

## [MS-SPWFCSON]:

# SharePoint Workflow Client-Side Object Model Protocol

### Intellectual Property Rights Notice for Open Specifications Documentation

- **Technical Documentation.** Microsoft publishes Open Specifications documentation for protocols, file formats, languages, standards as well as overviews of the interaction among each of these technologies.
- **Copyrights.** This documentation is covered by Microsoft copyrights. Regardless of any other terms that are contained in the terms of use for the Microsoft website that hosts this documentation, you may make copies of it in order to develop implementations of the technologies described in the Open Specifications and may distribute portions of it in your implementations using these technologies or your documentation as necessary to properly document the implementation. You may also distribute in your implementation, with or without modification, any schema, IDL's, or code samples that are included in the documentation. This permission also applies to any documents that are referenced in the Open Specifications.
- **No Trade Secrets.** Microsoft does not claim any trade secret rights in this documentation.
- **Patents.** Microsoft has patents that may cover your implementations of the technologies described in the Open Specifications. Neither this notice nor Microsoft's delivery of the documentation grants any licenses under those or any other Microsoft patents. However, a given Open Specification may be covered by Microsoft [Open Specification Promise](#) or the [Community Promise](#). If you would prefer a written license, or if the technologies described in the Open Specifications are not covered by the Open Specifications Promise or Community Promise, as applicable, patent licenses are available by contacting [iplg@microsoft.com](mailto:iplg@microsoft.com).
- **Trademarks.** The names of companies and products contained in this documentation may be covered by trademarks or similar intellectual property rights. This notice does not grant any licenses under those rights. For a list of Microsoft trademarks, visit [www.microsoft.com/trademarks](http://www.microsoft.com/trademarks).
- **Fictitious Names.** The example companies, organizations, products, domain names, e-mail addresses, logos, people, places, and events depicted in this documentation are fictitious. No association with any real company, organization, product, domain name, email address, logo, person, place, or event is intended or should be inferred.

**Reservation of Rights.** All other rights are reserved, and this notice does not grant any rights other than specifically described above, whether by implication, estoppel, or otherwise.

**Tools.** The Open Specifications do not require the use of Microsoft programming tools or programming environments in order for you to develop an implementation. If you have access to Microsoft programming tools and environments you are free to take advantage of them. Certain Open Specifications are intended for use in conjunction with publicly available standard specifications and network programming art, and assumes that the reader either is familiar with the aforementioned material or has immediate access to it.

**Preliminary Documentation.** This Open Specification provides documentation for past and current releases and/or for the pre-release version of this technology. This Open Specification is final documentation for past or current releases as specifically noted in the document, as applicable; it is preliminary documentation for the pre-release versions. Microsoft will release final documentation in connection with the commercial release of the updated or new version of this technology. As the documentation may change between this preliminary version and the final version of this technology, there are risks in relying on preliminary documentation. To the extent that you incur additional

development obligations or any other costs as a result of relying on this preliminary documentation,  
you do so at your own risk.

Preliminary

## Revision Summary

Date	Revision History	Revision Class	Comments
1/20/2012	0.1	New	Released new document.
4/11/2012	0.1	No Change	No changes to the meaning, language, or formatting of the technical content.
7/16/2012	0.2	Minor	Clarified the meaning of the technical content.
9/12/2012	0.2	No Change	No changes to the meaning, language, or formatting of the technical content.
10/8/2012	1.0	Major	Significantly changed the technical content.
2/11/2013	2.0	Major	Significantly changed the technical content.
7/30/2013	2.1	Minor	Clarified the meaning of the technical content.
11/18/2013	2.1	No Change	No changes to the meaning, language, or formatting of the technical content.
2/10/2014	2.1	No Change	No changes to the meaning, language, or formatting of the technical content.
4/30/2014	2.2	Minor	Clarified the meaning of the technical content.
7/31/2014	2.2	No Change	No changes to the meaning, language, or formatting of the technical content.
8/24/2015	3.0	Major	Significantly changed the technical content.

Preliminary

# 1 Introduction

The SharePoint Workflow Client-Side Object Model Protocol provides types, methods, and properties to enable a protocol client to manage and interact with workflow functionality on a collaboration server.

Sections 1.8, 2, and 3 of this specification are normative and can contain the terms MAY, SHOULD, MUST, MUST NOT, and SHOULD NOT as defined in [\[RFC2119\]](#). Sections 1.5 and 1.9 are also normative but do not contain those terms. All other sections and examples in this specification are informative.

## 1.1 Glossary

The following terms are specific to this document:

**action**: A unit of work that can be performed by a workflow and is typically defined in a workflow markup file.

**activity**: An object that stores information about either an **action** or an activity model.

**application**: A participant that is responsible for beginning, propagating, and completing an atomic transaction. An application communicates with a transaction manager in order to begin and complete transactions. An application communicates with a transaction manager in order to marshal transactions to and from other applications. An application also communicates in application-specific ways with a resource manager in order to submit requests for work on resources.

**association form**: A form that provides parameters for a **workflow association**.

**authentication**: The act of proving an identity to a server while providing key material that binds the identity to subsequent communications.

**collateral file**: Any file stored with a workflow definition. This file is intended to be used for management of the workflow definition, or to initiate and control of an instance of the workflow definition.

**Coordinated Universal Time (UTC)**: A high-precision atomic time standard that approximately tracks Universal Time (UT). It is the basis for legal, civil time all over the Earth. Time zones around the world are expressed as positive and negative offsets from UTC. In this role, it is also referred to as Zulu time (Z) and Greenwich Mean Time (GMT). In these specifications, all references to UTC refer to the time at UTC-0 (or GMT).

**CSOM array**: An ordered collection of values that can be used in an **XML** request or **JSON** response text. The values are identified by their position and their position is determined by a zero-based integer index.

**CSOM Boolean**: A Boolean value that can be used in an **XML** request or **JSON** response text. A CSOM Boolean value is either "true" or "false".

**CSOM DateTime**: An Int64 value that represents the number of 100-nanosecond time intervals that have elapsed since 12:00:00, January 1, 0001. It can be used in an **XML** request or as a string in **JSON** response text. The value can represent time intervals through 23:59:59.999999, December 31, 9999. It can also specify whether a local, **UTC**, or no time zone applies.

**CSOM dictionary**: An object that contains an unordered collection of key/value pairs that can be used in an **XML** request or **JSON** response text. Each key in a CSOM dictionary has a unique name.

**CSOM GUID:** A **GUID**, as described in [MS-DTYP], that can be used in an **XML** request or as a string in **JSON** response text.

**CSOM Int32:** A 32-bit, signed integer value, which is the INT32 type described in [MS-DTYP], that can be used in an **XML** request or as a number in **JSON** response text. The range of CSOM Int32 values is from "-2147483648" to "2147483647".

**CSOM Stream:** A series of bytes that is used to transfer data and that supports reading, writing, and seeking.

**CSOM String:** A representation of text as a series of Unicode characters. It can be used in an **XML** request or **JSON** response text.

**empty GUID:** A 128-bit, 16-byte identification number that is represented by all zeros.

**event:** (1) Any significant occurrence in a system or an application that requires users to be notified or an entry to be added to a log.

(2) An action or occurrence to which an application might respond. Examples include state changes, data transfers, key presses, and mouse movements.

**event receiver:** A structured modular component that enables built-in or user-defined managed code classes to act upon objects, such as list items, **lists**, or content types, when specific triggering actions occur.

**Extensible Application Markup Language (XAML):** A declarative XML-based language that is used to represent a tree of objects. XAML markup is stored in .xaml files or, for workflow schemas, .xoml files.

**field:** (1) An element or attribute (1) in a data source that can contain data.

(2) A container for metadata within a SharePoint list and associated list items.

**globally unique identifier (GUID):** A term used interchangeably with universally unique identifier (UUID) in Microsoft protocol technical documents (TDs). Interchanging the usage of these terms does not imply or require a specific algorithm or mechanism to generate the value. Specifically, the use of this term does not imply or require that the algorithms described in [RFC4122] or [C7061] must be used for generating the **GUID**. See also universally unique identifier (UUID).

