

OutSystems' Rapid Application Delivery Platform Unleashes the Power of Azure Services Along with Functional and Fast Mobile and Web Experiences

MICROSOFT AZURE APP BUILDER PROFILE: OUTSYSTEMS

OutSystems Platform, a rapid application delivery platform, offers the ability to deploy applications fast on Microsoft Azure. With OutSystems on Azure, customers can maintain the standards, security, and reliability they have come to know and trust from Microsoft while developing fast and beautiful applications in OutSystems.

WHAT WE OFFER

Cortana analytics integration: Take advantage of the analytics or perceptual intelligence of Cortana by easily integrating with OutSystems Platform. Quickly get up to speed with machine learning capabilities through the application of pre-built, industry-specific solutions from Cortana built in OutSystems.

Azure IoT Suite integration: Looking to use the Internet of Things (IoT) to digitize your business? Azure IoT Suite integrates cleanly with OutSystems Platform. Use Azure's prebuilt modules in OutSystems to get a head start on this emerging technology.

Business process and workflow: Align your software to the workflow, not the other way around. OutSystems on Azure allows you to build applications to fit the way your business operates most efficiently.

Access to any function in any phone: Cross-channel and cross-platform development is accomplished automatically by creating an application just once. So, regardless of whether your users are on Windows, iOS or Android, your applications will work right the first time and every time.

WHAT OUR CUSTOMERS ARE SAYING

"OutSystems enabled us to rapidly build eServe, a web-based portal for our brokers that helps them better serve their customers and eliminates unnecessary processes and delays." – Chris Voller, Director of Claims, Axa

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
