

Microsoft Dynamics 365 for Financials

PRICING AND LICENSING GUIDE

Microsoft Dynamics 365 for Financials is a business management solution that's connecting people and processes like never before. From day one, it makes ordering, selling, invoicing, and reporting easier and faster. Start with only what you need and grow at your own pace. Using flexible applications and a scalable database, you can easily adapt to change and manage growth.

Microsoft Dynamics 365 for Financials offers customers licensing flexibility that helps keep the upfront cost as well as total cost of ownership to a minimum through a "per user per month" licensing fee.

Role-based Licensing

Customers have the choice of two concurrent user types, **Team Member** and **Full User**. Both licensing models are designed to simplify the purchasing process by providing the right level of access by role.

Team Members predominately consume data and reports and complete light tasks like time entry.

Full Users leverage the majority of business apps' functionality. They have also been referred to as "power users." All licenses include automatic product updates. The **Full User** license includes the rights for one external accountant user to access the service at no additional cost. The license for this user has to be requested separately.

Dynamics 365 for Financials Use Rights

		Team Members	Full Users
APPROVE	Workflows across the application	•	•
EDIT	Financial management		•
	Purchase and payables		•
	Sales and receivables		•
	Inventory management		•
	Project management		•
	Requisitions and quotes	•	•
	Timesheets	•	•
	Personal information	•	•
UPDATE	Existing data and entries in Financials	•	•
READ	Across all Dynamics 365 applications	•	•
POWER APPS	App contextual Power Apps for Dynamics 365	•	•

"Edit" is Microsoft's highest level use right, which equates to adding create/delete in Dynamics 365 for Financials.

\$5
user / month

\$40
user / month