**item:** A unit of content that can be indexed and searched by a search application.

**JavaScript Object Notation (JSON):** A text-based, data interchange format that is used to transmit structured data, typically in Asynchronous JavaScript + XML (AJAX) web applications, as described in [RFC4627]. The JSON format is based on the structure of ECMAScript (Jscript, JavaScript) objects.

**leaf name:** The segment of a URL that follows the last slash. If the resource is a directory, the leaf name can be an empty string (1).

**list:** A container within a SharePoint site that stores list items. A list has a customizable schema that is composed of one or more fields.

**list item:** An individual entry within a SharePoint list. Each list item has a schema that maps to fields in the list that contains the item, depending on the content type of the item.

**published:** A condition of portions of a workbook that are marked as being available to the user when that workbook is processed by a protocol server.

**site:** A group of related pages and data within a SharePoint site collection. The structure and content of a site is based on a site definition. Also referred to as SharePoint site and web site.

**solution package:** A compressed file that can be deployed to a server farm or a site. It can contain assemblies, resource files, site and feature definitions, templates, code access security policies, and Web Parts. Solution packages have a .wsp file name extension.

**Uniform Resource Locator (URL):** A string of characters in a standardized format that identifies a document or resource on the World Wide Web. The format is as specified in [\[RFC1738\]](#).

**workflow:** A structured modular component that enables the automated movement of documents or items through a specific sequence of actions or tasks that are related to built-in or user-defined business processes.

**workflow association:** An association of a workflow template to a specific list or content type.

**workflow host:** A service that runs XAML workflows.

**workflow identifier:** A GUID that is used to identify a workflow.

**workflow initiation form:** An implementation-specific file, typically an ASPX page, that is a part of a workflow. It contains fields and other elements that can be used to initiate a process for a list item, based on the rules and settings in a workflow template that is associated with the list that contains the item.

**workflow instance:** An instance of a workflow association that performs on a list item the process that is defined in a workflow template.

**workflow store:** A stored collection of workflow definitions, **workflow associations**, and files that are related to workflows.

**workflow subscription:** A relationship that determines the data a **workflow** uses and when the workflow will launch.

**XML:** The Extensible Markup Language, as described in [\[XML1.0\]](#).

**MAY, SHOULD, MUST, SHOULD NOT, MUST NOT:** These terms (in all caps) are used as defined in [\[RFC2119\]](#). All statements of optional behavior use either MAY, SHOULD, or SHOULD NOT.

## 1.2 References

Links to a document in the Microsoft Open Specifications library point to the correct section in the most recently published version of the referenced document. However, because individual documents in the library are not updated at the same time, the section numbers in the documents may not match. You can confirm the correct section numbering by checking the [Errata](#).

### 1.2.1 Normative References

We conduct frequent surveys of the normative references to assure their continued availability. If you have any issue with finding a normative reference, please contact [dochelp@microsoft.com](mailto:dochelp@microsoft.com). We will assist you in finding the relevant information.

## 1.3 Overview

This protocol defines types, methods, and properties that protocol clients use to manage **workflows** on a **site** on a protocol server. The types, properties, and methods enable remote clients to manage **workflow associations**, to send workflow **events**, to control or to query **workflow instances**, and to manage workflow definitions and **actions**.

## 1.4 Relationship to Other Protocols

This protocol is a set of types, properties, and methods that can be accessed by using the SharePoint Client Query Protocol as described in [\[MS-CSOM\]](#). This protocol uses JSON as described in [\[RFC4627\]](#) to format data returned to a protocol client. This protocol also uses HTTP, as described in [\[RFC2616\]](#), and HTTPS, as described in [\[RFC2818\]](#) as the transport. The dependencies for this protocol are shown in the following layering diagram.

**Figure 1: This protocol in relation to other protocols**

## 1.5 Prerequisites/Preconditions

This protocol operates against workflows on a site that is identified by a **Uniform Resource Locator (URL)** that is recognized by protocol clients. This protocol assumes that **authentication** has been performed by underlying protocols.

## 1.6 Applicability Statement

This protocol can be used by a protocol client to manage workflows on a protocol server. This protocol is optimized to enable a protocol client to specify the exact set of data and operations to perform in a single batch, making it a suitable solution when the connection speed between the protocol client and

the protocol server is slow. This protocol is not suitable and is inefficient if both the protocol client and protocol server are on the same computer. In this case, the protocol client can use an API that does not require communication over a network.

## **1.7 Versioning and Capability Negotiation**

- Security and Authentication Methods: This protocol operates in the context of the authenticated user that made a request to the service, and that it runs in the context of a particular site.
- Localization: Localization-specific properties, such as the title of a **list**, are returned by using the preferred language of the user, if available, or by using the default language of the site as a fallback. Certain properties can be read or written for specific locales, and are listed in the document.

## **1.8 Vendor-Extensible Fields**

None.

## **1.9 Standards Assignments**

None.

## **2 Messages**

### **2.1 Transport**

Messages are transported by using the SharePoint Client Query Protocol, as specified in [\[MS-CSOM\]](#).

### **2.2 Message Syntax**

None.

Preliminary

## 3 Protocol Details

### 3.1 Server Details

#### 3.1.1 Abstract Data Model

This section describes a conceptual model of possible data organization that an implementation maintains to participate in this protocol. The described organization is provided to facilitate the explanation of how the protocol behaves. This specification does not mandate that implementations adhere to this model as long as their external behavior is consistent with that described in this specification.

This protocol deals with various structures associated with sites, lists, **items**, navigation, and other structures as specified in [\[MS-WSSTS\]](#).

#### 3.1.2 Timers

None.

#### 3.1.3 Initialization

None.

#### 3.1.4 Higher-Layer Triggered Events

None.

### 3.1.5 Message Processing Events and Sequencing Rules

#### 3.1.5.1 Microsoft.SharePoint.Client.WorkflowServices.WorkflowDefinition

**TypeId:** {60320D36-4B4D-4BAC-A092-8F8B5610EDCD}

**ShortName:** SP.WorkflowServices.WorkflowDefinition

Represents a workflow definition and associated properties.

##### 3.1.5.1.1 Properties

###### 3.1.5.1.1.1 Scalar Properties

###### 3.1.5.1.1.1.1 Description

**Type:** CSOM String

**Accessibility:** Read/Write

Specifies the description for **WorkflowDefinition** (section [3.1.5.1](#)).

###### 3.1.5.1.1.1.2 DisplayName

**Type:** CSOM String

**Accessibility:** Read/Write

Specifies the display name for **WorkflowDefinition** (section [3.1.5.1](#)).

#### **3.1.5.1.1.1.3 Id**

**Type:** CSOM GUID

**Accessibility:** Read/Write

Specifies the **workflow identifier** for **WorkflowDefinition** (section [3.1.5.1](#)).

#### **3.1.5.1.1.1.4 Properties**

**Type:** CSOM dictionary

**Accessibility:** Read Only

Gets the custom properties for **WorkflowDefinition** (section [3.1.5.1](#)).

#### **3.1.5.1.1.1.5 Xaml**

**Type:** CSOM String

**Accessibility:** Read/Write

Specifies the **XAML** for **WorkflowDefinition** (section [3.1.5.1](#)).

#### **3.1.5.1.1.1.6 AssociationUrl**

**Type:** CSOM String

**Accessibility:** Read/Write

Specifies the Uniform Resource Locator (URL) of the **association form**.

**Remarks:**

If the value is null or empty, the workflow has no association form.

#### **3.1.5.1.1.1.7 FormField**

**Type:** CSOM String

**Accessibility:** Read/Write

Defines the **fields** of the **workflow initiation forms** and association forms as specified in [\[MS-WSSCAML\]](#) section 2.3.2.9.

#### **3.1.5.1.1.1.8 InitiationUrl**

**Type:** CSOM String

**Accessibility:** Read/Write

Specifies the Uniform Resource Locator (URL) of the workflow initiation form.

