

# Thyssenkrupp leverages IoT to take cities to new heights

## Challenge

ThyssenKrupp Elevator, which has 1.1 million machines operating in 150 countries, wanted further improve its competitive advantage with increased elevator uptime and reliability.

## Solution

With the help of Microsoft Partner CGI, it created an intelligent cloud-based solution based on Microsoft Azure Intelligent Systems Services, and Power BI for Office 365.

## Results

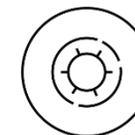

ThyssenKrupp now uses real-time data to define required repairs before breakdowns occur, leading to better efficiency and reduced costs.
