### *What You'll Need*

- A Windows Mobile® device
- A computer with Windows Vista®

**Windows Guides** is a library of easy-to-use guides that show you how to get more of your Windows experience. Share the guides with your friends and family.

## Entertainment is to-go with Windows Mobile

A Windows Mobile device puts an entertainment center in your pocket, making it easy to take your music and videos along wherever you go. You can listen to your favorite albums, watch videos, take pictures and share them, and more.

Windows Mobile includes the Windows Media® Player Mobile and plays the most popular audio and video formats. It's easy to synchronize your Windows Mobile device with the Windows Media Player on your PC to automatically update your favorite playlists, music files, and videos.

Plus, a wide variety of third-party Windows Mobile Certified software is available that can enable you to use your Windows Mobile device to watch live TV, create slideshows, listen to podcasts and more. You can also play games and personalize your device with ringtones and themes.

# Download, Save, and Play Music and Videos on Windows Mobile

## TRANSFER YOUR MUSIC AND VIDEOS TO YOUR WINDOWS MOBILE DEVICE

You can copy all the digital media files you like from your computer to your Windows Mobile device using the Sync feature in Windows Media Player. Using Sync ensures that files and album art are copied to your device correctly.

1. To open Windows Media Player, click the Windows logo in the bottom left corner of your display, select **All Programs** and then **Windows Media Player**.
2. Connect your Windows Mobile device to your computer using a USB cable.
3. If a window pops up asking you to name your device, you can either choose a name and click **Enter**, or just click **Enter**.
4. In Windows Media Player on your computer, click **Sync**.
5. Drag each item you want to synchronize to the device pane on the right side of the computer screen.
6. At the bottom of the device pane, click **Start Sync**. The files will be synchronized to your device.

## Download, Save and Play Music and Videos on Windows Mobile *(continued)*

After transferring your music, videos and photos to your device, you need to update your device's Media Library before you can play or view them.

1. Unplug the device from your computer.
2. From the Home screen, select **Start**, then **Windows Media**.
3. Select **Menu**, then **Library**.
4. Select **Menu** and then **Update Library**. Windows Media Player will scan your card for new media to add to your Media Library. Use the Update Library function each time you sync new content.

Now you can play your music and videos from the Windows Media Library.

### TO PLAY A SONG ON YOUR WINDOWS MOBILE DEVICE

1. Go to the **Start** menu. Scroll down and select **Windows Media**. This takes you to your **Library**.

Figure 2—Library on Windows Mobile

## Download, Save and Play Music and Videos on Windows Mobile *(continued)*

2. Select **My Music**. Just like on your PC, you can view your music or sort it by **Artist**, **Album** or **Genre**.

Figure 3—My Videos in Windows Mobile

3. If you're looking for a song by a particular artist, select **Artist**.
4. From the list, select the artist you're looking for.
5. From the list of songs by that artist that are currently stored on your device, click on the song you want to play.

6. Using the control buttons, you can adjust the volume and rate the song.

Windows Media devices manage your music libraries separately for the device main memory and the storage card. To switch between the two, in WMP, select **Menu**, then **Library**, then choose either **My Device** or **Storage Card**.

## Download, Save and Play Music and Videos on Windows Mobile *(continued)*

### PLAY A VIDEO ON WINDOWS MOBILE

1. Go to the **Start** menu. Scroll down to **Windows Media Player** and hit **ENTER**. This takes you to your **Library**. If you don't see the Library select **Menu** then **Library**.
2. Select **My Videos**.
3. Select the video you want to play, and then select **Play**.