**Remarks:**

If the value is null or empty, the workflow has no workflow initiation form.

#### **3.1.5.1.1.1.9 RequiresAssociationForm**

**Type:** CSOM Boolean

**Accessibility:** Read/Write

Determines whether to automatically generate an association form for this workflow.

**Remarks:**

If the value is true, and the **AssociationUrl** (section [3.1.5.1.1.6](#)) is not already set, a default association form is automatically generated for the workflow when **SaveDefinition** (section [3.1.5.8.2.1.6](#)) is called.

### 3.1.5.1.1.10 RequiresInitiationForm

**Type:** CSOM Boolean

**Accessibility:** Read/Write

Determines whether to automatically generate a workflow initiation form for this workflow.

**Remarks:**

If the value is true, and the **InitiationUrl** (section [3.1.5.1.1.8](#)) is not already set, a default workflow initiation form is automatically generated for the workflow when **SaveDefinition** (section [3.1.5.8.2.1.6](#)) is called.

### 3.1.5.1.1.11 Published

**Type:** CSOM Boolean

**Accessibility:** Read Only

"true" if the **WorkflowDefinition** (section [3.1.5.1](#)) has been published to the external **workflow host**; "false" if the **WorkflowDefinition** is only saved on the site.

### 3.1.5.1.1.12 RestrictToScope

**Type:** CSOM String

**Accessibility:** Read/Write

Specifies the restricted scope of the **WorkflowDefinition** (section [3.1.5.1](#)).

**Remarks:**

**RestrictToScope** is a **GUID** value, used in conjunction with the **RestrictToType** property to further restrict the scope of the definition. For example, if the **RestrictToType** is "List", then setting the **RestrictToScope** to a particular list identifier limits the definition to be associative only to the specified list. If the **RestrictToType** is "List" but the **RestrictToScope** is null or the empty string, then the definition is associative to any list.

### 3.1.5.1.1.13 RestrictToType

**Type:** CSOM String

**Accessibility:** Read/Write

Specifies the restricted type of the **WorkflowDefinition** (section [3.1.5.1](#)).

**Remarks:**

**RestrictToType** determines the possible event source type for a workflow subscription that uses this definition. Possible values include "List", "Site", the empty string, or null. For example, a value of "List" indicates this definition is a list workflow and can only be associated to a list. An empty string or null value indicates this definition is a universal template, available to associate to any type.

### 3.1.5.1.1.14 DraftVersion

**Type:** CSOM String

**Accessibility:** Read/Write

Identifier for a draft version of a **WorkflowDefinition** (section [3.1.5.1](#)).

**Remarks:**

If **SaveDefinition** (section [3.1.5.8.2.1.6](#)) is called with a **WorkflowDefinition** (section 3.1.5.1) identifier that matches the identifier of a **WorkflowDefinition** on the server, then the **DraftVersion** of the **WorkflowDefinition** MUST match the **DraftVersion** of the **WorkflowDefinition** on the server.

### 3.1.5.1.1.2 ObjectPath Properties

None.

### 3.1.5.1.2 Methods

#### 3.1.5.1.2.1 Scalar Methods

##### 3.1.5.1.2.1.1 SetProperty

**Return Type:** None

This method adds a key-value pair (propertyName, value) to the **WorkflowDefinition** (section [3.1.5.1](#)) object's property bag.

**Parameters:**

*propertyName*: Name of the property to add.

Type: CSOM String

*value*: Value of the property to add.

Type: CSOM String

#### 3.1.5.1.2.2 ObjectPath Methods

##### 3.1.5.1.2.2.1 CSOM Constructor

Creates an instance of the **WorkflowDefinition** (section [3.1.5.1](#)) object.

**Parameters:** None

### 3.1.5.2 Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstance

**TypeId:** {AEC0FE18-F5E5-4C65-A9D3-550B4169B1BC}

**ShortName:** SP.WorkflowServices.WorkflowInstance

Represents a workflow instance.

### 3.1.5.2.1 Properties

#### 3.1.5.2.1.1 Scalar Properties

##### 3.1.5.2.1.1.1 InstanceCreated

**Type:** CSOM DateTime

**Accessibility:** Read Only

Gets the **Coordinated Universal Time (UTC)** when this **WorkflowInstance** (section [3.1.5.2](#)) was created.

##### 3.1.5.2.1.1.2 LastUpdated

**Type:** CSOM DateTime

**Accessibility:** Read Only

Gets the Coordinated Universal Time (UTC) when this **WorkflowInstance** (section [3.1.5.2](#)) state was last persisted.

##### 3.1.5.2.1.1.3 Properties

**Type:** CSOM dictionary

**Accessibility:** Read Only

Specifies the properties of this **WorkflowInstance** (section [3.1.5.2](#)).

##### 3.1.5.2.1.1.4 Status

**Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowStatus

**Accessibility:** Read Only

Specifies the runtime status of this **WorkflowInstance** (section [3.1.5.2](#)).

##### 3.1.5.2.1.1.5 UserStatus

**Type:** CSOM String

**Accessibility:** Read/Write

Specifies the custom status set by workflow authors of this **WorkflowInstance** (section [3.1.5.2](#)).

##### 3.1.5.2.1.1.6 WorkflowSubscriptionId

**Type:** CSOM GUID

**Accessibility:** Read Only

Gets the unique identifier of the subscription that instantiates the **WorkflowInstance** (section [3.1.5.2](#)).

##### 3.1.5.2.1.1.7 Id

**Type:** CSOM GUID

**Accessibility:** Read Only

Gets the unique identifier of the **WorkflowInstance** (section [3.1.5.2](#)).

#### **3.1.5.2.1.1.8 FaultInfo**

**Type:** CSOM String

**Accessibility:** Read Only

Contains the error string or exception information if the workflow faults.

### **3.1.5.2.1.2 ObjectPath Properties**

None.

### **3.1.5.2.2 Methods**

#### **3.1.5.2.2.1 Scalar Methods**

None.

#### **3.1.5.2.2.2 ObjectPath Methods**

None.

## **3.1.5.3 Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceCollection**

**TypeId:** {AEC0FE18-F5E5-4C65-A9D3-550B4169B1BB}

**ShortName:** SP.WorkflowServices.WorkflowInstanceCollection

A collection of **WorkflowInstance** (section [3.1.5.2](#)) objects.

### **3.1.5.3.1 Properties**

#### **3.1.5.3.1.1 Scalar Properties**

None.

#### **3.1.5.3.1.2 ObjectPath Properties**

None.

### **3.1.5.3.2 Methods**

#### **3.1.5.3.2.1 Scalar Methods**

None.

#### **3.1.5.3.2.2 ObjectPath Methods**

None.

### **3.1.5.4 Microsoft.SharePoint.Client.WorkflowServices.WorkflowServicesManager**

**TypeId:** {4CCC7F0E-BF7E-4477-999C-6458A73D0039}

**ShortName:** SP.WorkflowServices.WorkflowServicesManager

Describes the workflow host configuration states and provides service objects that interact with the workflow.

#### **3.1.5.4.1 Properties**

##### **3.1.5.4.1.1 Scalar Properties**

###### **3.1.5.4.1.1.1 AppId**

**Type:** CSOM String

**Accessibility:** Read Only

The current **application** identifier.

###### **3.1.5.4.1.1.2 IsConnected**

**Type:** CSOM Boolean

**Accessibility:** Read Only

Indicates whether this workflow service is actively connected to a workflow host.

###### **3.1.5.4.1.1.3 ScopePath**

**Type:** CSOM String

**Accessibility:** Read Only

Returns the path of the current scope in the workflow host.

###### **3.1.5.4.1.1.4 ServiceHealthStatus**

**Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowServiceHealthStatus

**Accessibility:** Read Only

##### **3.1.5.4.1.2 ObjectPath Properties**

###### **3.1.5.4.1.2.1 Current**

**Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowServicesManager

**Accessibility:** Read Only

Returns the **WorkflowServicesManager** (section [3.1.5.4](#)) for the current **Web** ([\[MS-CSOMSPT\]](#) section 3.2.5.143) context.

