

# Built on the Powerful Microsoft Azure Platform, MatterMojo Helps Make Lawyers More Productive through Enjoyable Technology

## MICROSOFT AZURE ISV PROFILE: MATTERMOJO

MatterMojo, founded in 2013 in the United Kingdom, is targeted at law firms looking for an affordable, cloud-based client and matter management solution. Easily manage your clients, matters, contacts, tasks, and documents while improving your compliance and reducing risk, all via a simple but elegant portal that integrates seamlessly with Microsoft Office 365.

## WHAT WE OFFER

### Matter Management

MatterMojo marks a new era of matter management technology, known as matter management as a service. Delivered to law firms through a monthly subscription model, MatterMojo redefines the way client and matter management software is deployed and consumed.

### Always Connected

MatterMojo is accessible from any modern browser, ensuring you remain connected when out of the office. Enjoy the powerful connectivity benefits of cloud computing, putting client and matter data in the palm of your hand wherever you are.

### MatterMojo for Office 365

Boost productivity even further with MatterMojo for Office 365 – the perfect addition to your existing Office 365 subscription. This single sign-on experience provides integrated access to all the productivity features available across both products.

### Manage Risk

Get your MatterMojo working and enjoy a wide range of benefits for you and your firm:

- Improve utilization
- Increase client collaboration
- Access information while on the move
- Quickly intake new clients while managing risk effectively

## WHAT OUR CUSTOMERS ARE SAYING

"This is a great productivity app for lawyers and I really like the user interface. You can quickly intake new clients and manage matters efficiently while on the move!" – Tess Beaumont, Solicitor, BeauLegal

# Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

## KEY USE CASES

### WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

### CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

### BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

### MOBILE

Accelerate your mobile app development by using a backend hosted in Microsoft Azure. Scale instantly as your install base grows.

### MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

## FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

## ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

## DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

## GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
