010 applications, suites, or Office Web Apps. There are some differences between the features of the Office Web Apps, Office Mobile 2010 and the Office 2010 applications.

² Requires SharePoint Foundation 2010 or a Windows Live ID.

³ Instant messaging and presence require one of the following: Microsoft Office Communications Server 2007 R2 with Microsoft Office Communicator 2007 R2; Windows Live Messenger, or another instant messaging application that supports IMessenger. Voice calls require Microsoft Office Communications Server 2007 R2 with Microsoft Office Communicator 2007 R2 or an instant messaging application that supports IMessenger advanced.

⁴ Requires SharePoint Foundation 2010 or a Windows Live ID. To broadcast via SharePoint 2010, Office Web Apps must be installed.