##### **3.1.5.4.2 Methods**

###### **3.1.5.4.2.1 Scalar Methods**

### **3.1.5.4.2.1.1 IsIntegratedApp**

**Return Type:** CSOM Boolean

**Parameters:** None

### **3.1.5.4.2.2 ObjectPath Methods**

#### **3.1.5.4.2.2.1 GetWorkflowDeploymentService**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowDeploymentService

Returns the **WorkflowDeploymentService** (section [3.1.5.8](#)), which manages **WorkflowDefinition** (section [3.1.5.1](#)) objects and activities.

**Parameters:** None

#### **3.1.5.4.2.2.2 GetWorkflowInstanceService**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceService

Returns the **WorkflowInstanceService** (section [3.1.5.9](#)), which manages workflow instances.

**Parameters:** None

#### **3.1.5.4.2.2.3 GetWorkflowInteropService**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.InteropService

Returns the **InteropService** (section [3.1.5.7](#)), which provides methods to start or to wait for other workflows.

**Parameters:** None

#### **3.1.5.4.2.2.4 GetWorkflowSubscriptionService**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionService

Returns the **WorkflowSubscriptionService** (section [3.1.5.10](#)), which manages **workflow subscriptions**.

**Parameters:** None

#### **3.1.5.4.2.2.5 CSOM Constructor**

Creates an instance of the **WorkflowServicesManager** (section [3.1.5.4](#)) scoped to the specified **Web** ([\[MS-CSOMSPT\]](#) section 3.2.5.143).

**Parameters:**

*web:* The **Web** in which the **WorkflowServicesManager** will operate. The **WorkflowServicesManager** can be used to return instances of objects that allow management and interaction with workflow services, and these will be scoped to the **Web** specified by this constructor.

Type: Microsoft.SharePoint.Client.Web

### **3.1.5.5 Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription**

**TypeId:** {D185EDE6-C3C3-4D37-9E8C-2382DEB37708}

**ShortName:** SP.WorkflowServices.WorkflowSubscription

Represents a workflow subscription. Updating this subscription will asynchronously update the subscription in the external workflow host.

### 3.1.5.5.1 Properties

#### 3.1.5.5.1.1 Scalar Properties

##### 3.1.5.5.1.1.1 DefinitionId

**Type:** CSOM GUID

**Accessibility:** Read/Write

Specifies the identifier of the **WorkflowDefinition** (section [3.1.5.1](#)) that this **WorkflowSubscription** (section [3.1.5.5](#)) will use.

##### 3.1.5.5.1.1.2 EventSourceId

**Type:** CSOM GUID

**Accessibility:** Read/Write

Specifies a unique identifier for the logical source of the event. Used by the **EnumerateSubscriptionsByEventSource** (section [3.1.5.10.2.2.3](#)).

##### 3.1.5.5.1.1.3 Id

**Type:** CSOM GUID

**Accessibility:** Read/Write

Gets or sets the unique identifier of this **WorkflowSubscription** (section [3.1.5.5](#)).

##### 3.1.5.5.1.1.4 Name

**Type:** CSOM String

**Accessibility:** Read/Write

Gets or sets the display name of this **WorkflowSubscription** (section [3.1.5.5](#)).

##### 3.1.5.5.1.1.5 PropertyDefinitions

**Type:** CSOM dictionary

**Accessibility:** Read Only

Specifies the set of properties that will be available to the workflow instance at runtime.

##### 3.1.5.5.1.1.6 Enabled

**Type:** CSOM Boolean

**Accessibility:** Read/Write

Enables or disables this **WorkflowSubscription** (section [3.1.5.5](#)). When "false", new instances of the subscription cannot be started, but existing instances will continue to run.

### **3.1.5.5.1.1.7 StatusFieldName**

**Type:** CSOM String

**Accessibility:** Read/Write

Gets or sets the name of the workflow status field (2) on the list.

**Remarks:**

Only used for list workflows. If the value is null or the empty string, then a new status field will be created on the specified list when calling **PublishSubscriptionForList** (section [3.1.5.10.2.1.3](#)), and **StatusFieldName** is then set to the name of the new status field.

### **3.1.5.5.1.1.8 EventTypes**

**Type:** **CSOM array** of CSOM String

**Accessibility:** Read/Write

Specifies the list of event (1) types that this **WorkflowSubscription** (section [3.1.5.5](#)) monitors.

For list events, these map to an **SPEventReceiverType** enumeration value, as specified in [\[MS-SPPTC\]](#) section 2.2.1.5.

### **3.1.5.5.1.1.9 ManualStartBypassesActivationLimit**

**Type:** CSOM Boolean

**Accessibility:** Read/Write

If the value is **true**, then multiple workflow instances can be manually started on the same **list item** at the same time. Otherwise, the maximum number of workflow instances is limited. Only applicable on list workflows.

### **3.1.5.5.1.10 ParentContentTypeId**

**Type:** CSOM String

**Accessibility:** Read/Write

### **3.1.5.5.1.2 ObjectPath Properties**

None.

### **3.1.5.5.2 Methods**

#### **3.1.5.5.2.1 Scalar Methods**

##### **3.1.5.5.2.1.1 SetProperty**

**Return Type:** None

Specifies the properties for the **PropertyDefinitions** (section [3.1.5.5.1.1.5](#)).

**Parameters:**

*name*: The name of the property.

Type: CSOM String

*value*: The value of the property.

Type: CSOM String

### **3.1.5.5.2.1.2 GetExternalVariable**

**Return Type:** CSOM String

Returns the value associated with the external variable name.

**Parameters:**

*name*: The name of the external variable.

Type: CSOM String

### **3.1.5.5.2.1.3 SetExternalVariable**

**Return Type:** None

Specifies the default value for this external variable.

**Parameters:**

*name*: The name of the external variable.

Type: CSOM String

*value*: The value of the external variable.

Type: CSOM String

## **3.1.5.5.2.2 ObjectPath Methods**

### **3.1.5.5.2.2.1 CSOM Constructor**

Creates an instance of the **WorkflowSubscription** (section [3.1.5.5](#)) object.

**Parameters:** None

## **3.1.5.6 Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionCollection**

**TypeId:** {D185EDE6-C3C3-4D37-9E8C-2382DEB37707}

**ShortName:** SP.WorkflowServices.WorkflowSubscriptionCollection

A collection of **WorkflowSubscription** (section [3.1.5.5](#)) objects.

### **3.1.5.6.1 Properties**

#### **3.1.5.6.1.1 Scalar Properties**

None.

#### **3.1.5.6.1.2 ObjectPath Properties**

None.

### **3.1.5.6.2 Methods**

### **3.1.5.6.2.1 Scalar Methods**

#### **3.1.5.6.2.1.1 Sort**

**Return Type:** None

Sorts the workflow subscriptions in this collection.

**Parameters:** None

### **3.1.5.6.2.2 ObjectPath Methods**

None.

## **3.1.5.7 Microsoft.SharePoint.Client.WorkflowServices.InteropService**

**TypeId:** {AEDA1AE7-A445-429D-AD92-1D6B00DF7102}

**ShortName:** SP.WorkflowServices.InteropService

Allows the workflows to call other workflows.

### **3.1.5.7.1 Properties**

#### **3.1.5.7.1.1 Scalar Properties**

None.

#### **3.1.5.7.1.2 ObjectPath Properties**

##### **3.1.5.7.1.2.1 Current**

**Type:** Microsoft.SharePoint.Client.WorkflowServices.InteropService

**Accessibility:** Read Only

Gets the current **InteropService** (section [3.1.5.7](#)) for this request.

### **3.1.5.7.2 Methods**

#### **3.1.5.7.2.1 Scalar Methods**

##### **3.1.5.7.2.1.1 CancelWorkflow**

**Return Type:** None

Stops a workflow.

**Parameters:**

*instanceId*: Identifier of the workflow to cancel.

Type: CSOM GUID

##### **3.1.5.7.2.1.2 DisableEvents**

**Return Type:** None

Removes workflow events from an object.

**Parameters:**

*listId*: Identifier of a list on which to remove workflow (2) events. Use an **empty GUID** to specify events that SHOULD be disabled at the higher web scope.

Type: CSOM GUID

*itemGuid*: GUID that identifies a list item. Use an empty GUID to ignore the parameter.

Type: CSOM GUID

### 3.1.5.7.2.1.3 EnableEvents

**Return Type:** None

Enables workflow events on an object.

**Parameters:**

*listId*: Optional identifier of a list on which to enable workflow events. Use an empty GUID to specify events should be enabled at the higher web scope.

Type: CSOM GUID

*itemGuid*: GUID that identifies a list item. Use an empty GUID to ignore the parameter.

Type: CSOM GUID

### 3.1.5.7.2.1.4 StartWorkflow

**Return Type:** CSOM GUID

Starts a workflow.

**Parameters:**

*associationName*: The association name of the workflow to start.

Type: CSOM String

*correlationId*: GUID that represents this request.

Type: CSOM GUID

*listId*: Identifier of a list on which to start. Use an empty GUID to specify this is a site workflow that runs at the scope of the web rather than a specific list.

Type: CSOM GUID

*itemGuid*: GUID that identifies a list item. Use an empty GUID for site workflows.

Type: CSOM GUID

*workflowParameters*: Parameters passed to the new workflow.

Type: CSOM dictionary

## 3.1.5.7.2.2 ObjectPath Methods

None.

## **3.1.5.8 Microsoft.SharePoint.Client.WorkflowServices.WorkflowDeploymentService**

**TypeId:** {3573A52F-3A27-4700-A08E-822C191C2C5D}

**ShortName:** SP.WorkflowServices.WorkflowDeploymentService

Manages the **WorkflowDefinition** (section [3.1.5.1](#)) objects and **activity** authoring.

### **3.1.5.8.1 Properties**

#### **3.1.5.8.1.1 Scalar Properties**

None.

#### **3.1.5.8.1.2 ObjectPath Properties**

None.

### **3.1.5.8.2 Methods**

#### **3.1.5.8.2.1 Scalar Methods**

##### **3.1.5.8.2.1.1 DeleteDefinition**

**Return Type:** None

Deletes a **WorkflowDefinition** (section [3.1.5.1](#)).

**Parameters:**

*definitionId*: Identifier of the **WorkflowDefinition** (section 3.1.5.1).

Type: CSOM GUID

##### **3.1.5.8.2.1.2 DeprecateDefinition**

**Return Type:** None

Marks a **WorkflowDefinition** (section [3.1.5.1](#)) object as deprecated.

**Parameters:**

*definitionId*: Identifier of the definition to deprecate.

Type: CSOM GUID

##### **3.1.5.8.2.1.3 GetActivitySignatures**

**Return Type:** CSOM dictionary

Returns a collection of **XML** that represents the signature of a XAML (section [3.1.5.1.1.5](#)) class.

**Parameters:**

*lastChanged*: The time to check for latest changes. Any signatures older than this time are excluded.

Type: CSOM DateTime

##### **3.1.5.8.2.1.4 GetDesignerActions**

**Return Type:** CSOM String

Returns the list of valid workflow actions for this server.

**Parameters:**

*web*: The site from which to read the workflow actions.

Type: Microsoft.SharePoint.Client.Web

### 3.1.5.8.2.1.5 PublishDefinition

**Return Type:** None

Publishes a **WorkflowDefinition** (section [3.1.5.1](#)) to the **workflow store**.

**Parameters:**

*definitionId*: The identifier of the definition to publish.

Type: CSOM GUID

### 3.1.5.8.2.1.6 SaveDefinition

**Return Type:** CSOM GUID

Returns the unique identifier of the **WorkflowDefinition** (section [3.1.5.1](#)) in the workflow store.

**Parameters:**

*definition*: The definition to save.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowDefinition

### 3.1.5.8.2.1.7 ValidateActivity

**Return Type:** CSOM String

Validates the activity against the workflow store. Returns the error message encountered during validation, or null if successful.

**Parameters:**

*activityXaml*: The activity to validate.

Type: CSOM String

### 3.1.5.8.2.1.8 DeleteCollateral

**Return Type:** None

Deletes the URL of a **collateral file** for a **WorkflowDefinition** (section [3.1.5.1](#)).

**Parameters:**

*workflowDefinitionId*: Identifier of the **WorkflowDefinition** (section 3.1.5.1).

Type: CSOM GUID

*leafFileName*: The **leaf name** of the collateral file.

Type: CSOM String

### **3.1.5.8.2.1.9 GetCollateralUri**

**Return Type:** CSOM String

Retrieves the URL of a collateral file for a **WorkflowDefinition** (section [3.1.5.1](#)).

**Parameters:**

*workflowDefinitionId*: Identifier of the **WorkflowDefinition** (section 3.1.5.1).

Type: CSOM GUID

*leafFileName*: The leaf name of the collateral file.

Type: CSOM String

### **3.1.5.8.2.1.10 PackageDefinition**

**Return Type:** CSOM String

Returns a Uniform Resource Locator (URL) to the **solution package** generated from a single **WorkflowDefinition** (section [3.1.5.1](#)).

**Parameters:**

*definitionId*: The ID of the definition to package.

Type: CSOM GUID

*packageDefaultFilename*: The default file name to choose for the new package.

Type: CSOM String

*packageTitle*: The package title.

Type: CSOM String

*packageDescription*: The package description.

Type: CSOM String

### **3.1.5.8.2.1.11 SaveCollateral**

**Return Type:** None

Saves the collateral file for a **WorkflowDefinition** (section [3.1.5.1](#)).

**Parameters:**

*workflowDefinitionId*: Identifier of the **WorkflowDefinition** (section 3.1.5.1).

Type: CSOM GUID

*leafFileName*: The leaf name of the collateral file.

Type: CSOM String

*fileContent*: File content of the collateral file.

Type: **CSOM Stream**

### **3.1.5.8.2.1.12 IsIntegratedApp**

**Return Type:** CSOM Boolean

**Parameters:** None

### 3.1.5.8.2.2 ObjectPath Methods

#### 3.1.5.8.2.2.1 GetDefinition

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowDefinition

Returns a **WorkflowDefinition** (section [3.1.5.1](#)) from the workflow store.

**Parameters:**

*definitionId*: The identifier of the definition to retrieve.

Type: CSOM GUID

#### 3.1.5.8.2.2.2 EnumerateDefinitions

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowDefinitionCollection

Returns the **WorkflowDefinition** (section [3.1.5.1](#)) objects from the workflow store that match the specified parameters.

**Parameters:**

*publishedOnly*: "true" if only **published** workflows should be returned.

Type: CSOM Boolean

#### 3.1.5.8.2.2.3 EnumerateIntegratedApps

**Return Type:** CSOM array of Microsoft.SharePoint.Client.AppInstance

**Parameters:** None

### 3.1.5.9 Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceService

**TypeId:** {71252277-2470-4022-BCAF-C4657AA118C3}

**ShortName:** SP.WorkflowServices.WorkflowInstanceService

Manages and reads workflow instances from the workflow host.

#### 3.1.5.9.1 Properties

##### 3.1.5.9.1.1 Scalar Properties

None.

##### 3.1.5.9.1.2 ObjectPath Properties

###### 3.1.5.9.1.2.1 Current

**Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceService

**Accessibility:** Read Only

Returns the current instance of the **WorkflowInstanceService** (section [3.1.5.9](#))

### 3.1.5.9.2 Methods

#### 3.1.5.9.2.1 Scalar Methods

##### 3.1.5.9.2.1.1 CancelWorkflow

**Return Type:** None

Sends a cancel message to a workflow specified by the given instance.

**Parameters:**

*instance*: The **WorkflowInstance** (section [3.1.5.2](#)) to cancel.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstance

##### 3.1.5.9.2.1.2 StartWorkflow

**Return Type:** CSOM GUID

Starts a **WorkflowInstance** (section [3.1.5.2](#)) specified by the given workflow subscription and payload.

**Parameters:**

*subscription*: The **WorkflowSubscription** (section [3.1.5.5](#)) from which to start a new **WorkflowInstance** (section 3.1.5.2).

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription

*payload*: Parameters to pass into the **WorkflowInstance** (section 3.1.5.2).

Type: CSOM dictionary

##### 3.1.5.9.2.1.3 TerminateWorkflow

**Return Type:** None

Terminates a workflow specified by the given workflow instance ).

**Parameters:**

*instance*: The **WorkflowInstance** (section [3.1.5.2](#)) to terminate.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstance

##### 3.1.5.9.2.1.4 PublishCustomEvent

**Return Type:** None

Sends a custom event and its payload to a workflow specified by the given workflow instance.

**Parameters:**

*instance*: The **WorkflowInstance** (section [3.1.5.2](#)) to receive the custom event.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstance

*eventName*: Name of the custom event.

Type: CSOM String

*payload*: Payload of the custom event.

Type: CSOM String

### 3.1.5.9.2.1.5 CountInstances

**Return Type:** CSOM Int32

Returns a count of all the workflow instances of the specified **WorkflowSubscription** (section [3.1.5.5](#)).

**Parameters:**

*parentSubscription*: The parent workflow subscription of the instances to count.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription

### 3.1.5.9.2.1.6 CountInstancesWithStatus

**Return Type:** CSOM Int32

Returns a count of the workflow instances of the specified **WorkflowSubscription** (section [3.1.5.5](#)) with the specified status.

**Parameters:**

*parentSubscription*: The parent workflow subscription of the instances to count.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription

*status*: Only instances with this status (section [3.1.5.12](#)) value are counted. If the value is **WorkflowStatus.NotSpecified** (section [3.1.5.12.1.8](#)), instances in all statuses are counted.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowStatus

### 3.1.5.9.2.1.7 StartWorkflowOnListItem

**Return Type:** CSOM GUID

Starts a **WorkflowInstance** (section [3.1.5.2](#)) specified by the given workflow subscription on the given list item, and passes additional parameters.

**Parameters:**

*subscription*: The **WorkflowSubscription** (section [3.1.5.5](#)) from which to start a new **WorkflowInstance** (section 3.1.5.2).

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription

*itemId*: The identifier of an existing list item on which to start a new **WorkflowInstance** (section 3.1.5.2).

Type: CSOM Int32

*payload*: Parameters to pass into the **WorkflowInstance** (section 3.1.5.2).

Type: CSOM dictionary

### 3.1.5.9.2.1.8 GetDebugInfo

**Return Type:** CSOM String

Retrieves the debug information for the specified **WorkflowInstance** (section 3.1.5.2) in **JavaScript Object Notation (JSON)** format.

**Parameters:**

*instance*: The workflow instance to get debug information for.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstance

### 3.1.5.9.2.1.9 ResumeWorkflow

**Return Type:** None

Resumes a workflow instance.

**Parameters:**

*instance*: The workflow instance to resume.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstance

### 3.1.5.9.2.1.10 SuspendWorkflow

**Return Type:** None

Suspends a workflow instance.

**Parameters:**

*instance*: The workflow instance to suspend.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstance

### 3.1.5.9.2.1.11 StartWorkflowOnListItemBySubscriptionId

**Return Type:** CSOM GUID

Starts a **WorkflowInstance** (section 3.1.5.2) specified by the given workflow instance id on the given list item, and passes additional parameters.

**Parameters:**

*subscriptionId*: The guid of **WorkflowSubscription** (section 3.1.5.5) from which to start a **WorkflowInstance** (section 3.1.5.2).

Type: CSOM GUID

*itemId*: The identifier of an existing list item on which to start a new **WorkflowInstance** (section 3.1.5.2).

Type: CSOM Int32

*payload*: Parameters to pass into the **WorkflowInstance** (section 3.1.5.2).

Type: CSOM dictionary

## 3.1.5.9.2.2 ObjectPath Methods

### 3.1.5.9.2.2.1 Enumerate

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceCollection

Gets a collection of workflow instances started by the specified workflow subscription.

**Parameters:**

*parentSubscription*: The **WorkflowSubscription** (section 3.1.5.5) that started the workflow instances.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription

### 3.1.5.9.2.2.2 GetInstance

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstance

Returns a **WorkflowInstance** (section 3.1.5.2) from an external workflow store matching a specified workflow instance identifier.

**Parameters:**

*instanceId*: Unique identifier of the **WorkflowInstance** (section 3.1.5.2).

Type: CSOM GUID

### 3.1.5.9.2.2.3 EnumerateInstancesForListItem

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceCollection

Returns the workflow instances for the specified list item.

**Parameters:**

*listId*: The identifier of the list to which the item belongs.

Type: CSOM GUID

*itemId*: The identifier of the item to get the instances for.

Type: CSOM Int32

### 3.1.5.9.2.2.4 EnumerateInstancesForSite

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceCollection

Returns the site workflow instances for the current site.

**Parameters:** None

### 3.1.5.9.2.2.5 EnumerateInstancesForListItemWithOffset

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceCollection

Returns the collection of up to 100 workflow instances for the specified list item, starting from the specified offset.

**Parameters:**

*listId*: The identifier of the list to which the item belongs.

Type: CSOM GUID

*itemId*: The identifier of the item to get the workflow instances for.

Type: CSOM Int32

*offset*: The number of workflow instances to skip before returning the next 100 instances.

Type: CSOM Int32

### **3.1.5.9.2.2.6 EnumerateInstancesForSiteWithOffset**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceCollection

Returns the collection of up to 100 site workflow instances for the current site, starting from the specified offset.

#### **Parameters:**

*offset*: The number of workflow instances to skip before returning the next 100 instances.

Type: CSOM Int32

### **3.1.5.9.2.2.7 EnumerateWithOffset**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowInstanceCollection

Returns a collection of up to 100 workflow instances started by the specified subscription, starting from the specified offset.

#### **Parameters:**

*parentSubscription*: The subscription that started the workflow instances to get.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription

*offset*: The number of workflow instances to skip before returning the next 100 instances.

Type: CSOM Int32

## **3.1.5.10 Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionService**

**TypeId:** {FC956693-2419-4950-8963-52EBC3E46501}

**ShortName:** SP.WorkflowServices.WorkflowSubscriptionService

Manages workflow subscriptions for a workflow.

### **3.1.5.10.1 Properties**

#### **3.1.5.10.1.1 Scalar Properties**

None.

#### **3.1.5.10.1.2 ObjectPath Properties**

##### **3.1.5.10.1.2.1 Current**

**Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionService

**Accessibility:** Read Only

Returns the current **WorkflowSubscriptionService** (section [3.1.5.10](#)) object.

### 3.1.5.10.2 Methods

#### 3.1.5.10.2.1 Scalar Methods

##### 3.1.5.10.2.1.1 DeleteSubscription

**Return Type:** None

Deletes the specified **WorkflowSubscription** (section [3.1.5.5](#)).

**Parameters:**

*subscriptionId*: The identifier of the subscription to delete.

Type: CSOM GUID

##### 3.1.5.10.2.1.2 PublishSubscription

**Return Type:** CSOM GUID

Creates a workflow subscription for a workflow, and returns the unique identifier of the new subscription.

**Parameters:**

*subscription*: The **WorkflowSubscription** (section [3.1.5.5](#)) data to publish.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription

##### 3.1.5.10.2.1.3 PublishSubscriptionForList

**Return Type:** CSOM GUID

Creates a workflow subscription for a workflow and if necessary an **event receiver** on the specified list. Also writes an **EventSourceId** (section [3.1.5.1.1.2](#)) that matches the list as the event (2) source. Returns the unique identifier of the new subscription.

**Parameters:**

*subscription*: The **WorkflowSubscription** (section [3.1.5.5](#)) data to publish.

Type: Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription

*listId*: Identifier for the specified list.

Type: CSOM GUID

##### 3.1.5.10.2.1.4 RegisterInterestInHostWebList

**Return Type:** None

**Parameters:**

*listId*:

Type: CSOM GUID

*eventName*:

Type: CSOM String

### **3.1.5.10.2.1.5 RegisterInterestInList**

**Return Type:** None

Ensures that an event receiver will monitor a list for the specified event (2).

**Parameters:**

*listId*: GUID that specifies the list to monitor via an event receiver.

Type: CSOM GUID

*eventName*: The name of the event (2) to monitor.

Type: CSOM String

### **3.1.5.10.2.1.6 UnregisterInterestInHostWebList**

**Return Type:** None

**Parameters:**

*listId*:

Type: CSOM GUID

*eventName*:

Type: CSOM String

### **3.1.5.10.2.1.7 UnregisterInterestInList**

**Return Type:** None

Removes monitoring for an event receiver on the specified list with the specified event.

**Parameters:**

*listId*: GUID of the list containing the event receiver to be unregistered.

Type: CSOM GUID

*eventName*: The name of the event (2) to be removed.

Type: CSOM String

## **3.1.5.10.2.2 ObjectPath Methods**

### **3.1.5.10.2.2.1 EnumerateSubscriptions**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionCollection

Retrieves a **WorkflowSubscriptionCollection** (section [3.1.5.6](#)) that contains all of the workflow subscriptions on the **Web** ([\[MS-CSOMSPT\]](#) section 3.2.5.143).

**Parameters:** None

### **3.1.5.10.2.2.2 EnumerateSubscriptionsByDefinition**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionCollection

Retrieves a **WorkflowSubscriptionCollection** (section [3.1.5.6](#)) based on a **WorkflowDefinition** (section [3.1.5.1](#)).

**Parameters:**

*definitionId*: Identifier of a **WorkflowDefinition** (section 3.1.5.1) object.

Type: CSOM GUID

### 3.1.5.10.2.2.3      **EnumerateSubscriptionsByEventSource**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionCollection

Retrieves a **WorkflowSubscriptionCollection** (section [3.1.5.6](#)) based on the specified **EventSourceId** (section [3.1.5.5.1.1.2](#)).

**Parameters:**

*eventSourceId*: The unique identifier of the **EventSource** (section 3.1.5.5.1.1.2) for the subscriptions.

Type: CSOM GUID

### 3.1.5.10.2.2.4      **EnumerateSubscriptionsByList**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionCollection

Retrieves a **WorkflowSubscriptionCollection** (section [3.1.5.6](#)) based on the specified list.

**Parameters:**

*listId*: The unique identifier of the list on which to filter the subscriptions.

Type: CSOM GUID

### 3.1.5.10.2.2.5      **EnumerateSubscriptionsByListAndParentContentType**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionCollection

**Parameters:**

*listId*:

Type: CSOM GUID

*parentContentTypeId*:

Type: Microsoft.SharePoint.Client.ContentType

*includeNoContentTypeSpecified*:

Type: CSOM Boolean

### 3.1.5.10.2.2.6      **EnumerateSubscriptionsByListWithContentType**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscriptionCollection

**Parameters:**

*listId*:

Type: CSOM GUID

*includeContentTypeSpecified:*

Type: CSOM Boolean

### **3.1.5.10.2.2.7      GetSubscription**

**Return Type:** Microsoft.SharePoint.Client.WorkflowServices.WorkflowSubscription

Retrieves an instance of the **WorkflowSubscription** (section [3.1.5.5](#)) based on its unique identifier.

**Parameters:**

*subscriptionId*: The unique identifier of the subscription.

Type: CSOM GUID

## **3.1.5.11      Microsoft.SharePoint.Client.WorkflowServices.WorkflowDefinitionCollection**

**TypeId:** {66F013C8-F126-4F84-BC22-8FD0E9A3E7D3}

**ShortName:** SP.WorkflowServices.WorkflowDefinitionCollection

Represents a collection of **WorkflowDefinition** (section [3.1.5.1](#)) objects.

### **3.1.5.11.1    Properties**

#### **3.1.5.11.1.1    Scalar Properties**

None.

#### **3.1.5.11.1.2    ObjectPath Properties**

None.

### **3.1.5.11.2    Methods**

#### **3.1.5.11.2.1    Scalar Methods**

##### **3.1.5.11.2.1.1    Sort**

**Return Type:** None

**Parameters:** None

#### **3.1.5.11.2.2    ObjectPath Methods**

None.

## **3.1.5.12      Microsoft.SharePoint.Client.WorkflowServices.WorkflowStatus**

**ShortName:** SP.WorkflowServices.WorkflowStatus

**Flag:** false

An enumeration that represents the runtime status of a workflow instance.

### **3.1.5.12.1 Field Values**

#### **3.1.5.12.1.1 NotStarted**

**Value:** 0

The workflow instance has not started.

#### **3.1.5.12.1.2 Started**

**Value:** 1

The workflow instance has started.

#### **3.1.5.12.1.3 Suspended**

**Value:** 2

The workflow instance was suspended.

#### **3.1.5.12.1.4 Canceling**

**Value:** 3

The workflow instance received a cancel command and is responding to the request.

#### **3.1.5.12.1.5 Canceled**

**Value:** 4

The workflow instance has been canceled.

#### **3.1.5.12.1.6 Terminated**

**Value:** 5

The workflow instance has been terminated.

#### **3.1.5.12.1.7 Completed**

**Value:** 6

The workflow instance has finished running and is in the completed state.

#### **3.1.5.12.1.8 NotSpecified**

**Value:** 7

No status has been specified.

#### **3.1.5.12.1.9 Invalid**

**Value:** 8

The workflow instance is in an invalid state.

### **3.1.5.13 Microsoft.SharePoint.Client.WorkflowServices.WorkflowServiceHealthStatus**

**ShortName:** SP.WorkflowServices.WorkflowServiceHealthStatus

**Flag:** false

#### **3.1.5.13.1 Field Values**

##### **3.1.5.13.1.1 Active**

**Value:** 0

##### **3.1.5.13.1.2 NoScope**

**Value:** 1

##### **3.1.5.13.1.3 NotConnected**

**Value:** 2

##### **3.1.5.13.1.4 Suspended**

**Value:** 3

##### **3.1.5.13.1.5 Throttled**

**Value:** 4

##### **3.1.5.13.1.6 Unknown**

**Value:** 5

##### **3.1.5.13.1.7 Unregistered**

**Value:** 6

#### **3.1.6 Timer Events**

None.

#### **3.1.7 Other Local Events**

None.

## 4 Protocol Examples

### 4.1 Associate Workflow

In this example, a published workflow definition is associated with a list.

#### Request:

```
<Request AddExpandoFieldTypeSuffix="true" SchemaVersion="15.0.0.0" LibraryVersion="15.0.0.0"
  ApplicationName=".NET Library"
  xmlns="http://schemas.microsoft.com/sharepoint/clientquery/2009">
  <Actions>
    <SetProperty Id="78" ObjectPathId="74" Name="DefinitionId">
      <Parameter Type="Guid">{3988dd69-2ffa-45b5-b3f0-5735d4150110}</Parameter>
    </SetProperty>
    <SetProperty Id="79" ObjectPathId="74" Name="EventSourceId">
      <Parameter Type="Guid">{96424cc8-dc44-409d-ad9e-87236ee608a2}</Parameter>
    </SetProperty>
    <SetProperty Id="80" ObjectPathId="74" Name="EventSource">
      <Parameter Type="String">e3137044-d96b-4989-ad80-aed34f0cc10b/375160a8-0ab6-46f2-9b3d-
b987684b30e3/96424cc8-dc44-409d-ad9e-87236ee608a2</Parameter>
    </SetProperty>
    <SetProperty Id="81" ObjectPathId="74" Name="EventType">
      <Parameter Type="String">WorkflowStart</Parameter>
    </SetProperty>
    <SetProperty Id="82" ObjectPathId="74" Name="Name">
      <Parameter Type="String">testWorkflowAssociation1</Parameter>
    </SetProperty>
    <Method Name="PublishSubscription" Id="83" ObjectPathId="30">
      <Parameters>
        <Parameter ObjectPathId="74" />
      </Parameters>
    </Method>
  </Actions>
  <ObjectPaths>
    <Identity Id="74" Name="50e607f0-ceab-4a8c-90c5-81e2f2ba78d9:00000000-0000-0000-0000-
000000000000" />
    <Method Id="30" ParentId="25" Name="GetWorkflowSubscriptionService" />
    <Constructor Id="25" TypeId="{4ccc7f0e-bf7e-4477-999c-6458a73d0039}">
      <Parameters>

      </Parameters>
    </Constructor>
    <Identity Id="7" Name="740c6a0b-85e2-48a0-a494-e0f1759d4aa7:web:375160a8-0ab6-46f2-9b3d-
b987684b30e3" />
  </ObjectPaths>
</Request>
```

#### Response:

```
[{"SchemaVersion": "15.0.0.0", "LibraryVersion": "15.0.3427.1000", "ErrorInfo": null}, 83, "\/Guid(b72d25f3-8327-41d5-836d-ad956da3eb45) \/" ]
```

### 4.2 Publish Definition

In this example, a saved workflow definition is published.

#### Request:

```

<Request AddExpandoFieldTypeSuffix="true" SchemaVersion="15.0.0.0" LibraryVersion="15.0.0.0"
ApplicationName=".NET Library"
xmlns="http://schemas.microsoft.com/sharepoint/clientquery/2009">
<Actions>
<Method Name="PublishDefinition" Id="24" ObjectPathId="14">
<Parameters>
<Parameter Type="Guid">{3988dd69-2ffa-45b5-b3f0-5735d4150110}</Parameter>
</Parameters>
</Method>
</Actions>
<ObjectPaths>
<Method Id="14" ParentId="11" Name="GetWorkflowDeploymentService" />
<Constructor Id="11" TypeId="{4ccc7f0e-bf7e-4477-999c-6458a73d0039}">
<Parameters>
<Parameter ObjectPathId="7" />
</Parameters>
</Constructor>
<Identity Id="7" Name="740c6a0b-85e2-48a0-a494-e0f1759d4aa7:web:375160a8-0ab6-46f2-9b3d-
b987684b30e3" />
</ObjectPaths>
</Request>

```

### Response:

```

[
{
"SchemaVersion":"15.0.0.0","LibraryVersion":"15.0.3427.1000","ErrorInfo":null
}
]

```

## 4.3 Save Definition

In this example, a **WorkflowDefinition** (section [3.1.5.1](#)) is saved.

### Request:

```

<Request AddExpandoFieldTypeSuffix="true" SchemaVersion="15.0.0.0" LibraryVersion="15.0.0.0"
ApplicationName=".NET Library"
xmlns="http://schemas.microsoft.com/sharepoint/clientquery/2009">
<Actions>
< SetProperty Id="20" ObjectPathId="16" Name="DisplayName">
<Parameter Type="String">csomTest2</Parameter>
</ SetProperty>
< SetProperty Id="21" ObjectPathId="16" Name="Id">
<Parameter Type="Guid">{3988dd69-2ffa-45b5-b3f0-5735d4150110}</Parameter>
</ SetProperty>
< SetProperty Id="22" ObjectPathId="16" Name="Xaml">
<Parameter Type="String">

]

```

## 4.4 Start Workflow

In this example, a workflow instance is triggered from an existing workflow association.

### Request:

```

<Request AddExpandoFieldTypeSuffix="true" SchemaVersion="15.0.0.0" LibraryVersion="15.0.0.0"
    ApplicationName=".NET Library"
    xmlns="http://schemas.microsoft.com/sharepoint/clientquery/2009">
    <Actions>
        <Method Name="StartWorkflow" Id="150" ObjectPathId="87">
            <Parameters>
                <Parameter ObjectPathId="131" />
                <Parameter Type="Dictionary">
                    <Property Name="ListId" Type="Guid">{96424cc8-dc44-409d-ad9e-87236ee608a2}</Property>
                </Parameter>
            </Parameters>
        </Method>
    </Actions>
    <ObjectPaths>
        <Method Id="87" ParentId="84" Name="GetWorkflowInstanceService" />
        <Identity Id="131" Name="50e607f0-ceab-4a8c-90c5-81e2f2ba78d9:b72d25f3-8327-41d5-836d-ad956da3eb45" />
        <Constructor Id="84" TypeId="{4ccc7f0e-bf7e-4477-999c-6458a73d0039}">
            <Parameters>

b987684b30e3" />
</ObjectPaths>
</Request>
```

**Response:**

```
[  
{  
    "SchemaVersion": "15.0.0.0", "LibraryVersion": "15.0.3427.1000", "ErrorInfo": null  
}, 150, "\/Guid(4f5dc953-22c4-40ad-8ae8-75c3af9bf339)\/"]
```

## **5 Security**

### **5.1 Security Considerations for Implementers**

None.

### **5.2 Index of Security Parameters**

None.

Preliminary

## 6 Appendix A: Product Behavior

The information in this specification is applicable to the following Microsoft products or supplemental software. References to product versions include released service packs.

- Microsoft SharePoint Server 2013
- 1. Microsoft SharePoint Server 2016 Preview

Exceptions, if any, are noted below. If a service pack or Quick Fix Engineering (QFE) number appears with the product version, behavior changed in that service pack or QFE. The new behavior also applies to subsequent service packs of the product unless otherwise specified. If a product edition appears with the product version, behavior is different in that product edition.

Unless otherwise specified, any statement of optional behavior in this specification that is prescribed using the terms SHOULD or SHOULD NOT implies product behavior in accordance with the SHOULD or SHOULD NOT prescription. Unless otherwise specified, the term MAY implies that the product does not follow the prescription.

## 7 Change Tracking

This section identifies changes that were made to this document since the last release. Changes are classified as New, Major, Minor, Editorial, or No change.

The revision class **New** means that a new document is being released.

The revision class **Major** means that the technical content in the document was significantly revised. Major changes affect protocol interoperability or implementation. Examples of major changes are:

- A document revision that incorporates changes to interoperability requirements or functionality.
- The removal of a document from the documentation set.

The revision class **Minor** means that the meaning of the technical content was clarified. Minor changes do not affect protocol interoperability or implementation. Examples of minor changes are updates to clarify ambiguity at the sentence, paragraph, or table level.

The revision class **Editorial** means that the formatting in the technical content was changed. Editorial changes apply to grammatical, formatting, and style issues.

The revision class **No change** means that no new technical changes were introduced. Minor editorial and formatting changes may have been made, but the technical content of the document is identical to the last released version.

Major and minor changes can be described further using the following change types:

- New content added.
- Content updated.
- Content removed.
- New product behavior note added.
- Product behavior note updated.
- Product behavior note removed.
- New protocol syntax added.
- Protocol syntax updated.
- Protocol syntax removed.
- New content added due to protocol revision.
- Content updated due to protocol revision.
- Content removed due to protocol revision.
- New protocol syntax added due to protocol revision.
- Protocol syntax updated due to protocol revision.
- Protocol syntax removed due to protocol revision.
- Obsolete document removed.

Editorial changes are always classified with the change type **Editorially updated**.

Some important terms used in the change type descriptions are defined as follows:

- **Protocol syntax** refers to data elements (such as packets, structures, enumerations, and methods) as well as interfaces.
- **Protocol revision** refers to changes made to a protocol that affect the bits that are sent over the wire.

The changes made to this document are listed in the following table. For more information, please contact [dochelp@microsoft.com](mailto:dochelp@microsoft.com).

Section	Tracking number (if applicable) and description	Major change (Y or N)	Change type
<a href="#">6 Appendix A: Product Behavior</a>	Updated list of supported products.	Y	Content updated due to protocol revision.
